

Australian Standard<sup>®</sup>

**Coated abrasives—Flap wheels with shaft**

**STANDARDS**  
Australia

This Australian Standard® was prepared by Committee ME-033, Abrasives. It was approved on behalf of the Council of Standards Australia on 5 September 2006.  
This Standard was published on 28 September 2006.

---

The following are represented on Committee ME-033:

- Abrasives Institute of Australia
  - Australian Chamber of Commerce and Industry
  - Industrial Diamond Association of Australia
  - The University of Melbourne
  - Victorian Employers' Chamber of Commerce
- 

This Standard was issued in draft form for comment as DP 0 269.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through public comment period.

---

#### **Keeping Standards up-to-date**

Australian Standards® are living documents that reflect progress in science, technology and systems. To remain in their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting [www.standards.org.au](http://www.standards.org.au)

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.org.au](mailto:mail@standards.org.au), or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

## PREFACE

This Standard was prepared by the Standards Australia Committee ME-033, Abrasives, to supersede AS/NZS 4531:1998, *Coated abrasives—Flap wheels with shafts—Dimensions and designation*.

This Standard is identical with, and has been reproduced from ISO 3919:2005, *Coated abrasives—Flap wheels with shaft*.

The objective of this revision is to adopt the latest edition of ISO 3919, and so align the dimensions and designations for flap wheels (with shafts) with international convention.

As this Standard is reproduced from an international standard, the following applies:

- (a) Its number appears on the cover and title page while the international standard number appears only on the cover.
- (b) In the source text ‘this International Standard’ should read ‘this Australian Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.
