Library of Congress Cataloging-in-Publication Data

Names: American Society of Civil Engineers. Task Committee to Revise Guidelines for Dam Instrumentation. | de Rubertis, Kim, editor.

Title: Monitoring dam performance : instrumentation and measurements / prepared by the Task Committee to Revise Guidelines for Dam Instrumentation of the Committee on Water Power of the Energy Division of the American Society of Civil Engineers; edited by Kim de Rubertis, P.E., D.GE, F.ASCE.

Description: Reston, Virginia : American Society of Civil Engineers, [2018] | Includes bibliographical references and index.

Identifiers: LCCN 2017061624 | ISBN 9780784414828 (hardcover : alk. paper) | ISBN 9780784480984 (pdf) | ISBN 9780784480991 (ePub)

Subjects: LCSH: Dams--Inspection. | Dam safety. | Dam failures--United States--Prevention. | Hydraulic measurements.

Classification: LCC TC550 .A44 2018 | DDC 627/.80289--dc23

LC record available at <https://lccn.loc.gov/2017061624>

MANUALS AND REPORTS ON ENGINEERING PRACTICE

(As developed by the ASCE Technical Procedures Committee, July 1930, and revised March 1935, February 1962, and April 1982)

A manual or report in this series consists of an orderly presentation of facts on a particular subject, supplemented by an analysis of limitations and applications of these facts. It contains information useful to the average engineer in his or her everyday work, rather than findings that may be useful only occasionally or rarely. It is not in any sense a "standard," however; nor is it so elementary or so conclusive as to provide a "rule of thumb" for nonengineers.

Furthermore, material in this series, in distinction from a paper (which expresses only one person's observations or opinions), is the work of a committee or group selected to assemble and express information on a specific topic. As often as practicable the committee is under the direction of one or more of the technical divisions and councils, and the product evolved has been subjected to review by the Executive Committee of the Division or Council. As a step in the process of review, proposed manuscripts are often brought before the members of the technical divisions and councils for comment, which may serve as the basis for improvement. When published, each work shows the names of the committees by which it was compiled and indicates clearly the several processes through which it has passed in review so that its merit may be definitely understood.

In February 1962 (and revised in April 1982), the Board of Direction voted to establish a series titled "Manuals and Reports on Engineering Practice" to include the manuals published and authorized to date, future Manuals of Professional Practice, and Reports on Engineering Practice. All such manual or report material of ASCE would have been refereed in a manner approved by the Board Committee on Publications and would be bound, with applicable discussion, in books similar to past manuals. Numbering would be consecutive and would be a continuation of present manual numbers. In some cases of joint committee reports, bypassing of journal publications may be authorized.

A list of available Manuals of Practice can be found at <http://www.asce.org/bookstore>.
