AS 1884:2021

This Australian Standard® was prepared by PL-015, Resilient Flooring. It was approved on behalf of the Council of Standards Australia on 4 January 2021.

This Standard was published on 5 February 2021.

The following are represented on Committee PL-015:

- AWTA Product Testing (Testing Interests Australia)
- Australian Flooring Industry Alliance
- Australian Industry Group
- Australian Institute of Building Surveyors
- Australian Resilient Floorcovering Association
- Building Designers Association of Australia
- Carpet Institute of Australia
- Cement Concrete & Aggregates Australia
- Floorcovering Institute of Australia
- Vinyl Council of Australia

This Standard was issued in draft form for comment as DR AS 1884:2020.

## Preface

This Standard was prepared by the Standards Australia Committee PL-015, Resilient Flooring, to supersede AS 1884 — 2012, *Floor coverings — Resilient sheet and tiles — Installation practices*.

The objective of this document is to provide minimum requirements for the installation and application of resilient coverings for Australian conditions to ensure that the installed product is fit for purpose.

Content in [Clause 5.9](#) and [Appendix G](#) has been used with permission from Dale Peterson.

The terms “normative” and “informative” are used in Standards to define the application of the appendices to which they apply. A “normative” appendix is an integral part of a Standard, whereas an “informative” appendix is only for information and guidance.

The inclusion of roles and responsibilities in AS 1884:2020 was approved by the Standards Development and Accreditation Committee (SDAC) on 2 May 2019, on a transitional basis of 5 years from the date of publication.

## Contents

<b>Preface</b> .....	<b>ii</b>
<b>Section 1 Scope and general</b> .....	<b>1</b>
1.1 Scope .....	1
1.2 Normative references .....	1
1.3 Terms and definitions .....	2
1.4 Materials .....	6
1.4.1 Resilient floor covering .....	6
1.4.2 Adhesive .....	6
1.4.3 Underlay and underlayment .....	7
<b>Section 2 Pre-installation requirements</b> .....	<b>8</b>
2.1 Site inspection .....	8
2.1.1 Pre-installation preparation .....	8
2.1.2 Subfloor information .....	8
2.1.3 Report by flooring contractor .....	8
2.2 Information .....	8
2.2.1 General .....	8
2.2.2 Commercial installations .....	9
2.2.3 Residential installations .....	10
<b>Section 3 Subfloors and underlays</b> .....	<b>11</b>
3.1 Concrete subfloors .....	11
3.1.1 Construction .....	11
3.1.2 Dryness .....	11
3.1.3 Surface pH .....	11
3.1.4 Surface quality .....	11
3.1.5 Surface preparation .....	11
3.2 Sand-cement Screed subfloors .....	12
3.3 Engineered screed subfloors .....	12
3.4 New concrete subfloors .....	12
3.4.1 General .....	12
3.4.2 Construction .....	12
3.4.3 Dryness .....	12
3.5 Existing concrete subfloors .....	13
3.5.1 General .....	13
3.5.2 Construction .....	13
3.5.3 Dryness .....	13
3.5.4 Surface .....	14
3.6 Timber, plywood, particleboard and fibre-cement sheet subfloors .....	14
3.6.1 New construction .....	14
3.6.2 Ventilation .....	15
3.6.3 Preparation of timber, plywood and particleboard subfloors .....	15
3.6.4 Installation of underlay for timber, plywood and particleboard subfloors .....	16
3.6.5 Plywood subfloors .....	17
3.6.6 Particleboard subfloors .....	18
3.6.7 Fibre-cement sheet subfloors .....	18
3.6.8 Existing coverings and finishes .....	19
<b>Section 4 General conditioning and installation procedures</b> .....	<b>20</b>
4.1 Conditioning of floor covering and subfloor .....	20
4.1.1 On-site storage and conditioning .....	20
4.1.2 Air-conditioned areas .....	20
4.1.3 Heated subfloors .....	20
4.1.4 Subfloors in cool rooms and cold stores .....	21
4.2 General installation procedures .....	21
4.3 Silica dust control .....	22

