SUPERSEDED BY:
AS 1271—1997

Australian Standard®

Safety valves, other valves, liquid level gauges, and other fittings for boilers and unfired pressure vessels

Currently in preview, click to buy full version

This Australian Standard was prepared by Committee ME/1, Boilers and Unfired Pressure Vessels. It was approved on behalf of the Council of Standards Australia on 3 July 1990 and published on 15 October 1990.

The following interests are represented on Committee ME/1:

A.C.T. Administration
Aluminium Development Council
Australian Compressed Air and Mining Equipment Institute
Australian Institute for Non-destructive Testing
Australian Institute of Energy
Australian Institute of Petroleum
Australian Liquefied Petroleum Gas Association
Australian Valve Manufacturers Association
Boiler and Pressure Vessel Manufacturers Association of Australia
Bureau of Steel Manufacturers of Australia
Confederation of Australian Industry
Department of Defence
Department of Employment, Vocational Education, Training and Industrial Relations, Qld
Department of Labour, S.A.
Department of Labour, Vic.
Department of Labour and Industry, Tas
Department of Occupational Health, Safety and Welfare, W.A.
Electricity Supply Association of Australia
Institute of Metals and Materials Australia
Institution of Engineers, Australia
Insurance Council of Australia
Metal Trades Industry Association of Australia
National Association of Testing Authorities Australia
Railways of Australia Committee
Society of Mechanical Engineers of Australasia
Sugar Research Institute
Welding Technology Institute of Australia
Work Health Authority, N.T.
Work Cover Authority, N.S.W.

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up-to-date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 88117.

Australian Standard®

**Safety valves, other valves, liquid
level gauges, and other fittings for
boilers and unfired pressure vessels**

First published as AS B190—1964.
Revised and redesignated AS 1271—1973.
Second edition 1982.
Third edition 1990.

PREFACE

This Standard was prepared by the Standards Australia Committee on Boilers and Unfired Pressure Vessels, to supersede AS 1271—1982, *Valves, water gauges and other fittings for boilers and unfired pressure vessels*.

This Standard forms part of the SAA Boiler Code, which is referenced as AS 1200 and is referred to in Statutory Authority regulations within Australia. The SAA Boiler Code covers requirements for water-tube, fire-tube, shell and miscellaneous boilers, unfired pressure vessels, piping, certification of welders, and related matters. Revisions and additions approved by the committee, have been included in this edition and the changes include editorial modifications to align with Standards Australia practice. It also incorporates Ruling PV/E 8008/22, Small Safety Valves.

The Standard incorporates revisions to ISO 4126, *Safety valves—General requirements*, where the committee considered these to be appropriate.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the Head Office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

STANDARDS AUSTRALIA

Australian Standard

Safety valves, other valves, liquid level gauges, and other fittings for boilers and unfired pressure vessels

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE This Standard specifies requirements for the design, construction and testing of safety valves, liquid relief valves, liquid level gauges, blowdown valves, and other fittings for use on boilers and unfired pressure vessels, and their associated piping.

It does not deal with the selection, operation, or application of valves and fittings, as these are dealt with in the Standard applying to the equipment, to which the valves and fittings are to be connected, e.g. AS 1210, nor does it include requirements relating to safety fittings of a class or kind that are already the subject of a relevant Standard, e.g.—

- (a) Bourdon tube pressure and vacuum gauges AS 1349;
- (b) bursting discs AS 1358;
- (c) fusible plugs for boilers AS 1732; and
- (d) bursting discs and bursting disc devices ISO 6718.

1.2 APPLICATION Each fitting shall comply with the requirements of Section 2, and with the requirements of the following Sections as appropriate:

- (a) Safety and relief valves Section 3.
- (b) Liquid relief valves Section 4.
- (c) Liquid level gauges Section 5.

1.3 REFERENCED DOCUMENTS The following documents are referred to in this Standard:

AS	
1135	SAA Non-ferrous Pressure Piping Code
1200	SAA Boiler Code
1210	SAA Unfired Pressure Vessels Code
1349	Bourdon tube pressure and vacuum gauges
1358	Bursting discs and bursting disc devices—Guide to applications, selection, and installation
1722	Pipe threads of Whitworth form
1722.1	Part 1: Sealing pipe threads
1732	Fusible plugs for boilers
2129	Flanges for pipe valves and fittings
2593	Boilers—Unfired
CB15	SAA Pipe Welding Code
CB15.3—1967	Part 2: Arc welding of ferritic steel piping
ISO	
6718	Bursting discs and bursting disc devices
ANSI	
B16.5	Steel pipe flanges and flange fittings
B16.104	Control valve seat leakage
BS	
1560	Specification for steel pipe flanges (nominal sizes 1/2 in to 24 in) for the petroleum industry Part 2: Metric dimensions
1726	Guide to the design and specification of coil springs Part 1: Guide for the design of helical compression springs
3463	Specification for observation and gauge glasses for pressure vessels
3799	Specification for steel pipe fittings, screwed and socket-welding for the petroleum industry
API	
527	Commercial seat tightness of safety relief valves with metal to metal seats
598	Valve inspection and test
MSS	
SP61	Hydrostatic testing of steel valves
