

Australian Standard™

Termite management

**Part 3: Assessment criteria for termite
management systems**

S t a n d a r d s Australia

This Australian Standard was prepared by Committee BD-074, Termites. It was approved on behalf of the Council of Standards Australia on 7 December 2000 and published on 27 December 2000.

The following interests are represented on Committee BD-074:

Australian Building Codes Board
Australian Consumers Association
Australian Environmental Pest Managers Association
CSIRO Entomology
CSIRO Forestry and Forest Products
Cement and Concrete Association of Australia
Clay Brick and Paver Institute
Construction, Forestry, Mining and Energy Union
Forest and Wood Products Research and Development Corporation
Housing Industry Association
Insurance Council of Australia
Local Government and Shires Associations of New South Wales
Master Builders Australia
National Registration Authority for Agricultural and Veterinary Chemicals
Queensland Forestry Research Institute
State Forests of New South Wales
Total Environment Centre

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using the current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee BD-074, Termites.

The objective of this Standard is to provide manufacturers, suppliers, testing organizations and approval authorities with minimum criteria, which have to be met before termite management systems can be used in and around buildings and structures.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

7.1 SCOPE OF SECTION	17
7.2 GENERAL	17
7.3 DETERMINING COLONY ERADICATION	17
7.4 COLONY DESTRUCTION	17

SECTION 8 BIOLOGICAL, CULTURAL OR ALTERNATIVE MANAGEMENT SYSTEMS

8.1	SCOPE OF SECTION	18
8.2	GENERAL	18
8.3	LABORATORY ASSESSMENTS	18
8.4	FIELD ASSESSMENTS	18

APPENDICES

A	ECONOMICALLY IMPORTANT WOOD-FEEDING SPECIES OF SUBTERRANEAN TERMITES IN AUSTRALIA	19
B	SOIL SAMPLING PROTOCOL FOR DETERMINING THE LOWEST EXPECTED THRESHOLD VALUES FOR HORIZONTAL AND VERTICAL CHEMICAL SOIL BARRIERS	20
C	SOIL SAMPLING PROTOCOL FOR TESTING THE UNIFORMITY OF HORIZONTAL AND VERTICAL CHEMICAL SOIL BARRIERS	24
D	LIST OF FURTHER READING	28

STANDARDS AUSTRALIA

Australian Standard Termite management

Part 3: Assessment criteria for termite management systems

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard specifies the criteria for assessing the effectiveness of termite management systems intended for use in buildings and structures as required by AS 3660.1.

NOTE: This Standard may also be used for assessing the effectiveness of termite management systems intended for use in existing building and structures as outlined in AS 3660.2.

The Standard outlines procedures to assess the ability of a system and its components to manage termite activity in and around buildings and structures. It is not intended for the assessment of the system components to perform other functions as building materials. Such assessments are outside the scope of this Standard and, if required, will need to be determined separately.

NOTE: Any proposed termite management system required to satisfy the performance criteria of AS 3660.1 will need to be assessed in accordance with this Standard. Approval for such systems by appropriate authorities is dependent on demonstration of assessments that meet the conditions outlined in this Standard.

Section 2 sets out the methodology for carrying out an assessment. Sections 3 to 8 provide the minimum criteria for specific systems.

1.2 APPLICATION

This Standard is intended for use by termite management system manufacturers, assessment providers and approval authorities, where the systems are intended for use in any part of Australia where subterranean termites are a risk.

1.3 ASSESSMENT PROVIDERS

Assessments shall be undertaken by providers having the appropriate facilities, and shall be carried out by persons having relevant expertise and experience in termite biology and the methodology of bio-assays with termites.

1.4 NEW AND ALTERNATIVE SYSTEMS

This Standard shall not be interpreted as preventing the inclusion of assessment criteria for any cultural, biological, new or alternative systems that are not specifically referred to herein.

Any new or alternative system shall be assessed in accordance with Section 2 of this Standard.
