

AS 1100.201—1992

Australian Standard[®]

Technical drawing

**Part 201: Mechanical engineering
drawing**

This Australian Standard was prepared by Committee ME/72, Technical Drawing. It was approved on behalf of the Council of Standards Australia on 25 August 1992 and published on 16 November 1992.

The following interests are represented on Committee ME/72:

Association of Consulting Engineers Australia
Australian Chamber of Commerce
Bureau of Steel Manufacturers of Australia
Confederation of Australian Industry
Department of Administrative Services
Department of Defence
Department of Employment and Technical and Further Education, South Australia
Institute of Draftsmen, Australia
Institute of Industrial Arts
Institution of Engineers, Australia
Master Builders—Construction and Housing Association Australia
N.S.W. Technical and Further Education Commission
Public Works Department, N.S.W.
University of New South Wales
University of Queensland

Additional interests participating in preparation of Standard:

University of Technology, Sydney

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up-to-date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Standards Australia Committee on Technical Drawing to supersede AS 1100.201–1984. AS 1100.201 was a revision and amalgamation of AS 1100 Parts 9 to 11 all published in 1974 and AS 1100 Part 12 published in 1979.

AS 1100 Parts 9 to 12 ran concurrently with AS CZ1.1 of 1976 which was withdrawn in 1982. AS CZ1.1 was a revision of AS CZ1 which was first published in 1941 with further editions published in 1944, 1946, 1951, 1966 and 1973. The 1966 edition also superseded AS Z8 of 1956 (endorsement of BS 308.2—1953 without amendment).

The AS CZ1 Standards were endorsements of The Institution of Engineers, Australia publications entitled, *Engineering Drawing Practice*. The document from which these publications originated, was published by the Institution under the title, *Recommended Engineering Drawing Practice* but this was not endorsed by this Association.

This Standard is one of a series dealing with technical drawing, the other Standards in the series being as follows:

- Part 101: *General principles*
- Part 301: *Architectural drawing*
- Part 401: *Engineering survey and engineering survey design drawing*
- Part 501: *Structural engineering drawing*

In the preparation of this Standard, the committee took account of change in Australian technical drawing practice and recommendations of the International Organization for Standardization. Also considered were the equivalent British and American Standards.

In its preparation, many changes in the layout of the text and figures have taken place resulting in greater consistency and improved ease of use of the document.

New material introduced in this edition includes the simplified representation of pipelines, centre holes, seals and a guide to general tolerancing of castings.

The section on dimensioning and tolerancing which previously was in this part of the Standard is now contained in Part 101. Reference to Part 101 is required for the source and definition of some of the contents of this part.

This Standard is in agreement with the following International Standards:

ISO	
128	<i>Technical drawings — General principles of presentation</i>
1302	<i>Technical drawings — Method of indicating surface texture on drawings</i>
2162	<i>Technical drawings — Representation of springs</i>
2203	<i>Technical drawings — Conventional representation of gears</i>
2768	<i>General tolerances</i>
2768–1	<i>Part 1: Tolerances for linear and angular dimensions without individual tolerance indications</i>
2768–2	<i>Part 2: Geometrical tolerances for features without individual tolerance indications</i>
6410	<i>Technical drawings — Conventional representation of threaded parts</i>
6411	<i>Technical drawings — Simplified representation of centre holes</i>
6412	<i>Technical drawings — Simplified representation of pipelines</i>
6412–1	<i>Part 1: General rules and orthogonal representation</i>
6412–2	<i>Part 2: Isometric projection</i>
6413	<i>Technical drawings — Representation of splines and serrations</i>
8062	<i>Castings — System of dimensional tolerances</i>
8826	<i>Technical drawings — Rolling bearings</i>
8826–1	<i>Part 1: General simplified representation</i>
9222	<i>Technical drawings — Seals for dynamic application</i>
9222–1	<i>Part 1: General simplified representation</i>
9222–2	<i>Part 2: Detailed simplified representation</i>

