

Australian Standard[®]

**Shank hooks and large eye hooks—
Maximum 60 t**

STANDARDS
Australia

This Australian Standard® was prepared by Committee ME-025, Lifting Tackle. It was approved on behalf of the Council of Standards Australia on 11 January 2008. This Standard was published on 6 March 2008.

The following are represented on Committee ME-025:

- Australian Chamber of Commerce and Industry
 - Australian Forging Group
 - Australian Industry Group
 - Australian Maritime Safety Authority
 - Crane Industry Council of Australia
 - Department of Defence (Australia)
 - Engineers Australia
 - Institute of Quarrying Australia
 - National Association of Testing Authorities Australia
 - Victorian WorkCover Authority
 - WorkCover New South Wales
-

This Standard was issued in draft form for comment as DR 05505.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

RECONFIRMATION

OF

AS 3777—2008

Shank hooks and large eye hooks—Maximum 60 t

RECONFIRMATION NOTICE

Technical Committee ME-025 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 02 January 2019.

The following are represented on Technical Committee ME-025:

Australian Chamber of Commerce and Industry
Australian Diecasting Association
Australian Industry Group
Chamber of Commerce and Industry Queensland
Crane Industry Council of Australia
Department of Defence (Australia Government)
Engineers Australia
Lifting Equipment Engineers Association
National Association of Testing Authorities Australia
SafeWork NSW
The Institute of Quarrying Australia
WorkSafe Victoria

PREFACE

This Standard was prepared by the Standards Australia Committee ME-025, Lifting Tackle to supersede AS 3777—1990, *Shank hooks and large-eye hooks—Maximum 25 t*.

The objective of this Standard is to provide requirements for shank hooks and large-eye hooks of maximum capacity 60 t to ensure that they are adequately designed, reliably supplied to specification and that this can be certified.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

STANDARDS AUSTRALIA

Australian Standard

Shank hooks and large eye hooks—Maximum 60 t

1 SCOPE

This Standard specifies requirements for forged lifting hooks having a working load limit of not more than 60 t, for use with wire rope, sheave blocks, serial hoists, or general engineering applications. It includes large eye hooks and shank hooks.

NOTES:

- 1 Hooks for use with Grade T chain are covered by AS 3776.
- 2 Guidance on information that should be supplied with enquiries and orders is given in Appendix A.
- 3 Standards for components used in lifting systems are listed in Appendix F.

2 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

1065	Non-destructive testing—Ultrasonic testing of carbon and low alloy steel forgings
1171	Non-destructive testing—Magnetic particle testing of ferromagnetic products, components and structures
1199	Sampling procedures for inspection by attributes
1199.0	Part 0: Introduction to the ISO 2859 attribute sampling system
1199.1	Part 1: Sampling schemes indexed by acceptance quality limit (AQL) for lot-by-lot inspection
1418	Cranes hoists and winches
1418.1	Part 1: General requirements
1442	Carbon steels and carbon-manganese steels—Hot-rolled bars and semi-finished products
1443	Carbon and carbon manganese steels—Cold-finished bars
1444	Wrought alloy steels—Standard and hardenability (H) series and hardened and tempered to designated mechanical properties
1448	Carbon steels and carbon-manganese steels—Forgings (ruling section 300 mm maximum)
1627	Metal finishing—Preparation and pretreatment of surfaces
1627.0	Part 0: Method selection guide
1627.6	Part 6: Chemical conversion treatment of metals
1721	General purpose metric screw threads
1789	Electroplated zinc (electrogalvanized) coatings on ferrous articles (batch process)
1790	Electroplated coatings—Cadmium on iron or steel
2062	Non-destructive testing—Penetrant testing of products and components
