

Australian Standard™

**Oil of spike lavender [*Lavandula latifolia*
(L.f.) Medikus], Spanish type**

This Australian Standard was prepared by Committee CH-021, Essential Oils. It was approved on behalf of the Council of Standards Australia on 14 June 2002 and published on 27 June 2002.

The following are represented on Committee CH-021:

Australian Association of Certification Bodies
Australian Society of Cosmetic Chemists
Australian Society of Perfumers and Flavourists
Cosmetic Toiletry Fragrance Association of Australia
Essential Oil Producers Association
New South Wales Agriculture
Southern Cross University
The Royal Australian Chemical Institute
University of New South Wales
University of Tasmania

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia website at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee CH-021, Essential Oils. This Standard is identical with and has been reproduced from ISO 4719:1999, Oil of spike lavender [*Lavandula latifolia* (L.f.) Medikus], Spanish type.

The objective of this Standard is to provide certain characteristics of oil of spike lavender [*Lavandula latifolia* (L.f.) Medikus], Spanish type, in order to facilitate assessment of its quality.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text, 'this International Standard' should read 'this Australian Standard.'
- (c) A full point substitutes for a comma when referring to a decimal mark.
- (d) Substitute 'mL' for 'ml' wherever it appears.
- (e) Annex A, Figure A1, peak 5, should read limonene + 1,8 cineole.

NOTE: The change listed in Item (e) is indicated in the text by a margin line against the relevant part of the figure.

References to International Standards should be replaced by references to equivalent Australian Standards as follows:

<i>Reference International Standard</i>		<i>Australian Standard</i>	
ISO		AS	
212	Essential oils—Sampling	4550	Essential oils—Sampling
11024	Essential oils—General guidance on chromatographic profiles	5025	Essential oils—General guidance on chromatographic profiles
11024-1	Part 1: Preparation of chromatographic profiles for presentation in Standards	5025.1	Part 1: Preparation of chromatographic profiles for presentation in Standards
11024-2	Part 2: Utilization of chromatographic profiles of samples of essential oils	5025.2	Part 2: Utilization of chromatographic profiles of samples of essential oils

With the exception of the above ISO documents, which have been adopted as Australian Standard, the ISO documents listed as normative references in Clause 2 have not been adopted as Australian Standards.

AUSTRALIAN STANDARD

Oil of spike lavender [*Lavandula latifolia* (L.f.) Medikus], Spanish type

1 Scope

This International Standard specifies certain characteristics of the oil of spike lavender [*Lavandula latifolia* (L.f.) Medikus], Spanish type, in order to facilitate assessment of its quality.

2 Normative references

The following normative documents contain provisions which, through reference in this text, constitute provisions of this International Standard. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. However, parties to agreements based on this International Standard are encouraged to investigate the possibility of applying the most recent editions of the normative documents indicated below. For undated references, the latest edition of the normative document referred to applies. Members of ISO and IEC maintain registers of currently valid International Standards.

ISO/TR 210, *Essential oils — General rules for packaging, conditioning and storage*.

ISO/TR 211, *Essential oils — General rules for labelling and marking of containers*.

ISO 212, *Essential oils — Sampling*.

ISO 279, *Essential oils — Determination of relative density at 20 °C (Reference method)*.

ISO 280, *Essential oils — Determination of refractive index*.

ISO 282, *Essential oils — Determination of optical rotation*.

ISO 709, *Essential oils — Determination of ester value*.

ISO 875, *Essential oils — Evaluation of miscibility in ethanol*.

ISO 1242, *Essential oils — Determination of acid value*.

ISO 3794, *Essential oils (containing free alcohols) — Estimation of free alcohols content by determination of ester value after acetylation*.

ISO 11024-1, *Essential oils — General guidance on chromatographic profiles — Part 1: Preparation of chromatographic profiles for presentation in standards*.

ISO 11024-2, *Essential oils — General guidance on chromatographic profiles — Part 2: Utilization of chromatographic profiles of samples of essential oils*.

3 Term and definition

For the purposes of this International Standard, the following term and definition apply.

3.1

oil of spike lavender

essential oil obtained by steam distillation of the flowering tops of *Lavandula latifolia* (L.f.) Medikus, of the Lamiaceae family, growing mainly in Spain

4 Requirements

4.1 Appearance

Clear mobile liquid.

4.2 Colour

Almost colourless to light orange yellow.

4.3 Odour

Characteristic, earthy, reminiscent of lavender, more or less camphoraceous.
