AS ISO 20252:2018

This Australian Standard® was prepared by MB-005, Market Research. It was approved on behalf of the Council of Standards Australia on 29 March 2018.

This Standard was published on 16 April 2018.

The following are represented on Committee MB-005:

Association of Market and Social Research Organisations
Australian Market and Social Research Society
Clients Networking Group
University of Sydney

This Standard was issued in draft form for comment as DR AS ISO 20252:2018.

Preface

This Standard was prepared by the Standards Australia Committee MB-005, Market Research, to supersede AS ISO 20252—2007, *Market, opinion and social research—Vocabulary and service requirements (ISO 20252:2006, MOD)*.

The objective of this Standard is to establish terms and definitions and service requirements for organizations and professionals conducting market, opinion and social research.

Non-market research activities, such as direct marketing, are outside the scope of this Standard.

This Standard is identical with, and has been reproduced from, ISO 20252:2012, *Market, opinion and social research — Vocabulary and service requirements*.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text 'this International Standard' should read 'this Australian Standard'.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms 'normative' and 'informative' are used in Standards to define the application of the appendices or annexes to which they apply. A 'normative' appendix or annex is an integral part of a Standard, whereas an 'informative' appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	vi
Introduction	vii
1 Scope	1
2 Terms and definitions	1
3 Research process management system requirements	7
3.1 Organization and responsibilities	7
3.1.1 The research process management system	7
3.1.2 Senior management responsibilities	7
3.1.3 Appointment of a quality manager	8
3.2 Confidentiality of research	8
3.3 Documentation requirements	8
3.3.1 General	8
3.3.2 Control of documents (other than project-related documents)	8
3.3.3 Control of project documents	8
3.3.4 Control of records	8
3.4 Competence and training	9
3.5 Subcontracting/outsourcing	9
3.6 Reviewing the effectiveness of the research process management system	9
3.6.1 Management review	9
3.6.2 Problems and complaints management	10
3.6.3 Internal audits	10
4 Managing the executive elements of research	10
4.1 Responding to research requests	10
4.1.1 General	10
4.1.2 Contents of price quotations	11
4.1.3 Contents of research proposals	11
4.1.4 Price	12
4.1.5 Research contracts	13
4.2 Project schedule	13
4.3 Assistance by and cooperation with clients	13
4.3.1 Client briefing for research service provider	13
4.3.2 Subcontractors to be used	13
4.3.3 Changes in the specification of work	14
4.3.4 Client review of questionnaires and discussion guides	14
4.3.5 Observing and checking data collection	14
4.3.6 Code frame and data analysis	14
4.3.7 Presentation of results to the client	14
4.4 Questionnaires and discussion guides	14
4.4.1 Conception and design of questionnaires	14
4.4.2 Translation of questionnaires and discussion guides or any other project-related documents	15
4.4.3 Pre-testing questionnaires	15
4.4.4 Project-related briefing and training of interviewers and moderators	15
4.4.5 Electronic questionnaires	15
4.5 Managing sampling and data processing	16
4.5.1 Managing sampling and weighting	16
4.5.2 Coding, editing and other data processing	17
4.6 Monitoring the execution of research	17
4.7 Research documents, materials and products	17
4.7.1 Handling and storage of project related materials and documents	17
4.7.2 Safe keeping of research materials	18

4.8	Reporting of research results	18
4.8.1	Presentation of research results	18
4.8.2	Interpretation	18
4.8.3	Documentation	18
4.8.4	Oral presentation of results	19
4.8.5	Publication	19
4.9	Research records	19
4.9.1	Identification	19
4.9.2	Retention	20
4.9.3	Storage and disposal	20
4.9.4	Safe keeping	20
4.9.5	Supplying electronically stored data to the client	20
5	Data collection	20
5.1	General	20
5.2	Management, recruitment and training of fieldworkers	21
5.2.1	Data collection management staff	21
5.2.2	Fieldworker recruitment	21
5.2.3	Basic training for new fieldworkers	21
5.2.4	Fieldworker organizational training	22
5.2.5	Continuing training and appraisal of fieldworkers	23
5.3	Conducting data collection by fieldwork	23
5.3.1	Fieldworker identity document (ID)	23
5.3.2	Respondent reassurance	23
5.3.3	Data collection from children or vulnerable respondents	23
5.3.4	Project briefing	24
5.3.5	Date and duration of fieldwork	24
5.3.6	Respondent incentives	24
5.4	Fieldworker validation of quantitative research	25
5.4.1	General	25
5.4.2	Validation methods	25
5.4.3	Validation levels	26
5.4.4	Validation reports	26
5.5	Qualitative data collection	27
5.5.1	General	27
5.5.2	Respondent recruitment	27
5.5.3	Respondent recruitment validation	27
5.5.4	Qualitative moderation	28
5.5.5	Recording of qualitative research and respondent confidentiality	28
5.6	Self-completion data collection	28
5.6.1	General	28
5.6.2	Invitation to participate in research projects	29
5.6.3	Incentives	29
5.6.4	Respondent safeguards	30
5.6.5	Respondent and data validation	30
5.7	Observational data collection	31
5.7.1	General	31
5.7.2	Observational data collection methodology	31
5.7.3	Validation of data collection process	32
5.7.4	Respondent safeguards	32
5.8	Data collection from secondary sources	32
5.9	Data collection records	32
6	Data management and processing	33
6.1	General	33
6.2	Hard copy data entry	33
6.2.1	Specifications	33
6.2.2	Data entry validation for paper documents	33
6.3	Accuracy of databases not requiring manual data entry	34

