

# Technical Information Report

## AAMI TIR63: 2014/(R)2023

Management of loaned  
critical and semi-critical  
medical devices that  
require sterilization or  
high-level disinfection

Currently in preview, click buy full version

## Management of loaned critical and semi-critical medical devices that require sterilization or high-level disinfection

Approved 23 December 2014 and reaffirmed 2 December 2017, 31 December 2020, and 15 March 2023 by AAMI

**Abstract:** This technical information report identifies the necessary steps to effectively manage medical devices not owned by the health care facility in which they are used.

**Keywords:** high-level disinfection, loaned medical device, medical equipment management, quality systems, sterilization

## AAMI Technical Information Report

A technical information report (TIR) is a publication of the Association for the Advancement of Medical Instrumentation (AAMI) Standards Board that addresses a particular aspect of medical technology.

Although the material presented in a TIR may need further evaluation by experts, releasing the information is valuable because the industry and the professions have an immediate need for it.

A TIR differs markedly from a standard or recommended practice, and readers should understand the differences between these documents.

Standards and recommended practices are subject to a formal process of committee approval, public review, and resolution of all comments. This process of consensus is supervised by the AAMI Standards Board and, in the case of American National Standards, by the American National Standards Institute.

A TIR is not subject to the same formal approval process as a standard. However, a TIR is approved for distribution by a technical committee and the AAMI Standards Board.

Another difference is that, although both standards and TIRs are periodically reviewed, a standard must be acted on—reaffirmed, revised, or withdrawn—and the action formally approved usually every five years, but at least every 10 years. For a TIR, AAMI consults with a technical committee about five years after the publication date (and periodically thereafter) for guidance on whether the document is still useful—that is, to check that the information is relevant or of historical value. If the information is not useful, the TIR is removed from circulation.

A TIR may be developed because it is more responsive to underlying safety or performance issues than a standard or recommended practice, or because achieving consensus is extremely difficult or unlikely. Unlike a standard, a TIR permits the inclusion of differing viewpoints on technical issues.

**CAUTION NOTICE:** This AAMI TIR may be revised or withdrawn at any time. Because it addresses a rapidly evolving field or technology, readers are cautioned to ensure that they have also considered information that may be more recent than this document.

All standards, recommended practices, technical information reports, and other types of technical documents developed by AAMI are voluntary, and their application is solely within the discretion and professional judgment of the user of the document. Occasionally, voluntary technical documents are adopted by government regulatory agencies or procurement authorities, in which case the adopting agency is responsible for enforcement of its rules and regulations.

Comments on this technical information report are invited and should be sent to AAMI, Attn: Standards Department, 901 N. Glebe Road, Suite 300, Arlington, VA 22203.

## **Glossary of equivalent standards**

International Standards adopted in the United States may include normative references to other International Standards. AAMI maintains a current list of each International Standard that has been adopted by AAMI (and ANSI). Available on the AAMI website at the address below, this list gives the corresponding U.S. designation and level of equivalency to the International Standard.

## Committee representation

### Association for the Advancement of Medical Instrumentation Reusable Sterilization Container Working Group

This standard was developed by the AAMI Reusable Sterilization Container Working Group under the auspices of the AAMI Sterilization Standards Committee. Approval of the standard does not necessarily mean that all working group members voted for its approval. At the time this standard was published, the **AAMI Reusable Sterilization Container Working Group** had the following members:

*Chairs:* Damien Berg, Medical Center of the Rockies  
Joan M. Spear, MBA RM CMPR, B Braun of America Inc

*Members:* Mohamed Ali, Medline Industries Inc  
Heide M. Ames, Steris Corporation  
Angela H. Brightwell, Medtronic Inc WHQ Campus  
Renee Camp, MS, Moog Medical Devices  
Jason Cartwright, CareFusion  
Nancy Chobin, RN CSPDM, St Barnabas Healthcare System  
Susan Christensen, Christensen Consulting  
Linda Condon, Johns Hopkins Hospital  
Ramona Conner, RN MSN CNOR, Association of Perioperative Registered Nurses  
Jacqueline Daley, Sinai Hospital of Baltimore  
April J. Doering, St Jude Medical Inc  
Mary Ann Drosnock, MS, Olympus America Inc  
Betty D. Edge, North Shore University Hospital  
Steven J. Elliott, NAMSA  
Steven Elliott, FDA/CDRH  
Sue Ellen Erickson, MS CNOR, Newark Beth Israel Medical Center  
Susan Flynn, 3M Healthcare  
Marcia Ann Frieze, Case Medical Inc  
Dixit Gandhi, Medline Industries Inc  
Shelley Green, WuXi AppTec Inc  
Charles Oren Hancock, RAC, H&W Technology LLC  
Jason Harrington, VA Medical Center of Cincinnati  
Sybil Hickes, Materials Management Systems  
Charles A. Hughes, Medivators Inc  
Nupur Jain, Intuitive Surgical Inc  
Scott A. Jelley, Johnson & Johnson  
David W. Johnson, Kimberly Clark Corporation  
Susan G. Klacik, CCMMC FCS ACE, IAHCSSM  
Colleen Patricia Landers, RN, Timmins & District Hospital  
Mary Kneecce Landers, BSA MHA CSPDS CSPDM  
Helene Leblond, TCS3 Inc  
Teckla A. Marzucca, LPN CSPDM, St Clare's Health System  
Emily Mizel, MS, Nelson Laboratories Inc  
Thomas C. Moore, C-Moore  
Frank Myers, USPHS Indian Health Service  
Karen Nauss, CRCST, Mount Auburn Hospital  
Gerry A. O'Dell, MS, Gerry O'Dell Consulting  
Rodney D. Parker, Stryker Instruments Division  
Anthony Powell, Getinge USA  
Rose E. Seavey, RN MBA CNOR CRCST, Seavey Healthcare Consulting, LLC  
Frank Sizemore, Wake Forest University Baptist Medical Center  
Linda Slone, RN BSPA CNOR  
Gary J. Socola, HIGHPOWER Validation Testing & Lab Services Inc  
Betty Strickland, Pryce Consultants  
Karen Swanson, Connecticut Childrens Medical Center  
R. Brent Sweet, Zimmer Inc  
Raymond Taurasi, MBA CRCST CHL FCS AC, Healthmark Industries Company Inc  
Nora E. Wikander, RN, CSPDM, St Josephs Wayne Hospital  
Ann Young, Fletcher Allen Health Care  
Martha L. Young, Martha L Young, LLC
