

Series R freight containers

Part 1: Requirements for container compliance

STANDARDS
Australia

Currently in preview, click buy full version

This Australian Standard® was prepared by Committee ME-068, Freight Containers. It was approved on behalf of the Council of Standards Australia on 11 June 2015. This Standard was published on 30 June 2015.

The following are represented on Committee ME-068:

- Australasian Railway Association (RISSB)
 - Australian Industry Group
 - Australian Logistics Council
 - Australian Maritime Safety Authority
 - Container Owners Association
 - ICHCA Australia
 - Ports of Auckland
 - Royalwolf Trading New Zealand
 - Shipping Australia
-

This Standard was issued in draft form for comment as Draft AS 4615.1:2015.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee ME-068, Freight Containers, to supersede AS 4615.1—2000. After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Standard is to provide container designers, manufacturers, owners, certifying engineers, inspectors and operators with the minimum requirements for the compliance of series R freight containers prior to transport use.

This Standard is part of a series that applies to series R freight containers, as follows:

AS

- 4615 Series R freight containers
- 4615.1 Part 1: Requirements for container compliance (this Standard)
- 4615.2 Part 2: Platform and platform-based containers

The objective of this revision is to update the Standard with the latest practice in the series R freight container industry in Australia.
