

Australian Standard™

Packaging

Part 22: Closures

This Australian Standard was prepared by Committee PK-025, Packaging Code. It was approved on behalf of the Council of Standards Australia on 26 September 2005.
This Standard was published on 2 November 2005.

The following are represented on Committee PK-025:

Australian Paints Manufacturer's Federation
Canmakers Institute of Australia
Department of Defence
Printing Industries Association of Australia
Victoria WorkCover

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 05272.

PREFACE

This Standard was prepared by Standards Australia Committee PK-025, Packaging Code to supersede, AS 2400.22—1985, *SAA Packaging Code, Part 22: Closures*.

The objective of this edition is to revise the specification for the sizes and materials for closures.

This Standard is Part 22 of the AS 2400, *Packaging* series of Standards. The series comprises the following Parts:

AS

2400	Packaging
2400.1	Part 1: Glossary of packaging terms
2400.5	Part 5: Temporary corrosion protection
2400.6	Part 6: Paper and paperboard
2400.7	Part 7: Timber boxes
2400.8	Part 8: Textile bags, sacks and wrappings
2400.10	Part 10: Protection against shock and vibration (cushioning)
2400.11	Part 11: Cordage
2400.12	Part 12: Adhesive closing and sealing tapes
2400.13	Part 13: Tensional strapping
2400.14	Part 14: Adhesives
2400.16	Part 16: Flexible packaging
2400.18	Part 18: Use of desiccants in packaging
2400.22	Part 22: Closures (this Standard)

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.

STANDARDS AUSTRALIA

Australian Standard Packaging

Part 22: Closures

1 SCOPE

This Standard provides guidelines for the selection and use of closures for various types of containers made of different materials, such as bottles, cans, jars and tubes, generally less than 5 L capacity. It applies to closures such as bungs, caps, corks, lids, plugs, seals, sleeves and stoppers but excludes seamed ends and lever lids on metal cans.

2 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

1517 Tinsplate and blackplate

2400 Packaging

2400.1 Part 1: Glossary of packaging terms

BS

1918 Glass container finishes

1918-1 Part 1: Specification for continuous thread finish

1918-2 Part 2: Specification for crown finish

3 DEFINITIONS

For the purpose of this Standard, the definitions given in AS 2400.1 and the following apply:

3.1 Back

The rough exterior of the corkwood (bark face).

3.2 Belly

The inside skin of the corkwood nearest the trunk of the tree.

3.3 Cork, agglomerated or composition

Material made from granulated natural cork, mixed with glues, resins, etc. according to method of manufacture and use.

3.4 Cork fashion

Method of cutting corks for most narrow-mouthed bottles. Corks are punched between back and belly with the pores running parallel to top and tail, thus preventing seepage.

3.5 Disc or strive fashion

Method of cutting corks in one piece for large apertures, with pores running from head to tail.
