1. Gas Heat is Preferred in New Homes over Electricity and Oil—Single Family Completions 1998-2008.....	3
2. Heating Market Share of All Private Housing Completions 1998-2008.....	7

## **Introduction**

This year's report is the 61<sup>st</sup> annual *Residential Natural Gas Market Survey* conducted by the American Gas Association (AGA). The data collected for 2008 provide a unique and comprehensive portrait of the residential natural gas market. Detailed information is presented by state and region, including customers, market share, inventory additions from new homes, and conversions from alternative fuels. Company-specific data are reported in Appendices A, B and C. Appendix D presents natural gas market shares data for the metropolitan statistical areas.

A total of 64 natural gas utility companies responded to this year's survey. This is an increase from the 57 utilities that responded to last year's survey. Company-specific data were derived from the Energy Information Administration's Form 176 database.

Incorporated in the survey results are data regarding new private housing completions as well as existing homes from the U.S. Bureau of the Census. The source of these data is different from the statistics compiled from the survey respondents and should be evaluated separately.

Our thanks go to those companies participating in this *Residential Natural Gas Market Survey* information-gathering effort. Their cooperation and support are essential to making this publication a primary source of natural gas utility industry data and an important industry reference.
