

Australian Standard[®]

Chain link fabric fencing

**Part 3: Tennis court fencing—
Private/Residential**

STANDARDS
Australia

This Australian Standard® was prepared by Committee CE-008, Chain Link Fabric Security Fences and Gates. It was approved on behalf of the Council of Standards Australia on 4 June 2010.

This Standard was published on 21 September 2010.

The following are represented on Committee CE-008:

- Australasian Wire Industry Association
 - Australian Chain Link Fencing Association
 - Australian Chamber of Commerce and Industry
 - Australian Industry Group
 - Master Builders Association
 - Temporary Fencing Association of Australia
 - Water Services Association of Australia
-

This Standard was issued in draft form for comment as Draft AS 1725.3.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee CE-008, Chain Link Fabric Security Fences and Gates.

The objective of this Standard is to establish minimum requirements for chain link fabric fence materials and workmanship for private residential tennis court fences, in order to ensure satisfactory service by the fence for the purchaser, and assist manufacturers and installation contractors by eliminating unnecessary minor variations in purchasers' requirements. Where alternatives are provided in this Standard, purchasers should nominate their preference.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

Statements expressed in mandatory terms in notes and footnotes to tables are deemed to be requirements of this Standard.

STANDARDS AUSTRALIA

Australian Standard Chain link fabric fencing

Part 3: Tennis court fencing—Private/Residential

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard specifies requirements for the construction of private and residential applications for tennis court fencing for a range of alternative types and design options.

It also includes requirements for wire coatings, pipe grades and tables.

NOTES:

- 1 AS 1725 Parts 1 to 5 fencing solutions are not deemed to be structures as defined in AS 4100, therefore, are not intended to comply with AS 1170, AS 4100 and AS/NZS 4600. However, in applications of high wind loading, crowd control and safety barriers, which can be considered a risk to public safety or deemed to be a building structure, the specifier is required to comply with AS 1170, AS 4100 and AS/NZS 4600.
- 2 Appendix A provides purchasing guidelines which will assist the purchasers to establish the private/residential tennis court fencing requirements suitable for their site application. Purchasers need to carefully consider, select and nominate their preference for each component.

1.2 APPLICATION

This Standard applies to tennis court fencing intended for residential and private use only, where player participation is generally lower than on commercial courts. The level of player participation and potential impact on chain link fabric, should be considered when selecting between heavy and light duty fabric.

1.3 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

- 1074 Steel tubes and tubulars for ordinary services
- 1170 Structural design actions
- 1725 Chain link fabric fencing
- 1725.1 Part 1: Security fences and gates—General requirements
- 1425 Coated steel wire fencing products for terrestrial, aquatic and general use
- 2700.5 Colour Standards for general purposes
- 3972 Portland and blended cements
- 4100 Steel Structures
- 4506 Metal finishing—Thermoset powder coatings

AS/NZS

- 1163 Structural steel hollow sections
- 2312 Guide to the protection of structural steel against atmospheric corrosion by the use of protective coatings
