AS 1172.5:2019

This Australian Standard® was prepared by WS-003, Sanitary Plumbing Fixtures. It was approved on behalf of the Council of Standards Australia on 6 December 2019.

This Standard was published on 20 December 2019.

The following are represented on Committee WS-003:

- Association of Accredited Certification Bodies
- Australian Building Codes Board
- Australian Chamber of Commerce and Industry
- Australian Industry Group
- CSIRO
- Department of Agriculture and Water Resources (Australian Government)
- Plumbing Products Industry Group
- The Institute of Plumbing Australia

This Standard was issued in draft form for comment as DR AS 2023:2018.

## Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee WS-003, Sanitary Plumbing Fixtures, to supersede AS/NZS 2023:1995.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Standard is to provide manufacturers, importers, suppliers and users with requirements for baths for ablutionary purposes, including built-in, inset, island, and freestanding styles.

The main change in this revision is the provision of performance requirements for baths with overflows. These requirements include the criteria to prevent baths from overflowing.

Main technical changes to the 1995 edition are as follows:

- (a) Inclusion of overflow performance requirements for baths.
- (b) Inclusion of revised flashing requirements for baths.
- (c) Inclusion of product conformity requirements (see [Appendix A](#)).

The terms “normative” and “informative” are used in Standards to define the application of the appendices to which they apply. A “normative” appendix is an integral part of a Standard, whereas an “informative” appendix is only for information and guidance.

# Australian Standard®

## Sanitary plumbing products

### Part 5: Baths for ablutionary purposes

#### Section 1 Scope and general

##### 1.1 Scope

This Standard specifies requirements for baths for ablutionary purposes, including built-in, inset, island, and freestanding styles. Bath with overflows are included.

##### 1.2 Application

Baths shall conform to [Section 1](#) and the specific requirements of [Sections 2](#) to [6](#) (appropriate to bath type) as follows:

[Section 2](#), Cast iron vitreous enamelled baths.

[Section 3](#), Pressed steel vitreous enamelled baths.

[Section 4](#), Ceramic baths.

[Section 5](#), Stainless steel baths.

[Section 6](#), Plastic and composite materials baths.

##### 1.3 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document:

AS 1589, *Copper and copper alloy waste fittings*
