

Australian Standard<sup>®</sup>

---

**Underground mining—Shaft  
equipment**

**Part 8: Personnel conveyances  
in other than vertical shafts**

---

This Australian Standard was prepared by Committee ME/18, Mining Equipment. It was approved on behalf of the Council of Standards Australia on 7 March 1994 and published on 16 May 1994.

---

The following interests are represented on Committee ME/18:

Australasian Institute of Mining and Metallurgy  
Australian Chamber of Commerce and Industry  
Australian Coal Association  
Australian Mining Industry Council  
Bureau of Steel Manufacturers of Australia  
Chamber of Mines of Western Australia  
Department of Energy and Minerals, Vic.  
Department of Mineral Resources, N.S.W.  
Department of Minerals and Energy, Qld.  
Department of Minerals and Energy, W.A.  
Department of Mines, Tas.  
Institution of Engineers, Australia  
Institution of Mining Electrical and Mining Mechanical Engineers  
New South Wales Coal Association  
Queensland Coal Association  
Queensland Mining Council  
South Australian Chamber of Mines  
University of New South Wales

Additional interests participating in preparation of Standard:

Mining companies  
Mining consultants  
Mining equipment manufacturers and suppliers

---

*Review of Australian Standards.* To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

---

*This Standard was issued in draft form for comment as DR 93177.*

## PREFACE

This Standard was prepared by the Standards Australia Committee on Mining Equipment. It is one of a series of Standards on shaft equipment for underground mines. The other Standards in the series are as follows:

## AS

- 3785 Underground mining—Shaft equipment
- 3785.1 Part 1: Drum winding overwind safety catch systems
- 3785.2 Part 2: Friction winding arresting systems
- 3785.3 Part 3: Drum winding gripper systems
- 3785.4 Part 4: Conveyances for vertical shafts
- 3785.5 Part 5: Headframes
- 3785.6 Part 6: Guides and rubbing ropes for conveyances
- 3785.7 Part 7: Sheaves

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.

## © Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

## STANDARDS AUSTRALIA

## Australian Standard

## Underground mining—Shaft equipment

## Part 8: Personnel conveyances in other than vertical shafts

**1 SCOPE** This Standard specifies requirements for personnel conveyances used in shafts which do not exceed a gradient of 1 in 3.

NOTE: Information to be provided by the purchaser and by the supplier is given in Appendices A and B, respectively.

**2 REFERENCED DOCUMENTS** The following documents are referred to in this Standard:

## AS

- 1554 Structural steel welding
- 1554.1 Part 1: Welding of steel structures
- 1554.4 Part 4: Welding of high strength quenched and tempered steels
- 1554.5 Part 5: Welding of steel structures subject to high levels of fatigue loading
- 1710 Non-destructive testing of carbon and low alloy steel plate—Test methods and quality classification
- 2012 Acoustics—Measurement of airborne noise emitted by earth-moving machinery and agricultural tractors—Stationary test condition
- 2012.2 Part 2: Operator's position
- 2080 Safety glass for land vehicles
- 2595 Electrical equipment for coal mines—Electrical requirements for underground mining machines and accessories
- 2953 Earth-moving machinery—Human dimensions
- 2953.2 Part 2: Physical dimensions of operators and minimum operator space envelope
- 3637 Underground mining—Winding suspension equipment
- 3637.1 Part 1: General requirements
- 3637.3 Part 3: Rope cappings
- 3637.4 Part 4: Drawbars and connecting links
- 3670 Non-destructive testing—Ultrasonic testing of universal beams and columns
- 3751 Underground mining—Slope haulage—Couplings, drawbars, and safety chains
- 3790 Mechanical equipment—Steelwork
- 37100 Steel structures

**3 DEFINITIONS** For the purposes of this Standard the definitions below apply.

**3.1 Approved**—approved by a statutory authority.

**3.2 Attachments**—an assembly of components used to connect—

- (a) the haulage rope of the permanent main load-bearing component of the conveyance; or
