

Australian Standard™

**Timber—Softwood—
Sawn and milled products**

Part 3: Timber for furniture components

This Australian Standard was prepared by Committee TM-007, Sawn, Milled and Speciality Timber Products. It was approved on behalf of the Council of Standards Australia on 31 August 2001 and published on 4 January 2002.

The following interests are represented on Committee TM-007:

Australian Building Codes Board
Australian Timber Importers Federation
Construction Information Systems, Australia
Consumers Federation of Australia
Forest Products Commission (WA)
Furntech
Housing Industry Association
Master Builders Australia
New Zealand Timber Industry Federation
New Zealand Timber Suppliers Group
Queensland Forestry Research Institute
State Forests of New South Wales
Timber Promotion Council
Timber Research and Development Advisory Council of Queensland

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TM-007, Sawn, Milled and Speciality Timber Products.

This Standard is the result of a consensus among Australian and New Zealand representatives on the Joint Committee to produce it as an Australian Standard.

The objective of this Standard is to provide suppliers and purchasers of softwood furniture timber with product requirements and grading rules for such timber intended for use in the manufacture of furniture.

This Standard is Part 3 of the AS 4785 series, which consists of the following:

AS

- 4785 Timber—Softwood—Sawn and milled products
- 4785.1 Part 1: Product specification
- 4785.2 Part 2: Grade description
- 4785.3 Part 3: Timber for furniture components (this Standard)

During the course of preparation for this Standard, consideration was given to research, industry comment and related information from sources in Australia and overseas.

Although much of the content of this Standard is similar to clauses found in AS 4785.1 and AS 4785.2, it has been produced due to requests from the furniture industry.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

STANDARDS AUSTRALIA

Australian Standard
Timber—Softwood—Sawn and milled products

Part 3: Timber for furniture components

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard specifies product and grade requirements for timber for furniture components sawn or milled from softwood.

This Standard also specifies tolerances for sawn boards intended as feed stock for furniture components.

NOTE: The coverage of any softwood species by this Standard does not imply its availability nor the availability of every grade in any species or species group.

1.2 APPLICATION

Sawn or milled softwood timber for furniture components shall comply with the product requirements given in Section 2, together with the grade requirements given in Appendices A and B.

NOTE: Information to be supplied with enquires and orders is given in Appendix C.

1.3 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS	
1604	Timber—Preservative-treated—Sawn and round
1604.1	Part 1: Sawn and round timber
1810	Timber—Seasoned cypress pine—Milled products
2754	Adhesives for timber and timber products
2754.3	Part 3: Adhesives for non-structural applications
AS/NZS	
1080	Timber—Methods of test
1080.1	Method 1: Moisture content
1080.2.1	Method 2.1: Slope of grain by scribe
1080.2.2	Method 2.2: Slope of grain by reference to surface checks
1080.2.3	Method 2.3: Slope of grain by splintering
1448	Timber—Nomenclature—Australian, New Zealand and imported species
1328	Glue laminated structural timber
1328.1	Part 1: Performance requirements and minimum production requirements
1491	Finger jointed structural timber
4491	Timber—Glossary of terms in timber-related Standards
4787	Timber—Assessment of drying quality
