

Australian Standard™

**Guide to cleaning and sanitizing of plant
and equipment in the food industry**

S t a n d a r d s Australia

This Australian Standard was prepared by Committee FT-005, Cleaning and Sanitizing Meat Poultry Seafood Industry. It was approved on behalf of the Council of Standards Australia on 16 February 2001 and published on 8 March 2001.

The following interests are represented on Committee FT-005:

Agriculture Victoria
ARMCANZ Meat Standards Committee
Australian Chemical Specialties Manufacturers Association
Australian Egg Industry Association
Australian Food and Grocery Council
Australian Poultry Industries Association
Australian Seafood Industry Council
Australian Society for Microbiology
Department of Agriculture, Fisheries and Forestry (Commonwealth)
Food Science Australia
Health Department of W.A.
N.S.W. Agriculture
Seaqual Australia
University of Queensland

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

Australian Standard™

**Guide to cleaning and sanitizing of plant
and equipment in the food industry**

Originally based on AS 2995—1987, AS 2996—1987, AS 2997—1987 and AS 2998—1987.
AS 2995—1987, AS 2996—1987, AS 2997—1987 and AS 2998—1987 revised,
amalgamated and redesignated AS 4709—2001.

PREFACE

The Standard was prepared by the Standards Australia Committee FT-005, Cleaning and Sanitizing Meat Poultry Seafood Industry to supersede AS 2995—1987, *Cleaning and sanitizing of plant and equipment in the seafood industry*, AS 2996—1987, *Cleaning and sanitizing of plant and equipment in the egg handling and processing industry*, AS 2997—1987, *Cleaning and sanitizing of plant and equipment in the meat processing industry*, and AS 2998—1987, *Cleaning and sanitizing of plant and equipment in the poultry meat processing industry*.

The objectives of this revision are as follows:

- (a) To revise the four Standards on cleaning and sanitizing and to amalgamate them into one Standard.
- (b) To cover food industries including primary processors, producers and allied industries. For dairy industries further additional information is available in AS 1162, *Cleaning and sanitizing dairy factory equipment* and AS 1536, *Cleaning and sanitizing milking equipment*.
- (c) To maintain the recommended principles of cleaning and sanitizing.
- (d) To provide procedures that unfailingly restore equipment and surfaces to the required level of cleanliness for processing and transporting food products.
- (e) To provide guidelines for quality assurance managers, supervisors and consultants, regulatory authorities, and suppliers of processing equipment and chemicals.

This Guide could be used as—

- (i) a basis for developing a cleaning and sanitation program for each and every item of equipment or surface;
- (ii) a reference for Standards Operating Procedure (SOP) documentation;
- (iii) a source of standards or benchmarks against which to assess cleaning performance;
- (iv) a source of suggested corrective actions; and
- (v) a document regarding cleaning and sanitation principles.

It is recognized that cleaning systems, which differ from those described in this Guide, can be satisfactory in specific circumstances.

STANDARDS AUSTRALIA

Australian Standard**Guide to cleaning and sanitizing of plant and equipment in the food industry**

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Guide sets out cleaning practices to be observed in order to achieve and maintain a satisfactory level of hygiene. It integrates the provision of Food Safety Programs incorporating HACCP into the cleaning practices.

In addition to food industries, the primary processors, producers and allied industries also could use this Guide for their industries. For dairy industries, further additional guidance on cleaning and sanitation is available in AS 1162 and AS 1536.

1.2 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

1162 Cleaning and sanitizing dairy factory equipment

1536 Cleaning and sanitizing milking equipment

Australian Drinking Water Guidelines, 1990, co-authored by Agriculture and Resource Management Council of Australia and New Zealand and the National Health and Medical Research Council.

1.3 DEFINITIONS

For the purpose of this Standard, the definitions below apply.

1.3.1 Air-drying

To dry surfaces by allowing residual moisture remaining on surfaces to evaporate by natural air movement.

1.3.2 Clean surface

A surface which is free from soil and complying with the following characteristics:

- (a) Contamination or oxidation is not visible under good lighting when the surface is dry.
- (b) No objectionable odour is discernible.
- (c) The surface does not feel greasy when rubbed with clean fingers.

NOTE: See Clause 1.3.12, Sanitized clean surface.

1.3.3 Cleaning and sanitizing methods**1.3.3.1 Manual cleaning**

An operation in which the detergent solution is brought into contact with the soil and surfaces to be cleaned by physical effort on the part of the operator, e.g. brushing or use of non-metallic scouring pad.
