

Australian Standard™

AS 4878.4

Methods of test for coated fabrics

Method 4: Determination of thickness

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee JX-005, Coated Fabrics as an Australian Standard to supersede AS 1441.3—1973, *Methods of test for coated fabrics*, Method 3: *Determination of thickness*, which was withdrawn in 1997.

The Standard is identical with and has been reproduced from ISO 2286-3:1998 *Rubber- or plastics-coated fabrics—Determination of roll characteristics*, Part 3: *Method for determination of thickness*.

The objective of this Standard is to provide manufacturers and testing bodies with suitable a method for the determination of the thickness of rubber- or plastics-coated fabrics.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text, 'this part of ISO 2286' should read 'this Australian Standard'.
- (b) A full point should be substituted for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian Standards, as follows:

<i>Reference to International Standard</i>	<i>Australian Standard</i>
