

Australian Standard[®]

**Electronic funds transfer—
Requirements for interfaces**

**Part 2: Message structure, format
and content**

This Australian Standard was prepared by Committee IT/5, Financial Transaction Systems. It was approved on behalf of the Council of Standards Australia on 11 August 1997 and published on 5 December 1997.

The following interests are represented on Committee IT/5:

Australian Association of Permanent Building Societies
Australian Bankers Association
Australian Electrical and Electronics Manufacturers Association
Australian Institute of Petroleum
Australian Retailers Association
Consumers Federation of Australia
Credit card industry
Credit Union Services Corporation (Australia)
Independent EFT Services
Reserve Bank of Australia
Telstra Corporation

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard' which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 94365.

Australian Standard[®]

**Electronic funds transfer—
Requirements for interfaces**

**Part 2: Message structure, format
and content**

Originated in part as AS 2805.2—1995.
Previous editions AS 2805.2—1986, AS 2805.7—1996 and AS 2805.8—1986.
Revised, amalgamated and designated AS 2805.2—1997.

PREFACE

This Standard was prepared by the Standards Australia Committee IT/5, Financial Transaction Systems, to supersede AS 2805.2—1986, AS 2805.7—1994 and AS 2805.8—1986. During the preparation of this revision cognizance was taken of ISO 8583:1993, *Financial transaction card originated messages—Interchange message specifications*.

The AS 2805 series of Standards comprises the following with additional parts under development:

AS

2805	Electronic Funds Transfer—Requirements for interfaces
2805.1	Part 1: Communications
2805.2	Part 2: Message structure, format and content (this Standard)
2805.3	Part 3: PIN management and security
2805.4	Part 4: Message authentication
2805.5.1	Part 5.1: Ciphers—Data encipherment algorithm 1
2805.5.2	Part 5.2: Ciphers—Modes of operation for a n-bit block cipher algorithm
2805.5.3	Part 5.3: Ciphers—Data encipherment algorithm 2
2805.6.1	Part 6.1: Key management—Principles
2805.6.2	Part 6.2: Key management—Transaction keys
2805.6.3	Part 6.3: Key management—Session keys—Node to node
2805.6.4	Part 6.4: Key management—Session keys—Terminal to acquirer
2805.6.5.1	Part 6.5.1: Key management—TCU initialization—Principles
2805.6.5.3	Part 6.5.3: Key management—TCU initialization—Asymmetric
2805.9	Part 9: Privacy of communications
2805.10	Part 10: File transfer integrity validation

The objective of this edition is to remove any anomalies, inconsistencies and errors in the previously published Standard (1986).

Parts 7 and 8 in this AS 2805 series have been superseded by Appendices H and J in this Standard. These parts will be declared 'available superseded' and are to be withdrawn from publication in 12–18 months.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

FOREWORD

Services of the financial industry include the exchange of electronic messages relating to financial transactions. Agreements on application specifications are generally at a private level. This Standard is designed as an interface specification enabling messages to be exchanged between systems adopting a variety of application specifications. The application specification can remain at a private level. As long as messages conform to the interface format, as prescribed in this Standard, in order for interchange to take place, all other features of applications can be altered as required.

This Standard uses a concept whereby each data element is assigned a position indicator in a control field which is known as a 'bitmap'. The presence of a data element in a specific message is indicated by a one (1) in the assigned position; the absence of a data element is indicated by a zero (0) in the assigned position.

Message formats used in individual systems are subject to the commercial relationships between the parties contracting to each system. The data formats specified in this Standard are designed to ensure that compatibility between systems, which is compatible with this Standard, is always feasible.

STANDARDS AUSTRALIA

Australian Standard

Electronic funds transfer—Requirements for interfaces

Part 2: Message structure, format and content

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE This Standard specifies the message structure, format and content, data elements and values for data elements required for an interface by which card-originated electronic messages relating to financial transactions may be interchanged.

This Standard allows for the automated reconciliation of messages previously exchanged. However, it makes no provision for the final exchange of funds (between two or more institutions) which is known as ‘settlement’.

Appendices A, B, C and D refer to data elements, type and flow of messages.

NOTE: Appendices E, F, H, I and J give guidance on implementation of card acceptor registry, minimal message sets and data presentation.

1.2 REFERENCED DOCUMENTS The documents referred to in this Standard are listed, with titles, in Appendix G.

1.3 DEFINITIONS For the purpose of this Standard, the definitions below apply.

1.3.1 Acquirer—institution or its agent which acquires, from the card acceptor, the financial data relating to the transaction, and which initiates that data into an interchange system.

NOTE: An entity which passes messages without regard to the financial data therein is not regarded as an acquirer.

1.3.2 Advice—message which notifies a part of an action that has been taken, requiring no approval and may require a response.

1.3.3 Authorization—guarantee of funds given by the card issuer to the acquirer or card acceptor.

1.3.4 Card acceptor—party accepting the card and presenting transaction data to an acquirer.

1.3.5 Cardholder—customer associated with the primary account number (PAN) requesting the transaction from the card acceptor.

1.3.6 Cardholder accounts transfer—the movement of funds by a cardholder from one account to another, both of which are held by the same financial institution.

1.3.7 Card issuer—institution or its agent which issues the financial transaction card to the cardholder.

1.3.8 Credit transaction—claim for funds by the cardholder for the credit of an account as specified in the message.

NOTE: At the same time, a credit transaction provides details of funds acknowledged as payable by the acquirer (or the card acceptor, or both) against the card issuer.
