This standard was developed by a consensus standards development process that has been accredited by the American National Standards Institute (ANSI). Accreditation by ANSI, a voluntary accreditation body representing public and private sector standards development organizations in the United States and abroad, signifies that the standards development process used by ASCE has met the ANSI requirements for openness, balance, consensus, and due process.

While ASCE's process is designed to promote standards that reflect a fair and reasoned consensus among all interested participants, while preserving the public health, safety, and welfare that is paramount to its mission, it has not made an independent assessment of and does not warrant the accuracy, completeness, suitability, or utility of any information, apparatus, product, or process discussed herein. ASCE does not intend, nor should anyone interpret, ASCE's standards to replace the sound judgment of a competent professional, having knowledge and experience in the appropriate field(s) of practice, nor to substitute for the standard of care required of such professionals in interpreting and applying the contents of this standard.

ASCE has no authority to enforce compliance with its standards and does not undertake to certify products for compliance or to render any professional services to any person or entity.

ASCE disclaims any and all liability for any personal injury, property damage, financial loss, or other damages of any nature whatsoever, including without limitation any direct, indirect, special, exemplary, or consequential damages, resulting from any person's use of, or reliance on, this standard. Any individual who relies on this standard assumes full responsibility for such use.

ASCE STANDARDS

In 2014, the Board of Direction approved revisions to the ASCE Rules for Standards Committees to govern the writing and maintenance of standards developed by ASCE. All such standards are developed by a consensus standards process managed by the ASCE Codes and Standards Committee (CSC). The consensus process includes balloting by a balanced standards committee and reviewing during a public comment period. All standards are updated or reaffirmed by the same process every five to ten years. Requests for formal interpretations shall be processed in accordance with Section 7 of ASCE Rules for Standards Committees, which are available at www.asce.org. Errata, addenda, supplements, and interpretations, if any, for this standard can also be found at www.asce.org.

This standard has been prepared in accordance with recognized engineering principles and should not be used without the user's competent knowledge for a given application. The publication of this standard by ASCE is not intended to warrant that the information contained therein is suitable for any general or specific use, and ASCE takes no position respecting the validity of patent rights. The user is advised that the determination of patent rights or risk of infringement is entirely their own responsibility.

A complete list of current standards is available in the ASCE Library (<http://ascelibrary.org/page/books/s-standards>).

CONTENTS

ASCE STANDARDS		iii
PREFACE		iv
ACKNOWLEDGMENTS		ix
1 SCOPE		1
2 NONSTEADY-STATE METHOD		3
2.1 Objective		3
2.2 Theoretical Basis		3
2.3 Assumptions and Limitations		3
2.4 Procedure		4
2.4.1 The H ₂ O ₂ Technique		5
2.5 Sample Calculation		6
2.6 Quality Control		7
2.7 Test Variability		8
3 OFF-GAS METHOD		13
3.1 Objective		13
3.2 Theoretical Basis		13
3.3 Assumptions and Limitations		14
3.4 Apparatus and Supplies		15
3.4.1 Off-Gas Analyzer		15
3.4.2 Off-Gas Collection System		15
3.5 General Requirements of the Apparatus		15
3.5.1 Off-Gas Collection System		15
3.5.2 Off-Gas Analyzer Capabilities		15
3.5.3 Liquid-Phase DO Hardware		16
3.5.4 Miscellaneous Equipment		16
3.6 Procedure		16
3.6.1 Conduct of Test		16
3.6.2 Analyzer Operation		16
3.6.3 Sampling Criteria		16
3.6.4 Recorded Data		16
3.7 Off-Gas Calculations		17
3.7.1 General		17
3.7.2 Summary Data Sheet		17
3.7.3 Ancillary Information		17
3.7.4 Report of Results		17
3.8 Quality Assurance/Quality Control Procedures		17
3.8.1 Leak Test Analyzer Module and Conduit Hose		17
3.8.2 Oxygen Sensor Calibration		17
3.8.3 Sampling Plan Adequacy		18
3.8.4 Conversion of OTE _f to SOTE _{pw}		18
3.9 Accuracy and Precision		18
4 TRACER MEASUREMENT OF OXYGEN TRANSFER		19
4.1 Objective		19
4.2 Theoretical Basis		19
4.3 Assumptions and Limitations		20

4.4	Apparatus	20
4.4.1	Liquid Scintillation Spectrophotometer	20
4.4.2	Grab Sampling Device	20
4.4.3	Alternate Continuous-Flow Sampling Arrangement	20
4.5	Procedures	20
4.5.1	Tracer Quantities	20
4.5.2	Tracer Release	21
4.5.3	Sampling Locations, Test Duration, and Sampling Frequency	21
4.5.4	Sample Collection, Storage, and Shipment	21
4.5.4.1	Grab Sampling	21
4.5.4.2	Continuous Flow Sampling	21
4.5.5	Laboratory Analysis	21
4.6	Calculations	21
4.6.1	General	21
4.6.2	Example	22
4.7	Quality Assurance and Quality Control Procedures	23
4.8	Accuracy and Precision	23
5	COMPARISONS AMONG FIELD OXYGEN TRANSFER TECHNIQUES	25
APPENDIX A	OFF-GAS ANALYZER	29
A.1	Capabilities	29
APPENDIX B	SAMPLE CALCULATION FOR OFF-GAS TECHNIQUE	31
B.1	Example 1—Standard Oxygen Transfer Efficiency	31
B.2	Example 2—Computing the Mean Weighted Average (MWA) COT_{ef} and $SOTE_{pw}$	34
APPENDIX C	CORRECTIONS TO THE K_{Kr}/K_{La} RATIO FOR KRYPTON STRIPPING	35
APPENDIX D	OTHER METHODS	37
D.1	Steady-State Oxygen Uptake Rate (R) Technique	37
D.1.1	Objective	37
D.1.2	Theoretical Basis	37
D.1.3	Assumptions and Limitations	37
D.1.4	Procedure	37
D.1.4.1	General	37
D.1.4.2	Oxygen Uptake Rate—Ex Situ	38
D.1.4.3	Ex Situ Oxygen Uptake Test Accuracy	38
D.1.4.4	Other Methods—Off-Gas Column Test for Alpha Determinations	38
D.1.4.5	Sample Calculation	40
D.1.4.6	Quality Control	40
D.1.4.7	Test Variability and Accuracy	40
D.2	Mass Balance Oxygen Transfer Determination in Process Water	40
D.2.1	Objective	40
D.2.2	Theoretical Basis	41
D.2.3	Assumptions and Limitations	41
D.2.4	Procedures	41
D.2.4.1	Driving Force Factor	42
D.2.4.2	Saturation and Temperature Correction	42
D.2.4.3	Nitrification–Denitrification Factor	42
D.2.4.4	Benthic Oxygen Demand	42
D.2.4.5	Surface Reaeration	42
D.2.4.6	Photosynthetic Factor	42
D.2.5	Example Calculation	43
D.2.6	Accuracy and Precision	44
D.2.7	Activated Sludge Systems	45
APPENDIX E	ABBREVIATIONS AND NOTATION	47
APPENDIX F	REFERENCES	49
INDEX		51
