

Australian Standard™

**Automatic fire detection and alarm
systems**

Part 15: Remote indicators

This Australian Standard was prepared by Committee FP-002, Fire Detection, Warning, Control and Intercom Systems. It was approved on behalf of the Council of Standards Australia on 29 April 2002 and published on 30 May 2002.

The following are represented on Committee FP-002:

Audio Engineering Society
Australasian Fire Authorities Council
Australian Building Codes Board
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Australian Industry Group
Australian Institute of Building Surveyors
Deafness Forum of Australia
Department of Defence
Fire Protection Association Australia
Institute of Security Executives
National Electrical and Communications Association
Property Council of Australia
Scientific Services Laboratory—A Business Unit of AGAL

Keep Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain the currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 01344.

PREFACE

This Standard was prepared by the Standards Australia Committee FP-002, Fire Detection, Warning, Control and Intercom Systems.

The objective of this Standard is to set down minimum requirements for remote indicators.

STANDARDS AUSTRALIA

Australian Standard
Automatic fire detection and alarm systems

Part 15: Remote indicators

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard specifies design, construction and functional requirements for remote indicators (RIs) for use with fire detection and alarm systems.

1.2 APPLICATION

The requirements of this Standard apply to RIs forming part of a fire detection, warning, control and intercom system installed in accordance with the relevant part of AS 1670, to remotely indicate the alarm state of the device to which it is connected.

Functional requirements for RIs are specified in Section 2. The mechanical and electrical requirements for the design and construction of RIs are specified in Section 3. In addition, requirements for assessment of compliance are specified in Section 5.

1.3 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

- | | |
|---------|---|
| 1670 | Automatic fire detection and alarm systems—System design, installation, and commissioning (all parts) |
| 1939 | Degrees of protection provided by enclosures for electrical equipment |
| 2362 | Automatic fire detection and alarm systems —Methods of test for actuating devices |
| 2362.25 | Part 25: Indicator visibility test |
| 2546 | Printed boards |
| 2546.3 | Part 3: Design and use |
| 2706 | Numerical values—Rounding and interpretation of limiting values |

AS/NZS

- | | |
|-------|---|
| 417 | Marking of electrical products to indicate compliance with regulations |
| 447.2 | Part 2: Specific requirements for electrical safety regulatory applications |
| 3100 | Approval and test specification—General requirements for electrical equipment |
