American National Standard

For Roadway and Area Lighting Equipment— Tunnel and Underpass Lighting Luminaires

Approved July 25, 2005

Secretariat: National Electrical Manufacturers Association

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. An American National Standard is intended as a guide to aid the manufacturer, the consumer, and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard. American National Standards are subject to periodic review and users are cautioned to obtain the latest editions.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of approval. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

DISCLAIMER: The standards or guidelines presented in a NEMA standards publication are considered technically sound at the time they are approved for publication. They are not a substitute for a product seller's or user's own judgment with respect to the particular product referenced in the standard or guideline, and NEMA does not undertake to guarantee the performance of any individual manufacturer's products by virtue of this standard or guide. Thus, NEMA expressly disclaims any responsibility for damages arising from the use, application, or reliance by others on the information contained in these standards or guidelines.

1 Scope

This standard covers luminaires used for illuminating roadway tunnels and underpasses. The requirements in this standard are limited to general attributes of tunnel luminaires due to the wide variety of designs possible.

2 Normative references

This standard incorporates, by undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text, and the publications are listed below. For undated references, the latest edition of the publication referred to applies (including amendments).

ANSI C81.61-1996, *American National Standard for Electrical Lamp Bases*.

ANSI C82.1-1997, *American National Standard Specifications for Fluorescent Ballasts* (including supplements).

ANSI C82.4-2002, *American National Standard Ballasts for High-Intensity Discharge and Low-Pressure Sodium Lamps (Multiple-support Type)*.

ANSI C136.2-2004, *American National Standard for Roadway and Area Lighting Equipment—Luminaire Voltage Classification*.

ANSI C136.11-1995, *American National Standard for Roadway and Area Lighting Equipment—Multiple Socket*.

ANSI C136.15-2004, *American National Standard for Roadway and Area Lighting Equipment—High-Intensity Discharge and Low-pressure Sodium Lamps in Luminaires—Field Identification*.

ANSI C136.31-2001, *American National Standard for Roadway and Area Lighting Equipment—Luminaire Vibration*.

ASTM B117-94, *Test Method of Salt Spray (Fog) Testing*.
