

Monolithic Refractories: Installation and Dryout

API TECHNICAL REPORT 980
FIRST EDITION, APRIL 2018

AMERICAN PETROLEUM INSTITUTE

Special Notes

API publications necessarily address problems of a general nature. With respect to particular circumstances, local, state, and federal laws and regulations should be reviewed.

Neither API nor any of API's employees, subcontractors, consultants, committees, or other assignees make any warranty or representation, either express or implied, with respect to the accuracy, completeness, or usefulness of the information contained herein, or assume any liability or responsibility for any use, or the results of such use, of any information or process disclosed in this publication. Neither API nor any of API's employees, subcontractors, consultants, or other assignees represent that use of this publication would not infringe upon privately owned rights.

API publications may be used by anyone desiring to do so. Every effort has been made by the Institute to assure the accuracy and reliability of the data contained in them; however, the Institute makes no representation, warranty, or guarantee in connection with this publication and hereby expressly disclaims any liability or responsibility for loss or damage resulting from its use or for the violation of any authorities having jurisdiction with which this publication may conflict.

API publications are published to facilitate the broad availability of proven, sound engineering and operating practices. These publications are not intended to obviate the need for applying sound engineering judgment regarding when and where these publications should be utilized. The formulation and publication of API publications is not intended in any way to inhibit anyone from using any other practices.

Any manufacturer marking equipment or materials in conformance with the marking requirements of an API standard is solely responsible for complying with all the applicable requirements of that standard. API does not represent, warrant, or guarantee that such products do in fact conform to the applicable API standard.

Foreword

Nothing contained in any API publication is to be construed as granting any right, by implication or otherwise, for the manufacture, sale, or use of any method, apparatus, or product covered by letters patent. Neither should anything contained in the publication be construed as insuring anyone against liability for infringement of letters patent.

This document was produced under API standardization procedures that ensure appropriate notification and participation in the developmental process and is designated as an API standard. Questions concerning the interpretation of the content of this publication or comments and questions concerning the procedures under which this publication was developed should be directed in writing to the Director of Standards, American Petroleum Institute, 1220 L Street, NW, Washington, DC 20005. Requests for permission to reproduce or translate all or any part of the material published herein should also be addressed to the director.

Generally, API standards are reviewed and revised, reaffirmed, or withdrawn at least every five years. A one-time extension of up to two years may be added to this review cycle. Status of the publication can be ascertained from the API Standards Department, telephone (202) 682-8000. A catalog of API publications and materials is published annually by API, 1220 L Street, NW, Washington, DC 20005.

Suggested revisions are invited and should be submitted to the Standards Department, API, 1220 L Street, NW, Washington, DC 20005, standards@api.org.

Contents

	Page
1 Scope	1
2 Referenced Documents	1
3 Terms and Definitions	2
4 Installation	7
4.1 Introduction	7
4.2 Refractory Concrete	7
4.3 Plastic Refractories	14
5 Construction Details for Refractory Concrete	29
5.1 Introduction	29
5.2 Support Structure	29
5.3 Forms	30
5.4 Anchors	30
5.5 Rebar and Metal Embedment	38
5.6 Joints	38
6 Curing, Drying, and Firing	38
6.1 General Drying/Firing Considerations	38
6.2 Modes of Drying/Firing	40
6.3 Refractory Concretes	40
6.4 Plastics and Ramming Mixes	44
7 Repair	48
7.1 Introduction	48
7.2 Failure Mechanisms	48
7.3 Surface Preparation	49
7.4 Anchoring and Bonding	50
7.5 Repair Materials	50
7.6 Repair Techniques	51
Bibliography	55

Figures

1 Hot Modulus Versus the Amount of Mixing Water for a Fireclay Castable with a Low-purity Cement	9
2 Flexural Strength of a Tabular Alumina, High-purity Cement Castable	10
3 Typical Hand-head Reciprocating Rammer	18
4 Short-handled Trimming Spade	18
5 Transmission of Force by the Rammer	19
6 Trimming a Plastic Refractory	24
7 Construction Joints Being Added to Installed Plastic Refractory Lining	25
8 Refractory Construction for Three-zone Pusher Furnace	27
9 Refractory Construction for Roof Anchor Design	27
10 Refractory Construction for Roof Section in Reheat Furnace (1 in. = 25.4 mm)	28
11 Refractory Construction for Typical Burner Port (1 in. = 25.4 mm)	29
12 Typical V-clip Anchors	31
13 Typical Anchor Arrangement for V-clips	32
14 Metal Roof Anchors	33

Contents

	Page
15 Flexible Rotary Kiln Anchor	33
16 Wall Anchors for Monolithic Construction	35
17 Refractory Roof Anchors	36
18 Typical Wall Seat Attachment	37
19 Hydration Reaction Products of Calcium Aluminates	41
20 Graph Showing Maximum Drying Rate for Phosphoric Bonded Refractories Occurs at Approximately 174 °F (80 °C)	47
