

Australian Standard[®]

**MEASURING CYLINDERS—
PLASTICS—GRADUATED**

This Australian standard was prepared by Committee CH/1, Laboratory Glassware and Related Apparatus. It was approved on behalf of the Council of the Standards Association of Australia on 7 November 1984 and published on 4 March 1985.

The following interests are represented on Committee CH/1:

Commonwealth Scientific and Industrial Research Organization
Confederation of Australian Industry
Department of Agriculture, NSW
Department of Health (Commonwealth)
Department of Science and Technology
Government Chemical Laboratories, WA
National Standards Commission
Railways of Australia Committee
Royal Australian Chemical Institute
University of Sydney

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important, therefore, that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for comment as DR 81004.

PREFACE

This standard was prepared by the Association's Committee on Laboratory Glassware and Related Apparatus as the first in a series of standards on laboratory plasticsware. Although the use of laboratory plasticsware is becoming more common, the committee believes that the user has the responsibility of ensuring that the plastics cylinders are made of a material whose properties, especially chemical and thermal, do not interfere with the desired end use. This standard thus only describes what are considered to be *essential* general requirements for such cylinders.

Detailed, simple tests have been provided to assist in the investigation of measuring cylinders claimed to comply with this standard. It is hoped that these tests leave sufficient allowance for cylinders to be tested with any suitable apparatus that can be devised by the testing laboratory, but which complies with the essential requirements specified herein.

Glass measuring cylinders are covered in AS 2163, Volumetric Glassware—Graduated Measuring Cylinders.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

STANDARDS ASSOCIATION OF AUSTRALIA

Australian Standard
for
MEASURING CYLINDERS—PLASTICS—GRADUATED

1 SCOPE. This standard specifies requirements for a series of plastics measuring cylinders of capacities ranging from 10 mL to 4000 mL, each having a graduated volumetric scale and a pouring lip and of the typical design shown in Fig. 1.

2 REFERENCED DOCUMENTS. The following standards are referred to in this standard:

AS 1199	Sampling Procedures and Tables for Inspection by Attributes	AS 2243	Safety in Laboratories Part 1—General Part 2—Chemical
AS 1399	Guide to AS 1199, Sampling Procedures and Tables for Inspection by Attributes	AS 2490	Sampling Procedures and Charts for Inspection by Variables for Percent Defective
AS 1821-23	Suppliers Quality Control Systems—Levels 1, 2 and 3	AS 2508	Safe Storage and Handling Information Cards for Hazardous Materials
AS 2000	Guide to AS 1821-1823, Suppliers Quality Control Systems		2508.3.001 Acetone 2508.3.009 Hydrocarbon Solvents 2508.3.015 Toluene 2508.3.017 Ethano Methylated Spirits 2508.8.002 Hydrochloric Acid 2508.8.003 Acetic Acid 2508.8.005 Sodium Hydroxide 2508.8.007 Nitric Acid
