**Review of Australian Standards.** To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

---

This Standard was issued in draft form for comment as DR 99257.

Australian Standard™

**Selection and use of emergency  
procedure guides for the transport  
of dangerous goods**

Originated as S 2931 — 1987.  
Previous edition 1994.  
Fourth edition 1999.

## PREFACE

This Standard was prepared by the Joint Australian/New Zealand Standards Committee CH/9, Safe Handling of Chemicals, to supersede the 1994 edition and align with the sixth edition of the *Australian Dangerous Goods Code* (ADG Code). It is an essential guide to the AS 1678 series, *Emergency procedure guides* (EPGs), including *Group text emergency procedure guides* (GTEPGs), devised for the safe land transport of dangerous goods within Australia.

The purpose of this Standard is to enable prospective users of EPGs to select and use the correct EPG for the type of dangerous goods cargo. Use of the correct EPG permits better management of transport emergencies involving dangerous goods.

This edition of the Standard is aligned with the sixth edition of the ADG Code, and lists the Proper Shipping Names and UN Numbers of all dangerous goods for which a relevant EPG or GTEPG is published by Standards Australia. For dangerous goods not listed herein, HB 76, *Dangerous goods —Initial emergency response guide* should be used.

It is stressed that this Standard is supplementary to the ADG Code for the sole purpose of providing information on the selection and use of the appropriate EPG. **It is not intended to be used as a substitute for any part of the ADG Code.**

This Standard is a result of consensus amongst Australian and New Zealand representatives on the Committee that it be produced as an Australian Standard.

## © Copyright – STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

## STANDARDS AUSTRALIA

**Australian Standard****Selection and use of emergency procedure guides for the transport of dangerous goods**

## SECTION 1 SCOPE, APPLICATION AND GENERAL

**1.1 SCOPE AND APPLICATION**

This Standard provides lists of Emergency Procedure Guides (EPGs) and Group Text Emergency Procedure Guides (GTEPGs) and guidance on their selection, completion and use. This Standard should serve as a reference when selecting the appropriate EPG for a particular type of dangerous goods.

This Standard is intended to be used in conjunction with HB 76, the AS 1678 series and the 6th edition of the Australian Code for the Transport of Dangerous Goods (ADG Code). Where a UN Number of Proper Shipping Name does not appear in the list, HB 76 should be consulted.

This Standard does not apply to dangerous goods of Classes 1 (explosive) or 7 (radioactive).

**1.2 REFERENCED DOCUMENTS**

AS

1678 Emergency procedure guide—Transport (series)

HB 76 Dangerous goods—Initial emergency response guide

ACTDG (Advisory Committee on the Transport of Dangerous Goods)

ADG Code Australian Dangerous Goods Code

**1.3 DEFINITIONS**

For the purpose of this Standard, the following definitions apply:

**1.3.1 ADG Code**

The Australian Dangerous Goods Code, which comprises—

- (a) the Australian Code for the Transport of Dangerous Goods by Road and Rail, 6th edition;
- (b) the Rail (Dangerous Goods) Rules;
- (c) the Road Transport Reform (Dangerous Goods) Regulations; and
- (d) technical appendices.

**1.3.2 Emergency procedure guide (EPG)**

A document or card that is part of the AS 1678 series and which provides information on the correct procedures to be followed when there is an emergency involving the transport of dangerous goods.
