

Australian Standard™

National Plumbing and Drainage Code

**Part 2: Sanitary plumbing and sanitary
drainage**

STANDARDS
Australia

This Australian Standard was prepared by Committee WS/14, National Plumbing and Drainage Code. It was approved on behalf of the Council of Standards Australia on 8 August 1990.
This Standard was published on 1 October 1990.

The following are represented on Committee WS/14:

Association of Hydraulic Services Consultants, Australia
AUSTAP
Australian Clay Pipe Manufacturers Association
Australian Local Government Engineers Association
Board of Works, Melbourne
Brisbane City Council
Department of Administrative Services, Australian Construction Services
Department of Lands and Housing, N.T.
Engineering and Water Supply Department, S.A.
Federated Master Plumbers of Australia
Local Government Office, Tas.
Master Plumbers Association of South Australia
Metal Trades Industry Association of Australia
Plastics Industry Association
Power and Water Authority, N.T.
Public Works Department, N.S.W.
Royal Melbourne Institute of Technology
Water Authority of Western Australia
Water Board, Sydney
Water Resources Commission, Qld

Keep your Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 88242.

PREFACE

This Standard was prepared by the Standards Australia Committee on the *National Plumbing and Drainage Code*, to provide the plumbing industry and the regulatory authorities responsible for sewerage systems, with uniform requirements for the installation of sanitary plumbing and sanitary drainage.

This Standard has been written in a format compatible with legislative requirements. In its preparation account has been taken of the regulations stipulated by the authorities responsible for the administration of sanitary plumbing and sanitary drainage legislation in each State and Territory of Australia. These authorities are the only bodies that can enforce regulation, and authorize products for connection to their systems.

FOREWORD

Attention is drawn to the relevant statutory requirements with respect to—

- (a) the qualifications of persons permitted by law to do plumbing or drainage work;
- (b) the administrative procedures to be followed by persons performing plumbing or drainage work; and
- (c) the authorization of certain materials, products, fixtures, fittings and other components for connection to sewerage systems.

STANDARDS AUSTRALIA

Australian Standard**National Plumbing and Drainage Code****Part 2: Sanitary plumbing and sanitary drainage**

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard sets out the requirements for the design and installation of sanitary plumbing and sanitary drainage from the fixtures to the Authority's sewer main, or common effluent system.

The Standard applies to new installations as well as alterations, addition, or repairs to existing installations.

NOTE: The pre-treatment of trade wastes is not specified in this Standard.

1.2 APPLICATION**1.2.1 General**

This Standard shall be read in conjunction with the by-laws and regulations of the relevant regulatory authorities.

1.2.2 New materials and methods

This Standard shall not be interpreted to prohibit the use of materials or methods not specifically referred to herein. If it is desired to use materials or methods not covered by this Standard, they shall be submitted to the relevant authority for authorization.

1.2.3 Unusual installations

Certain installations or portions of installations that are unusual due to particular circumstances or methods, may not be covered in detail or may not be permitted by this Standard.

Details of such installations shall be submitted to the relevant authority, which, having regard to all the circumstances, may authorize the installation.

1.3 REFERENCED DOCUMENTS

The documents referred to in this Standard are listed as follows:

Appendix A—Materials and products The Australian Standards containing the requirements necessary to obtain the StandardsMark for materials and products.

Appendix B—Installation The other Australian Standards called up in the body of the Standard.

Appendix C—Miscellaneous Other national Standards and miscellaneous specifications.

1.4 DEFINITIONS

The definitions given in AS 3500.0 apply.
