#### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at [www.standards.com.au](http://www.standards.com.au) and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.com.au](mailto:mail@standards.com.au), or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

## PREFACE

This Standard was prepared by the Standards Australia Committee CE-002, Railway Track Materials, to supersede AS 1085.10—1995, *Railway permanent way material*, Part 10: *Rail anchors*.

The objective of this Standard is to provide tests for standard performance requirements which manufacturers' products must satisfy, and to permit flexibility in both product design and material.

Changes to the previous edition are as follows:

- (a) Change of title of the AS 1085 series (previously *Railway permanent way material*).
- (b) The referenced documents list has been revised.
- (c) Reference to withdrawn Standards AS 1213 and K1 have been removed.
- (d) The most recent version of the informative Appendix 'Means of demonstrating compliance with this Standard' has been included.

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.

## STANDARDS AUSTRALIA

**Australian Standard  
Railway track material****Part 10: Rail anchors****1 SCOPE**

This Standard sets out the requirements for one-piece rail anchors for application to steel rails rolled in accordance with AS 1085.1. Dimensions and tolerances are not specified.

## NOTES:

- 1 The specified requirements may also be relevant for rail sizes not currently covered by this Standard.
- 2 Dimensional tolerances should be agreed between the purchaser and the manufacturer.
- 3 It is essential that the purchaser supply the manufacturer with certain information when enquiring about, or ordering, rail anchors to this Standard. Purchasing guidelines are given in Appendix A.
- 4 Alternative means for demonstrating compliance with this Standard are given in Appendix B.

**2 REFERENCED DOCUMENTS**

The following documents are referred to in this Standard.

## AS

- |        |  |
|--------|--|
| 1085   | Railway track material   |
| 1085.1 | Part 1: Steel rails  |
| 1199   | Sampling procedures and tables for inspection by attributes                  |

| HB 18.28 | Guide 28—General rules for a model third-party certification scheme for products |
|----------|--|

**3 DESIGNATION**

Anchor shall be designated according to the nominal rail size.

*Example:*

Rail anchors to AS 1085.10 for 50 kg rail.
