**Training and certification of recreational
divers**

Part 5: SCUBA instructor trainer

Standards Australia

This Australian Standard was prepared by Committee CS/83, Recreational Underwater Diving. It was approved on behalf of the Council of Standards Australia on 17 January 2000 and published on 1 March 2000.

The following interests are represented on Committee CS/83:

Australian Dive Council
Australian Medical Association
Australian Underwater Federation
Australian Underwater Scuba Instructors
British Sub-Aqua Club
Department of Employment, Training and Industrial Relations, Qld
Department of Sport and Recreation, N.S.W.
Dive Queensland
Divers Alert Network SE Asia-Pacific
Maritime Union of Australia
National Association of Scuba Diving Schools Australasia
Nau Services Australia
PADI Asia Pacific
Scuba Divers Association of New South Wales
Scuba Schools International Australia
SDI Australia and New Zealand
South Pacific Underwater Medicine Society
WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for the improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, PO Box 1055, Strathfield, NSW 2135.

This Standard was issued in draft form for comment as DR 98563.

PREFACE

This Standard was prepared by the Standards Australia Committee CS/83, Recreational Underwater Diving.

The Standard was prepared in response to a need to clearly differentiate between the training requirements for occupational divers working in the recreational SCUBA diving industry and those for other occupational SCUBA divers. The Standard is based on the American Recreational Scuba Training Council Minimum Course Content for Recreational SCUBA Instructor Trainer Certification (1 January 1993).

While Part 1 of the AS 4005 series covers entry-level recreational SCUBA diver training, this Part and Parts 2, 3 and 4 are for SCUBA divers who have progressed to supervisor or teach others. The Committee acknowledges that the course described in this Standard is also undertaken by recreational divers wishing to continue their diving education.

Additional training for other special types of recreational diving may also be required in addition to certification as a SCUBA instructor trainer if the diver is to train an instructor to teach specialty courses or supervise specialty dives. Some of these specialties are cavern, deep, ice and night diving, underwater naturalist and underwater photography.

The Parts in the AS 4005 series are as follows:

- Part 1: Minimum entry-level SCUBA diving
- Part 2: Recreational SCUBA dive supervisor
- Part 3: Assistant SCUBA instructor
- Part 4: SCUBA instructor
- Part 5: SCUBA instructor trainer (this Standard).

FOREWORD

This Standard provides minimum content requirements for the training course for SCUBA instructor trainers. These requirements should not be considered as specifying optimum training for SCUBA instructor trainers. Instructional programs which extend beyond these requirements are, in fact, encouraged. The requirements of this Standard are meant to be comprehensive but general in nature. That is, the Standard presents all of the subject areas essential for minimum training of a recreational SCUBA instructor trainer, but it does not give a detailed listing of the skills and information encompassed by each area. It assumes that detailed course outlines which meet this Standard would be prepared by training organizations and these would include specific techniques.

Although the information categories are outlined in a given sequence, the outline should not be viewed as a lesson plan. Similarly, the requirements presented in this Standard do not indicate the emphasis which should be placed upon a particular subject area, or the manner in which the subjects are to be taught. Course outlines, lesson plans and other training aids prepared by the training organization should set out the sequencing and emphasis of a course. Decisions as to sequencing and emphasis should be made within the context of environmental factors, instructor characteristics and other relevant considerations.

A certified SCUBA instructor trainer is qualified to apply the knowledge and skills outlined in this Standard to conduct educational and SCUBA training of recreational SCUBA instructors, to provide training in the use of SCUBA and to conduct supervised diving activities.

STANDARDS AUSTRALIA

Australian Standard

Training and certification of recreational divers

Part 5: SCUBA instructor trainer

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE This Standard specifies the minimum training activities and terminal objectives required for training and accreditation of persons who may teach recreational SCUBA instructors.

1.2 OBJECTIVE The objective of this Standard is to describe the organizational and syllabus requirements to train recreational SCUBA instructor trainers to operate safely and competently.

1.3 REFERENCED DOCUMENTS The following documents are referred to in this Standard:

AS

2030 The verification, filling, inspection, testing and maintenance of cylinders for the storage and transport of compressed gases

2030.1 Part 1: Cylinders for compressed gases other than acetylene

4005 Training and certification of recreational divers

4005.1 Part 1: Minimum entry-level SCUBA diving

4005.4 Part 4: SCUBA instructor

AS/NZS

2299 Occupational diving operations

2299.1 Part 1: Standard operational practice

1.4 DEFINITIONS For the purpose of this Standard, the definitions below apply.

1.4.1 Certified SCUBA instructor—an individual who has undergone formal training in recreational SCUBA diving and authorize the issuance of recreational SCUBA certification.

NOTE: AS 4005.4 covers training of SCUBA instructors.

1.4.2 Certified SCUBA instructor trainer—an individual who has undergone formal training to teach recreational SCUBA instructors and authorize the issuance of recreational SCUBA instructor certification.

1.4.3 Confined water—any body of water offering swimming-pool-like conditions with respect to clarity, calmness, current, depth and adequate access to water shallow enough to stand up in.

1.4.4 Direct supervision—the in-water visual observation and evaluation of trainee skill performance by a SCUBA instructor in a position to render assistance and guidance.

1.4.5 Entry-level diver—an individual who has completed all requirements of an entry-level certification course.

NOTE: AS 4005.1 covers training of entry-level SCUBA divers.
