# American National Standard

Approval of an American National Standard requires review by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgement of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made towards their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

**CAUTION NOTICE:** This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

**Foreword** (This foreword is not part of American National Standard ANSI B71.3-2005.)

The standard is a revision of American National Standard for Snow throwers - Safety specifications, ANSI/OPEI B71.3 -1995. The present revision was prepared by the B71.3 Committee on Snow Throwers as part of OPEI's continuing work on standards.

The principal purpose of this revision was to update the scope, to include commercial turf machine attachments, address hand-in-chute accidents, and eliminate some tests that are not relevant.

Consensus for this standard was achieved by use of the Canvass Procedures.

Suggestions for improvement of this standard will be welcome. They should be sent to the Outdoor Power Equipment Institute, Inc., 341 South Patrick Street, Alexandria, VA 22314.

The following organizations and individuals, recognized as having an interest in the standardization of safety requirements for snow throwers, were contacted prior to the approval of this revision of the standard. Inclusion in this list does not necessarily imply that the organization concurred with the submittal of the proposed standard to ANSI.

American Consulting and Testing, Inc.

American Honda Motor Company, Inc.

American Society of Agricultural Engineers

Ariens Company

Consumer Product Safety Commission

Dr. Cathleen A. Godzik, MD

Lombard Technical Consulting, Inc.

MTD Products, Inc.

SGS U.S. Testing Co., Inc.

Southland Engineering Systems

Texas Technical University, Grounds Maintenance

The Toro Company

Underwriters Laboratories, Inc.

## American National Standard

# for Snow Throwers – Safety Specifications

## Part I: General

### 1 Scope

The specifications in this standard apply to (a) walk-behind power snow throwers, (b) ride-on power snow throwers, (c) lawn ride-on tractors with snow thrower attachments, (d) lawn and garden tractors with snow thrower attachments, and (e) lever-steer ride-on machines with snow thrower attachments. These specifications are not intended to apply to hand-held snow throwers nor to airport, highway, and agricultural types of snow removal machines and equipment.

### 2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this American National Standard. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this American National Standard are encouraged to investigate the possibility of applying the most recent editions of the standards indicated below.
