

Australian Standard™

**Fire detection, warning, control
and intercom systems—Control
and indicating equipment**

**Part 7: Air-handling fire mode
control panel**

This Australian Standard was prepared by Committee FP/2, Fire Detection, Warning, Control and Intercom Systems. It was approved on behalf of the Council of Standards Australia on 9 July 1999 and published on 5 September 1999.

The following interests are represented on Committee FP/2:

Audio Engineering Society
Australasian Fire Authorities Council
Australian Building Codes Board
Australian Chamber of Commerce and Industry
Australian Chamber of Manufactures
Australian Electrical and Electronic Manufacturers Association
Commonwealth Fire Board
Deafness Forum of Australia
Department of Defence
Fire Protection Association Australia
Fire Protection Association, New Zealand
Insurance Council of Australia
National Electrical Contractors Association of Australia
New Zealand Fire Equipment Association
New Zealand Fire Protection Industry Contractors Association
Property Council of Australia
Scientific Services Laboratory - A Business Unit of AGAL
Telstra Corporation

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee FP/2, Fire Detection, Warning, Control and Intercom Systems.

The objective of this Standard is to provide performance requirements for air-handling fire mode control panels.

This Standard has been prepared in conjunction with the Joint Standards Australia/Standards New Zealand Committee ME/62, Ventilation and Airconditioning, to ensure the correct interpretation of requirements.

This Standard is the result of a consensus among representatives on the Joint Committee to produce it as an Australian Standard.

This Standard incorporates commentary on some of the clauses. The commentary directly follows the relevant clause, is designated by 'C' preceding the clause number and is printed in italics in a box. The commentary is for information only and does not need to be followed for compliance with the Standard..

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

STANDARDS AUSTRALIA

Australian Standard

Fire detection, warning, control and intercom systems—
Control and indicating equipment

Part 7: Air-handling fire mode control panel

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE This Standard specifies the functional, safety and performance requirements for air-handling fire mode control panels (referred to throughout the text as fire fan control panel (FFCP)).

1.2 APPLICATION The requirements of this Standard apply to FFCPs used for the control of air-handling systems complying with AS/NZS 1668.1.

1.3 REFERENCED DOCUMENTS The following documents are referred to in this Standard:

AS

- | | |
|--------|--|
| 1670 | Fire detection, warning control and intercom systems—System design, installation and commissioning |
| 1670.1 | Part 1: Fire |
| 2484 | Fire—Glossary of terms |
| 2484.2 | Part 2: Fire protection and firefighting equipment |
| 2706 | Numerical values—Rounding and interpretation of limiting values |
| 4428 | Fire detection, warning, control and intercom systems—Control and indicating equipment |
| 4428.0 | Part 0: General requirements and methods of test |
| 4428.1 | Part 1: Fire |
| 4428.5 | Part 5: Power supply units |

AS/NZS

- | | |
|--------|---|
| 1668 | The use of ventilation and airconditioning in buildings |
| 1668.1 | Part 1: Fire and smoke control in multi-compartment buildings |
| 3100 | Approval and test specification—General requirements for electrical equipment |

1.4 DEFINITIONS For the purpose of this Standard, the definitions in AS 2484.2, AS/NZS 1668.1 and the one below apply.

1.4.1 Fire mode The mode of operation of the air-handling plant following receipt of a fire alarm signal.

1.5 COMPLIANCE WITH SPECIFICATIONS

1.5.1 General AS/NZS 3100 and AS/NZS 1668.1 shall be read in conjunction with this Standard.
