

Australian Standard™

Railway track material

Part 8: Dogspikes

Currently in preview, click buy full version

This Australian Standard was prepared by Committee CE-002, Railway Track Materials. It was approved on behalf of the Council of Standards Australia on 14 June 2002 and published on 1 August 2002.

The following are represented on Committee CE-002:

Australasian Railway Association
Australian Chamber of Commerce and Industry
Australian Industry Group
Bureau of Steel Manufacturers of Australia
Rail Track Association Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee CE-002, Railway Track Materials, to supersede AS 1085.8—1988, *Railway permanent way material, Part 8: Dogspikes*.

The objective of this Standard is to provide designers and manufacturers with requirements for dogspikes for use with steel rails.

Changes to the previous edition are as follows:

- (a) Changes already published in Amendment number 1 to the 1995 edition.
- (b) Change of title of the AS 1085 series (previously *Railway permanent way material*).
- (c) Reference to withdrawn Standards AS 1213 and K1 have been removed.
- (d) The referenced documents list has been revised.
- (e) The most recent version of the informative Appendix 'Means of demonstrating compliance with this Standard' has been included.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

STANDARDS AUSTRALIA

**Australian Standard
Railway track material****Part 8: Dogspikes****1 SCOPE**

This Standard sets out the requirements for 16 mm and 19 mm steel dogspikes with square shanks and 22 mm diameter round shank steel dogspikes for use with the steel rails specified in AS 1085.1.

NOTES:

- 1 Purchasing guidelines are given in Appendix A.
- 2 Means for demonstrating compliance with this Standard are given in Appendix B.

2 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

1085	Railway track material
1085.1	Part 1: Steel rails
1199	Sampling procedures and tables for inspection by attributes
1399	Guide to AS 1199—Sampling procedures and tables for inspection by attributes
1442	Carbon steels and carbon manganese steels—Hot-rolled bars and semi-finished products
2706	Numerical values—Rounding and interpretation of limiting values

AS/NZS

1050	Methods for the analysis of iron and steel (all Methods)
ISO 9001	Quality management systems—Requirements
ISO 9004	Quality management systems—Guidelines for performance improvements

SAI

HB 18	Guidelines for third-party certification and accreditation
HB 18.28	Guide 28—General rules for a model third-party certification scheme for products

3 CHEMICAL COMPOSITION

Steel used for the manufacture of dogspikes shall comply with the requirements of AS 1442, Grade U3, or Grade U5, Condition B or F.

4 METHOD OF MANUFACTURE

Dogspikes shall be produced by hot or cold forging, with or without a second heat or post-forging heat treatment, and with or without secondary machining.