6.4	Coding.....	34
6.4.1	General.....	34
6.4.2	Developing code frames for manual and semi-automated coding.....	34
6.4.3	Code frame approval.....	35
6.4.4	Coding briefing.....	35
6.4.5	Code updating.....	35
6.4.6	Other categories.....	35
6.4.7	Validation.....	35
6.5	Data editing.....	35
6.5.1	Pre-entry data editing.....	35
6.5.2	Post-entry data editing.....	35
6.6	Data file management.....	36
6.7	Data analysis.....	36
6.7.1	Specifications for data analysis.....	36
6.7.2	Analysis records.....	36
6.7.3	Data analysis validation.....	36
6.7.4	Data tables.....	37
6.8	Electronic data delivery.....	37
6.9	Back up, retention and security of data.....	37
7	Report on research projects.....	38
7.1	General.....	38
7.2	Quantitative research.....	38
7.3	Qualitative research.....	39
7.4	Observational research.....	40
	Bibliography.....	41

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 20252 was prepared by Technical Committee ISO/TC 225, *Market, opinion and social research*.

This second edition cancels and replaces the first edition (ISO 20252:2006), which has been technically revised.

Introduction

The principal objective of international standardization is to facilitate business development and growth, particularly between different national and regional markets. The intention of this International Standard is to follow a linear structure to ensure that its implementation leads to continual improvement of market, opinion and social research and to harmonize other national standards already available.

Market, opinion and social research is now a global industry. An increasing proportion of the expenditure of users of the industry is allocated to multi-national projects, whose objective is consistent regional and global measurement. An International Standard facilitates the achievement of this important economic and social objective by ensuring that the process elements of such research are undertaken to an appropriate standard and in a verifiable and consistent manner. This enables data arising from research studies carried out in accordance with this International Standard to be used to guide the provision of goods and services to citizens and institutions in a consistent and transparent fashion.

Subsidiary objectives in developing this International Standard include the need to define the level of requirement for service provision and common work procedures to be applied in processes, including across different countries. Requirements only apply when services are provided.

This International Standard contains extensive terms and definitions

Australian Standard®

Market, opinion and social research—Vocabulary and service requirements

1 Scope

This International Standard establishes terms and definitions and service requirements for organizations and professionals conducting market, opinion and social research.

Non-market research activities, such as direct marketing, are outside the scope of this International Standard.

2 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

2.1

access panel

sample *database* (2.16) of potential *respondents* (2.56) who declare that they will cooperate for future data collection if selected

Note 1 to entry: This does not include continuously reporting panels (e.g. TV-rating panels) and re-contact databases (asking for permission for follow-ups).

2.2

accuracy

degree of closeness between the estimate and the true parameter value

2.3

ad hoc

(research) specifically designed to address a particular objective or issue

2.4

appraisal

process of monitoring the competency of an individual or group of individuals in carrying out their work

2.5

audit

systematic, independent and documented process for obtaining evidence and evaluating it objectively to determine the extent to which *audit criteria* (2.6) are fulfilled

2.6

audit criteria

set of policies, procedures or requirements used as a reference

2.7

auditor

person with the competence to conduct an *audit* (2.5)

2.8

automated coding

form of coding where manual coding is replaced, totally or in part, by various forms of computer coding or computer-assisted coding using computer-stored code lists and dictionaries

2.9

bias

systematic deviation between the estimate and the true parameter value
