Metallic materials

Method 5: Wire—Simple torsion test

PREFACE

This Standard was prepared by Standards Australia Committee MT-006, Mechanical Testing of Metals to supersede in part AS 2505.5—1982, *Methods for bend and related testing of metals. Part 5: Torsion and wrapping tests on wire*.

This Standard is identical with and has been reproduced from ISO 7800:1984, *Metallic materials—Wire—Simple torsion test*.

This Standard is Method 5 of a series of Standards; on the methods of bending wire and related testing of metals. The series comprises the following Methods:

AS	
2505	Metallic materials
2505.1	Method 1: Sheet, strip and plate
2505.2	Method 2: Bars, rods and solid shapes
2505.3	Method 3: Tubular products
2505.4	Method 4: Wire—Reverse bend test
2505.5	Method 5: Wire—Simple torsion test
2505.6	Method 6: Wire—Wrapping test

As this Standard is reproduced from an International Standard, the following applies:

- Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- In the source text, 'this International Standard' should read 'this Australian Standard'.
- A full point substitutes for a comma when referring to a decimal marker.
