

Australian Standard™

Household sinks

Currently in preview, click buy full version

This Australian Standard was prepared by Committee WS-003, Sanitary Plumbing Fixtures. It was approved on behalf of the Council of Standards Australia on 27 November 1998 and published on 5 February 1999.

The following interests are represented on Committee WS-003:

Australian Association of Certification Bodies
Australian Chamber of Commerce and Industry
Australian Chamber of Manufacturers
Brisbane Water
Department of Land and Water Conservation NSW
Housing Industry Association
Local Government New Zealand
South Australian Water Corporation
Water Corporation Western Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

Australian Standard™

Household sinks

Originated as SAA 49—1947
Previous edition AS 1756—1989
Third edition 1999.
First issued incorporating Amendment No. 1 (December 2001).

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee WS/3, Sanitary Plumbing Fixtures, to supersede AS 1756—1989.

This Standard incorporates Amendment No. 1 (December 2001). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

This Standard is the result of a consensus among representatives on the Joint Committee that it be produced as an Australian Standard.

The objective of this edition is to provide manufacturers with design, finish and material requirements for household sinks.

The term 'normative' has been used in this Standard to define the application of the appendix to which it applies. A normative Appendix is an integral part of a Standard.

STANDARDS AUSTRALIA

Australian Standard
Household sinks

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard specifies requirements for materials, construction, and finish of household sinks, with and without drainers, including inset type sinks and drainer bowls. Critical dimensions only are specified.

1.2 APPLICATION

Household sinks shall comply with Sections 1 to 6 as follows:

- (a) Section 2 Cast iron vitreous enamelled sinks
- (b) Section 3 Pressed steel vitreous enamelled sinks
- (c) Section 4 Vitreous china sinks
- (d) Section 5 Stainless steel sinks
- (e) Section 6 Plastics and composite materials sinks

1.3 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS	
1589	Copper and copper alloy waste fittings
1830	Iron castings—Grey cast iron
1976	Vitreous china recessed sanitary appliances
2219	Method of test for vitreous enamel coatings
2219.1.5	Part 1.5: Chemical tests—Determination of resistance of vitreous enamel coatings to citric acid at room temperature
2887	Plastic waste fittings
3558	Methods of testing plastics and composite materials sanitary plumbing fixtures
3558.2	Method 2: Determination of chemical and stain resistance
3558.3	Method 3: Determination of colour fastness
3558.4	Method 4: Determination of resistance to surface scratching
3558.5	Method 5: Determination of degradation by ultraviolet light
3558.6	Method 6: Visual examination of surface finish for defects
3558.19	Method 19: Determination of impact resistance of sinks
3558.20	Method 20: Determination of resistance to thermal shock of sinks
3558.21	Method 21: Determination of thermal expansion under load of sinks
3558.22	Method 22: Determination of thermal distortion of sinks
3558.23	Method 23: Determination of resistance to heat of the surface of sinks
3558.24	Method 24: Determination of resistance to hot liquids of the surface of sinks
