

AS4708 GN02–2013

**Sustainable Forest Management –
Guidance for the certification of group
forest management
(Guidance Note 02 to AS4708–2013)**

This Australian Standard® was prepared by the Standard Reference Committee SRC AS4708 of Australian Forestry Standard Limited. As an accredited Standards Development Organization, Australian Forestry Standard Limited develops and publishes Australian Standards. This Standard was endorsed on behalf of the Council of Standards Australia on 17 May 2013. It was published on 23 August 2013.

The following are represented on the Standards Reference Committee responsible for this Australian Standard®:

- Association of Accredited Certification Bodies (AACB)
 - Australian Forest Growers (AFG)
 - Australian Forest Products Association (AFPA)
 - Australasian Pulp and Paper Industry Technical Association (APPITA)
 - Balkanu Cape York Development Corporation.
 - Construction Forestry Mining Energy Union (CFMEU)
 - Commonwealth Scientific and Industrial Research Organization (CSIRO)
 - Ecological Society of Australia (ESA)
 - ForestWorks
 - Greening Australia Limited
 - Independent Forest Policy and Forest Science Experts
 - Institute of Foresters Australia (IFA)
 - Planet Ark
 - Timber Communities Australia (TCA)
-

Australian Forestry Standard Limited wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee.

Keeping Standards up-to-date

Australian Standards® are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers ensure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards®, drafts, amendments and new projects can be found by visiting www.standards.org.au.

Australian Standards® developed by Australian Forestry Standard Limited are updated, according to the need by amendments or revision. Australian Forestry Standard Limited welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us by email at info@forestrystandard.org.au or write to PO Box 7031, Yarralumla, ACT 2600.

Guidance for the certification of group forest management

Section A

The Australian Standard[®] for Sustainable Forest Management

FOREWORD

The certification of a group of forest owners is an approach to forest certification which allows forest owners to become voluntarily certified under one certificate and share the financial obligations arising from forest certification as well as the common responsibility for forest management. This approach aims at improving information dissemination and co-operation in forest management among individual forest owners and reduces the risk of non-compliance.

INTRODUCTION

The objective of the Australian Standard[®] (AS 4708 2013) for Sustainable Forest Management (AFS) is to provide forest managers and forest owners with economic, social, environmental and cultural criteria and requirements that support the sustainable management of forests for wood production.

Independent, third-party Certification against the AFS provides a clear and unambiguous statement that wood production in a particular defined forest area was managed in accordance with a set of predetermined and clearly defined environmental, economic, social and cultural performance requirements that support sustainable management of forests.

Guidance for native forest and plantation ownerships to the AFS is provided by Guideline GN01.

In Australia there are significant numbers of small forest holdings. The limited financial income of small forest owners; periodicity of their management activities and revenues; limited access to information and knowledge; as well as limitations relating to their conformity with some of the criteria for sustainable forest management which cannot be achieved in small forest areas, represent significant barriers to forest certification.

This Guideline has been prepared to assist forest managers and forest owners of small scale native forest and plantations in developing and adopting an operational group management system that would aim at meeting the requirements of independent third party certification to AFS. It is informative only and provides information for forest owners and auditors. Alternative methods may be suitable for forest managers to demonstrate the control required to meet the AFS.
