

Australian Standard™

**Textiles—Fabrics for window
furnishings**

Part 2: Coated curtain fabrics

This Australian Standard was prepared by Committee TX/18, Specifications for Textile Furnishings. It was approved on behalf of the Council of Standards Australia on 14 May 1999 and published on 5 July 1999.

The following interests are represented on Committee TX/18:

Australasian Furnishing Research and Development Institute
Australian Wool Processors Council
Australian Wool Testing Authority
Australian Chamber of Commerce and Industry
Drycleaning Institute of Australia
National Council of Women of Australia
Office of Fair Trading and Business Affairs, Vic.
Society of Dyers & Colourists of Australia & New Zealand
Soft Furnishings Industry Association of Australia
Textile Distributors Association

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard' which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 97416.

Australian Standard™

**Textiles—Fabrics for window
furnishings**

Part 2: Coated curtain fabrics

Originated as part of AS 2663—1983.

Revised and redesignated in part as AS 2663.2—1999.

PREFACE

This Standard was prepared by the Standards Australia Committee TX/18, Specifications for Textile Furnishings, to supersede, in part, AS 2663—1983, *Textiles—Curtain fabrics for domestic use*.

While AS 2663 covers only fabrics for domestic use, this revision specifies performance requirements for three classifications of durability of coated curtain fabrics for all end-use applications.

Abrasion resistance requirements have not been included because abrasion is considered to be an unlikely cause of customer problems if properly used. Damage during washing or dry cleaning is covered.

A method of observing faults in regular grade fabric is recommended in this Standard. While it is desirable that there be no defects in a manufactured roll of fabric, it is recognized that they will occur. Textile fabric manufacturers have identified a need for there to be a national code of practice for the identification and quantification of defects, which could be called up in all areas of textile production and marketing.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

STANDARDS AUSTRALIA

Australian Standard

Textiles—Fabrics for window furnishings

Part 2: Coated curtain fabrics

1 SCOPE This Standard specifies requirements for three grades of coated woven and knitted fabrics for curtains for domestic and commercial use.

2 APPLICATION This Standard applies to back-coated piece good fabrics for use as curtains and curtain linings.

3 OBJECTIVE The objective of this Standard is to provide manufacturers, specifiers and consumers with minimum performance specifications for coated curtain fabrics.

4 REFERENCED DOCUMENTS The following documents are referred to in this Standard:

AS

2001	Methods of test for textiles
2001.1	Method 1: Conditioning procedure
2001.2	Physical tests
2001.2.3	Method 2.3: Determination of breaking force and extension of textile fabrics
2001.4	Colourfastness tests
2001.4.8	Method 4.8: Determination of colourfastness to water
2001.4.15	Method 4.15: Determination of colourfastness to washing
2001.4.16	Method 4.16: Determination of colourfastness to dry cleaning solvents
2001.4.21	Method 4.21: Determination of colourfastness to light using an artificial light source (mercury vapour, tungsten filament, internally phosphor-coated lamp)
2001.5	Dimensional change
2001.5.4	Method 4.4: Determination of dimensional change in laundering of textile fabrics and garments—Automatic machine method
2001.5.7	Method 4.7: Determination of dimensional change on dry cleaning in perchloroethylene excluding finishing—Machine method
