

Australian Standard[®]

**Cranes (including hoists and
winches)**

**Part 17: Design and construction
of workboxes**

This Australian Standard was prepared by Committee ME/5, Cranes. It was approved on behalf of the Council of Standards Australia on 25 October 1995 and published on 5 March 1996.

The following interests are represented on Committee ME/5:

Association of Consulting Engineers, Australia
Australian Chamber of Manufactures
Australian Institute of Building
Bureau of Steel Manufacturers of Australia
Construction and Mining Equipment Association of Australia
Crane Industry Council of Australia
Department of Defence (Commonwealth)
Department of Employment, Vocational Education, Training and Industrial Relations, Qld
Department of Industrial Affairs, S.A.
Department of Occupational Health, Safety and Welfare, N.S.W.
Health and Safety Organisation, Vic.
Institution of Engineers, Australia
Lift Manufacturers Association of Australia
Metal Trades Industry Association of Australia
Railways of Australia Committee
Tasmania—Development and Resources
Telstra, Australia
University of New South Wales
WorkCover, N.S.W.
Work Health Australia, N.T.

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subjected to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards. Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 94409.

RECONFIRMATION NOTICE

Technical Committee ME-005 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 1 November 2016.

The following are represented on Technical Committee ME-005:

Australian Chamber of Commerce and Industry
Australian Industry Group
Australian Institute for Non-Destructive Testing
Bureau of Steel Manufacturers of Australia
Concrete Pumping Association of Australia
Crane Association of New Zealand
Crane Industry Council of Australia
Department of Industry, Skills and Regional Development (NSW)
Department of Justice and Attorney General (QLD)
Electricity Engineers Association (New Zealand)
Engineers Australia
Institution of Professional Engineers New Zealand
SafeWork NSW
Transport for NSW
Worksafe Division, Department of Commerce, Western Australia
Worksafe New Zealand
Worksafe Victoria

Australian Standard[®]

Cranes (including hoists and winches)

Part 17: Design and construction of workboxes

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME/5 on Cranes as AS 1418.17—1995, *Cranes (including hoists and winches)*, Part 17: *Design and construction of workboxes*. It has been introduced to fill a need in the workplace.

This Standard is a result of a consensus among representatives on the Joint Committee to produce it as an Australian Standard.

This Standard has been introduced in recognition that the practices involved in using workboxes are often inherently dangerous and this Standard sets out to expressly avoid failure of the workbox structure. Whilst the factors of safety introduced in the design of workboxes are of a nominal magnitude, the designer has been provided with the opportunity to increase the factors of safety in conformance with the intended future use of the workbox.

The introduction of this Standard may not be taken as recommending the use of workboxes and it is purposely restrictive to limit their application.

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

Cranes (including hoists and winches)

Part 17: Design and construction of workboxes

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE This Standard specifies the requirements relating to the design and construction of workboxes generally having one working deck level, to accommodate a maximum of three persons. Refer to [AS 2550.1](#) for the requirements for the safe use of workboxes.

NOTE: Typical workbox details are given in Figures A1 and A2 of Appendix A.

1.2 APPLICATION

1.2.1 General This Standard shall apply to workboxes used for conveying personnel with tools and work material to a work location by crane.

NOTE: Workboxes should only be used where other means of access are unsafe or impracticable.

1.2.2 Limitations Workboxes shall be designed only for use of personnel with the minimum tools and materials required to perform the necessary work.

NOTES:

- 1 Workboxes should not be used as transportation for personnel or bulk materials or for the removal of debris or scrap.
- 2 Workboxes intended to accommodate more than three people should be designed from first principles.

1.2.3 Regulations Workboxes should be in conformance with the statutory regulations that are applicable at the date of design registration.

1.3 REFERENCED DOCUMENTS The following documents are referred to in this Standard:

AS

- | | |
|------------------------|--|
| 1318 | Use of colour for the marking of physical hazards and the identification of certain equipment in industry (known as the SAA Industrial Safety Colour Code) |
| 1418 | Cranes (including hoists and winches) |
