

Australian Standard[®]

Cranes (including hoists and winches)

Part 2: Serial hoists and winches

This Australian Standard was prepared by Committee ME/5, Cranes. It was approved on behalf of the Council of Standards Australia on 22 November 1996 and published on 5 January 1997.

The following interests are represented on Committee ME/5:

Australian Chamber of Commerce and Industry
Australian Elevator Association
Australian Institute of Building
Bureau of Steel Manufacturers of Australia
Construction and Mining Equipment Association of Australia
Crane Industry Council of Australia
Department of Industrial Affairs, S.A.
Department of Defence
Department of Training and Industrial Relations, Qld
Institution of Engineers of Australia
Metal Trades Industry Association of Australia
The Association of Consulting Engineers, Australia
University of New South Wales
Victorian WorkCover Authority
Work Health Authority, N.T.
WorkCover New South Wales
Workplace Standards Authority, Tas.
WorkSafe, W.A.

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 95311.

Australian Standard[®]

Cranes (including hoists and winches)

Part 2: Serial hoists and winches

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME/5 on Cranes, to supersede AS 1418.2—1990.

It is a consensus among representatives of this Committee that this document be produced as an Australian Standard only.

This Standard gives guidance to manufacturers on the minimum engineering requirements for the design of various types of serial hoists and winches.

This edition is a revision of the 1990 edition and incorporates the following changes:

- (a) Update of referenced documents.
- (b) Editorial changes in pursuance of Standards Australia editorial style.
- (c) Cognizance of ISO recommendations.
- (d) Restriction to the type of hoist permitted for carrying personnel.
- (e) Requirements for scaffolding hoists brought in line with European requirements.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

STANDARDS AUSTRALIA

Australian Standard

Cranes (including hoists and winches)

Part 2: Serial hoists and winches

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE This Standard specifies requirements for serial hoists and winches.

It is complementary to [AS 1418.1](#), but the requirements given herein take precedence over corresponding requirements in that Standard.

The requirements for the safe use of serial hoists and winches are given in [AS 2550.1](#).

1.2 NEW DESIGN AND INNOVATIONS This Standard does not preclude the use of novel materials, designs, methods of assembly, procedures and the like which do not comply with a specific requirement of the Standard, or are not mentioned in it, but which can be shown to give equivalent or superior results to those specified.

1.3 APPLICATION Serial hoists and winches shall comply with Section 1 and with the following Sections, as applicable:

- (a) Section 2 Manually operated chain hoists (chain blocks and lever hoists).
- (b) Section 3 Power-operated chain hoists (chain blocks).
- (c) Section 4 Power-operated wire rope hoists.
- (d) Section 5 Scaffolding hoists.
- (e) Section 6 Creeper winches.
- (f) Section 7 Manually operated drum winches.
- (g) Section 8 Power-operated drum winches.
- (h) Section 9 Trolley.

Any hoist which is used to support personnel shall incorporate the design requirements of Section 5.

1.4 REFERENCED DOCUMENTS The following documents are referred to in this Standard:

AS	
1000	The International System of Units (SI) and its application
1418	Cranes (including hoists and winches)
1418.1	Part 1: General requirements
1532	Short pitch transmission precision roller chains and chain wheels
1831	Iron castings—Spheroidal or nodular graphite cast iron
2549	Cranes (including hoists and winches)—Glossary of terms
2550	Cranes—Safe use
2550.1	Part 1: General requirements
