

Australian Standard[®]

**MICROFILMING NEWSPAPERS
FOR ARCHIVAL PURPOSES**

This Australian standard was prepared by Committee MS/4, Micrographics Equipment and Techniques. It was approved on behalf of the Council of the Standards Association of Australia on 26 November 1985 and published on 6 January 1986.

The following interests are represented on Committee MS/4:

Australian Bankers' Association
Australian Government Publishing Service
Confederation of Australian Industry
Department of Defence
Department of Local Government and Administrative Services
Department of the Treasury
Government Printing Office
Health Insurance Commission
Land Titles Office, N.S.W.
Library Association of Australia
Library Board of Western Australia
Micrographics Association of Australia
National Library of Australia
Public Service Board of Western Australia
State Library of New South Wales
State Library of Queensland
State Library of Tasmania
State Library of Victoria
Telecom Australia
University of Melbourne

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

All details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for comment as DR 83198.

PREFACE

This standard was prepared by the Association's Committee on Micrographics Equipment and Techniques, in response to a request from the Australian Advisory Council on Bibliographical Services.

It specifies the minimum requirements for the preparation of material to be filmed, establishes uniform formats and layouts, and sets out the procedures involved in recording the content of newspapers on 35 mm microfilm.

Appendices provide examples of the appropriate symbols to be used and examples of bibliographical and reference target frames.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

STANDARDS ASSOCIATION OF AUSTRALIA

Australian Standard
for
MICROFILMING NEWSPAPERS FOR ARCHIVAL PURPOSES

SECTION 1. SCOPE AND GENERAL

1.1 SCOPE. This standard specifies requirements for the preparation of material to be microfilmed, layout of material, and the procedures involved in relation to microfilming newspapers for archival purposes. The standard is directed at the microfilming of newspapers on 35 mm, silver halide roll film suitable for archival storage.

1.2 APPLICATION. This standard is applicable to establishing uniform formats, layouts and presentation of information in the production of master films on 35 mm microfilm of newspapers or parts thereof. The standard also establishes minimum quality criteria affecting the production of microfilm for archival purposes.

1.3 REFERENCED DOCUMENTS. The following standards are referred to in this standard:

- | | |
|-----------|---|
| AS 1120 | The Writing of Calendar Dates in All-numeric Form |
| AS 2422 | Glossary of Micrographics Terms |
| ISO/R 9 | International System for the Transliteration of Slavic Cyrillic Characters |
| ISO 417 | Photography—Determination of Thio-sulphate and Other Residual Chemicals in Processed Photographic Films, Plates and Papers—Methylene Blue Photometric Method and Silver Sulphide Spectrometric Method |
| ISO/R 233 | International System for the Transliteration of Arabic Characters |
| ISO/R 259 | Transliteration of Hebrew |
| ISO/R 843 | International System for the Transliteration of Greek Characters into Latin Characters |
| ISO 2803 | Photography—Silver-gelatin Type Microfilms—Processing and Storage for Archival Purposes |
| ISO 4331 | Photography—Processed Photographic Film for Archival Records—Silver-gelatin Type on Cellulose Ester Base Specifications |
| ISO 332 | Photography—Processed Photographic Film for Archival Records—Silver-gelatin Type on Poly(ethylene Terephthalate) Base Specifications |

ISO 6200 Micrographics—Density of Silver-gelatin Type Films.

ISO 7098 Documentation—Romanization of Chinese

This standard also requires use of the National Bureau of Standards (USA) 'Microcopy Resolution Test Chart No 1010a'.

1.4 DEFINITIONS. For the purpose of this standard, the relevant definitions in AS 2422 and the following definitions apply:

1.4.1 Archival standards—standards for the processing, storage and use of microfilm in order that it may resist film deterioration for a given period.

1.4.2 Show through—the undesired appearance of information from the back of a document when its front is reproduced on film by photography.

1.4.3 Density (*D*)—the logarithm of the ratio of incident light to transmitted light through processed film.

1.4.4 Distribution file—microfilm copies of second or successive generation silver halide, diazo, or vesicular film.

1.4.5 Duplicate master film—second generation silver halide, diazo, or vesicular film.

1.4.6 Frame—the total exposed area of microfilm utilized in one exposure, regardless of whether or not the area is filled by the document image.

1.4.7 Master film—archival silver halide film.

1.4.8 Newspaper—a serial publication appearing at very frequent intervals, e.g. daily, weekly, providing news of current events.

1.4.9 Placard—a cardboard or paper sheet of indeterminate size containing an announcement, displayed on the one side only.

1.4.10 Reel—a flanged holder for processed film.

1.4.11 Shall and should—the word 'shall' is to be understood as mandatory, and the word 'should' as non-mandatory, advisory, or recommended.

1.4.12 Target—an aid to technical or bibliographical control which is recorded on the microfilm preceding, throughout, or following the text of the filmed file.