4.4	Cleaning and maintenance .....	23
<b>Section 5</b>	<b>Installation procedures for specific flooring types .....</b>	<b>24</b>
5.1	Resilient wall and floor sheet .....	24
5.1.1	General .....	24
5.1.2	Setout .....	24
5.1.3	Adhesive .....	24
5.1.4	Seaming .....	24
5.1.5	Coving .....	25
5.1.6	Completion .....	25
5.2	Wet area floor and wall resilient sheet .....	25
5.2.1	Floor resilient sheet .....	25
5.2.2	Wall resilient sheet .....	27
5.3	Linoleum .....	30
5.3.1	On site storage and conditioning .....	30
5.3.2	Adhesive .....	30
5.3.3	Setout .....	30
5.3.4	Installation .....	30
5.3.5	Seaming .....	31
5.3.6	Border coving .....	31
5.3.7	Completion .....	31
5.4	Rubber sheet and tiles .....	31
5.4.1	Conditioning .....	31
5.4.2	Adhesive .....	32
5.4.3	Tile setout .....	32
5.4.4	Sheet setout .....	32
5.4.5	Installation .....	32
5.4.6	Seaming .....	32
5.4.7	Completion .....	32
5.5	Vinyl composite tiles (VCT) .....	32
5.5.1	Conditioning .....	32
5.5.2	Adhesive .....	32
5.5.3	Setout .....	33
5.5.4	Installation .....	33
5.5.5	Completion .....	33
5.5.6	Protection .....	33
5.6	Luxury vinyl tile and plank (LVT, LVP) .....	33
5.6.1	Conditioning .....	33
5.6.2	Adhesive .....	33
5.6.3	Setout .....	33
5.6.4	Installation .....	34
5.6.5	Completion .....	34
5.6.6	Protection .....	34
5.7	Loose lay installation — Sheet, plank and tile .....	34
5.7.1	General .....	34
5.7.2	Conditioning .....	34
5.7.3	Seaming .....	34
5.7.4	Mechanical fixings .....	35
5.7.5	Completion .....	35
5.8	Hybrid modular flooring .....	35
5.8.1	General .....	35
5.8.2	Conditioning .....	35
5.8.3	Installation over existing floor coverings .....	35
5.8.4	Inspecting the hybrid modular floor coverings before installing .....	35
5.8.5	Setout .....	35
5.8.6	Threshold strips, expansion and edge treatments .....	36
5.8.7	Completion .....	36
5.9	Static (electrostatic) control .....	36
5.9.1	General .....	36

5.9.2	Conditioning .....	36
5.9.3	Adhesive .....	36
5.9.4	Installation .....	37
5.9.5	Conformance testing.....	37
5.9.6	Completion.....	37
<b>Appendix A (normative) Testing for moisture content in subfloors — <i>in situ</i> probe method.....</b>		<b>38</b>
<b>Appendix B (informative) Moisture vapour emission rate surface test (secondary test method).....</b>		<b>39</b>
<b>Appendix C (normative) Testing the pH level in concrete subfloors.....</b>		<b>42</b>
<b>Appendix D (normative) Site information to be provided to the contractor.....</b>		<b>44</b>
<b>Appendix E (informative) Surface preparation of concrete.....</b>		<b>46</b>
<b>Appendix F (informative) Adhesive.....</b>		<b>49</b>
<b>Appendix G (informative) Information on electrostatic discharge (ESD) control in silent flooring.....</b>		<b>51</b>
<b>Appendix H (informative) Glossary of terms.....</b>		<b>53</b>
<b>Bibliography.....</b>		<b>56</b>

## Floor coverings — Resilient sheet and tiles — Installation practices

### Section 1 Scope and general

#### 1.1 Scope

This document sets out procedures for the preparation, laying and fixing of resilient sheet and tile floor coverings in all forms including flexible PVC, semi-rigid PVC, hybrid modular, linoleum, and rubber. It also applies to self-adhesive tiles.

This document gives details of the work necessary to prepare subfloor surfaces, together with procedures to be adopted for laying the resilient covering.

This document does not apply to the laying of textile floor coverings (carpets, bamboo, laminate, engineered flooring, melamine, timber or cork products).

#### 1.2 Normative references

The following documents are referred to in the text in such a way that one or all of their content constitutes requirements of this document.

NOTE Documents referenced for informative purposes are listed in the Bibliography

AS 1684, *Residential timber-framed construction (series)*

AS 1860.2, *Particleboard flooring, Part 2: Installation*

AS 2870, *Residential slabs and footings*

AS 3740, *Waterproofing of domestic wet areas*

AS/NZS 1859.1, *Reconstituted wood-based panels — Specifications, Part 1: Particleboard*

AS/NZS 1859.2, *Reconstituted wood-based panels — Specifications, Part 2: Dry-processed fibreboard*

AS/NZS 1859.4, *Reconstituted wood-based panels — Specifications, Part 4: Wet-processed fibreboard*

AS/NZS 2269.0, *Plywood — Structural, Part 0: Specifications*

AS/NZS 2908.2, *Cellulose cement products, Part 2: Flat sheets*

AS/NZS 4858, *Wet area membranes*

IEC 61340-4-1 and IEC 61340-5-1:2011 Consol. with am1, *Electrostatics — Part 4-1: Standard test methods for specific applications — Electrical resistance of floor coverings and installed floors*

IEC 61340-5-1, *Electrostatics — Part 5-1: Protection of electronic devices from electrostatic phenomena - General requirements*

ISO 10581, *Resilient floor coverings — Homogeneous poly(vinyl chloride) floor covering — Specifications*

ISO 10582, *Resilient floor coverings — Heterogeneous poly(vinyl chloride) floor covering — Specifications*

ANSI/ESD S20.20, *ESD Association Standard for the Development of an Electrostatic Discharge Control Program for Protection of Electrical and Electronic Parts, Assemblies and Equipment (Excluding Electrically Initiated Explosive Devices)*

ASTM E96, *Standard Test Methods for Water Vapor Transmission of Materials*

ASTM F2170, *Standard Test Method for Determining Relative Humidity in Concrete Floor Slabs Using in situ Probes*
