

Australian Standard™

Textiles for health care facilities and institutions

Part 10: Blankets— Cotton woven cellular blankets

This Australian Standard was prepared by Committee TX/15, Textiles for Health Care Facilities and Institutions. It was approved on behalf of the Council of Standards Australia on 12 November 1999 and published on 17 January 2000.

The following interests are represented on Committee TX/15:

Australian Chamber of Commerce and Industry
Australian Linen Services Executive
Australian Wool Research and Promotion Organisation
Australian Wool Testing Authority
Council of Textile and Fashion Industries of Australia
New Zealand Leather & Shoe Research Association
N.S.W. Health Department
Textile Distributors Association
Textile Rental & Laundry Association
Victorian Institutional Laundries Association

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for the improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, PO Box 1055, Strathfield, NSW 2135.

PREFACE

This Standard was prepared by the Standards Australia Committee TX/15, Textiles for Health Care Facilities and Institutions to supersede AS 2390.2—1990, *Textiles for hospitals and institutions—Blankets, Part 2: Cotton woven cellular blankets*.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

STANDARDS AUSTRALIA

Australian Standard

Textiles for health care facilities and institutions

Part 10: Blankets—Cotton woven cellular blankets

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE This Standard specifies requirements for cotton, woven cellular blankets for use in hospitals and kindred institutions. The requirements specified relate to fibre content, blanket construction, colour, hemming and colourfastness. Test methods for measuring the physical properties of the blanket materials are also included.

NOTES:

- 1 For situations where fire is considered a hazard, Clause 3.3 describes test methods for determining the acceptability of cotton woven cellular blankets which have been treated with a fire retardant.
- 2 Appendix A contains recommendations and advice on information which should be provided by the purchaser at the time of enquiry or order.
- 3 A sealed sample may be held by the purchaser as a reference for properties not specified in this Standard.

1.2 REFERENCED DOCUMENTS The following documents are referred to in this Standard:

AS

2001	Methods of test for textiles
2001.1	Part 1: Conditioning procedures
2001.2.3	Part 2.3: Physical tests—Determination of breaking force and extension of textile fabrics
2001.4.1	Part 4.1: Colourfastness tests—Definitions and general requirements
2001.4.8	Part 4.8: Colourfastness tests—Determination of colourfastness to water
2001.4.15	Part 4.15: Colourfastness tests—Determination of colourfastness to washing
2001.4.17	Part 4.17: Colourfastness tests—Determination of colourfastness to perspiration
2001.5.4	Part 5.4: Dimensional change—Determination of dimensional change in laundering of textile fabrics and garments—Automatic machine method
2755	Textiles fabrics—Burning behaviour
2755.1	Part 1: Determination of ease of ignition of vertically oriented specimens
2800	Textiles—Stitch types—Classification and terminology
4145	Laundry practice
AS/NZS	
1957	Textiles—Care labelling
2622	Textile products—Fibre content labelling