4.1	WELDING	22
-----	---------	----

SECTION 5 CENTRE HOLES

5.1	GENERAL	23
5.2	SYMBOLS	23
5.3	SYMBOLIC REPRESENTATION	23
5.4	DESIGNATION OF CENTRE HOLES	23

SECTION 6 SIMPLIFIED REPRESENTATION OF PIPELINES

6.1	SCOPE OF SECTION	25
6.2	SYMBOLS	25
6.3	ORTHOGONAL PROJECTION METHOD	25
6.4	ISOMETRIC PROJECTION METHOD	28

SECTION 7 SPRINGS

7.1	INFORMATION ON DRAWING	37
7.2	DRAWINGS	37
7.3	TYPES OF SPRINGS	37
7.4	CONVENTIONAL REPRESENTATION OF SPRINGS	40

SECTION 8 GEARS

8.1	INFORMATION ON DRAWING	44
8.2	DRAWINGS	44
8.3	TYPES OF GEARS	44
8.4	CONVENTIONAL REPRESENTATION OF GEARS	45

SECTION 9 SPLINES

9.1	SYMBOLS	52
9.2	DESIGNATION	52
9.3	TRUE REPRESENTATION	52
9.4	CONVENTIONAL REPRESENTATION OF SPLINES	54

SECTION 10 ROLLING ELEMENT BEARINGS

10.1	CONVENTIONAL REPRESENTATION	56
------	-----------------------------------	----

SECTION 11 SEALS

11.1	GENERAL CONVENTIONAL REPRESENTATION	57
11.2	ELEMENTS OF DETAILED CONVENTIONAL REPRESENTATION OF SEALS	57
11.3	DETAILED CONVENTIONAL REPRESENTATION	57
11.4	EXAMPLES	57

SECTION 12 KNURLING

12.1	CONVENTIONAL REPRESENTATION OF KNURLING	64
------	---	----

APPENDICES

A	GUIDE TO GENERAL TOLERANCING OF MACHINED COMPONENTS ..	65
B	GUIDE TO THE GENERAL TOLERANCING OF CASTINGS	69
C	GENERAL APPLICATION OF R_a VALUES	74
D	TYPICAL ROUGHNESS VALUES OBTAINED WITH ORDINARY MATERIALS AND COMMON PRODUCTION PROCESSES	75

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified. The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

STANDARDS AUSTRALIA

Australian Standard
Technical drawing

Part 201: Mechanical engineering drawing

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE This Standard sets out requirements and recommendations for mechanical engineering drawing practice. It is complementary to [AS 1100.101](#).

The Standard provides information on surface texture and welding, and the simplified representation of pipelines. Details are also provided on various mechanical features and parts used on mechanical drawings.

Appendices provide guidance on the tolerancing of machined components and castings.

1.2 APPLICATION The principles given in this Standard are intended for adoption by engineers, draftspersons, and workshop personnel in the preparation and interpretation of mechanical engineering drawings.

1.3 REFERENCED DOCUMENTS The following documents are referred to in this Standard:

AS

1100	Technical drawing
1100.101	Part 101: General principles
1100.301	Part 301: Architectural drawing
1100.401	Part 401: Engineering survey and engineering survey design drawing
1100.501	Part 501: Structural engineering drawing

1101	Graphical symbols for general engineering
1101.1	Part 1: Hydraulic and pneumatic systems
1101.2	Part 2: Ventilation systems in ships
1101.3	Part 3: Welding and non-destructive examination
1101.4	Part 4: Machine elements
1101.5	Part 5: Piping, ducting and mechanical services for buildings

[1913](#) Centre drills

[2075](#) Glossary of terms and notation for gears

[2536](#) Surface texture

ISO

6412 Technical drawings — Simplified representation of pipelines

1.4 TERMINOLOGY For the purpose of this Standard, the terminology given in [AS 1100.101](#) applies.

1.5 ABBREVIATIONS Abbreviations for all technical drawings are given in [AS 1100.101](#). Those related only to mechanical engineering drawing are given in Table 1.1 and are decoded in Table 1.2.

Abbreviations should be used only where brevity and conservation of space make it necessary and then only when their meanings are unquestionably clear to the intended reader. **WHEN IN DOUBT SPELL IT OUT.**

NOTES:

1. An abbreviation may or may not be recognized internationally.

The abbreviations given in Tables 1.1 and 1.2 are not exhaustive. Other abbreviations and other meanings for those given may be used, provided that —

- (a) their common usage in particular fields is clear;
- (b) the meaning is clarified on the drawing; or
- (c) the meaning is clarified in a reference document.
