The AGA FERC Manual:

A Guide for Local Distribution Companies

DEDICATION

This edition of the *AGA FERC Manual* is dedicated to

James Curtis ("Curt"), Moffatt who persistently demonstrated grace, generosity, a keen intellect, and a deep and abiding love for life, family, and country.

He attended Duke University and graduated in 1973 from Trinity College of Arts and Sciences. The President of Duke, Terry Sanford (and former U.S. Senator) sent Curt on course for his future law degree and interest in public policy and public service. Curt worked on Senator Sanford's campaigns for President as well as for Senators Mo Udall and Fritz Hollings, and for Jimmy Carter. He was a dedicated philanthropist, benefitting his beloved Duke University and the Sandy Spring Friends School, where he served on the board. Curt was a passionate advocate for the Caron Treatment Centers, working to raise capital and reach out to others in need of assistance in all the complexities and challenges of recovery. He is the posthumous and deserving recipient of the Energy Bar Association's Paul E. Nordstrom award which honors and recognizes exemplary long-term service or a particularly significant example of public service to the community.

Before becoming General Counsel and Vice President of Kinder Morgan, Curt worked at the Federal Power Commission as special assistant and advisor to the Chairman, Charlie Curtis, in the firm of O'Neill and Haase, and for many years as a partner and leader at Van Ness Feldman.

People who encountered Curt professionally and away from work genuinely enjoyed his company and respected him. He is missed and the profession is poorer as a result of his passing.

ACKNOWLEDGMENTS

As has been the case with each edition of the *FERC Manual*, the AGA sought the assistance of Lawrence G. Acker for the preparation of the current edition. Mr. Acker has substantial experience in practice before the Federal Energy Regulatory Commission ("FERC") and is a Partner in VNF. He is the principal author and editor of the *FERC Manual*, as he has been since the first edition. In this edition, Mr. Acker has been assisted in editing and drafting by Michael Diamond, a lawyer with substantial natural gas regulatory experience before FERC.

Contributors to the current edition are identified in the heading of their chapters. The current contributors consist of lawyers and senior energy analysts at VNF. Contributors to prior editions are identified at www.vnf.com/AGAcontributors. Their participation has been greatly appreciated.

Information about Van Ness Feldman is available at www.vnf.com. This volume would not have been possible without the continuing dedication and work of Claire M. Brennan, who is the Project Manager for the *AGA FERC Manual*. Ms. Brennan's management of the *AGA FERC Manual* is of incalculable value.

The appearance of this volume reflects the original design work of Katie Abbott and Gilbert Rios, and has been refreshed and updated by Jim Van Meer, Founder & Chief Creative Officer of Thinkpoint Creative. The cover of this volume was created by Marina Bell of Van Ness Feldman.

The Ninth Edition of the *FERC Manual* was made possible by the support and participation of the Sponsoring Members of the AGA, the AGA Staff Executives and their colleagues.

The views, findings, conclusions, and recommendations expressed in the *FERC Manual* do not necessarily represent those of the AGA or the Sponsoring Members. The Sponsoring Members and AGA Staff Executives are identified immediately below.
