Legal Notice for Harmonized Standard Jointly Developed by ASME and CSA Group

Intellectual property rights and ownership

As between American Society of Mechanical Engineers (“ASME”) and Canadian Standards Association (Operating as “CSA Group”) (collectively “ASME and CSA Group”) and the users of this document (whether it be in printed or electronic form), ASME and CSA Group are the joint owners of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. The unauthorized use, modification, copying, or disclosure of this document may violate laws that protect the intellectual property of ASME and CSA Group and may give rise to a right in ASME and CSA Group to seek legal redress for such use, modification, copying, or disclosure. ASME and CSA Group reserve all intellectual property rights in this document.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document’s fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party’s intellectual property rights. ASME and CSA Group do not warrant the accuracy, completeness, or currency of any of the information published in this document. ASME and CSA Group make no representations or warranties regarding this document’s compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL ASME AND CSA GROUP, THEIR RESPECTIVE VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF ASME OR CSA GROUP HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, ASME and CSA Group are not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and ASME and CSA Group accept no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

ASME and CSA Group have no power, nor do they undertake, to enforce compliance with the contents of the standards or other documents they jointly publish.

Authorized use of this document

This document is being provided by ASME and CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in printed paper form may be distributed only to persons who are authorized by ASME and CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from ASME and CSA Group; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Standards Update Service

ASME A112.19.2-2024/CSA B45.1:24 October 2024

Title: *Ceramic plumbing fixtures*

To register for e-mail notification about any updates to this publication go to updates.csagroup.org.

The **List ID** that you will need to register for updates to this publication is **2431630**.

If you require assistance, please e-mail techsupport@csagroup.org or call 416-777-2233.

Visit CSA Group's policy on privacy at www.csagroup.org/legal to find out how we protect your personal information.

Canadian Standards Association (operating as “CSA Group”), under whose auspices this National Standard has been produced, was chartered in 1919 and accredited by the Standards Council of Canada to the National Standards system in 1973. It is a not-for-profit, nonstatutory, voluntary membership association engaged in standards development and certification activities.

CSA Group standards reflect a national consensus of producers and users — including manufacturers, consumers, retailers, unions and professional organizations, and governmental agencies. The standards are used widely by industry and commerce and often adopted by municipal, provincial, and federal governments in their regulations, particularly in the fields of health, safety, building and construction, and the environment.

More than 10 000 members indicate their support for CSA Group’s standards development by volunteering their time and skills to Committee work.

CSA Group offers certification and testing services in support of and as an extension to its standards development activities. To ensure the integrity of its certification process, CSA Group regularly and continually audits and inspects products that bear the CSA Group Mark.

In addition to its head office and laboratory complex in Toronto, CSA Group has regional branch offices in major centres across Canada and inspection and testing agencies in fourteen countries. Since 1919, CSA Group has developed the necessary expertise to meet its corporate mission: CSA Group is an independent service organization whose mission is to provide an open and effective forum for activities facilitating the exchange of goods and services through the use of standards, certification and related services to meet national and international needs.

For further information on CSA Group services, write to

Canada

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at www.scc.ca.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada’s economic competitiveness and social wellbeing, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at www.scc.ca.

CSA Technical Committee on Plumbing Fixtures 14

Preface 20

1 Scope 22

1.1 Inclusions 22

1.2 Terminology 22

1.3 Units 23

2 Reference publications 23

3 Definitions and abbreviations 24

3.1 Definitions 24

3.2 Abbreviations 28

4 General requirements 29

4.1 Dimensions and tolerances 29

4.1.1 Thickness 29

4.1.2 Tolerances 29

4.2 Glazing 29

4.3 Waste fitting openings, drainage, and overflows 30

4.3.1 Openings and drainage 30

4.3.2 Overflows 30

4.4 Off-the-floor plumbing fixture supports 30

4.5 Non-vitreous china plumbing fixtures 31

4.5.1 Glazing 31

4.5.2 Integral traps 31

4.6 Additional requirements for water closets 31

4.6.1 Outlet dimensions 31

4.6.2 Non-standard outlets 31

4.6.3 Bolt hole spacing 31

4.6.4 Roughing-in details 31

4.6.5 Seat-mounting holes 31

4.6.6 Rim profiles 31

4.6.7 Water surface dimensions 31

4.6.8 Trap diameter 31

4.6.9 Spuds 32

4.6.10 Rim heights 32

4.7 Additional requirements for urinals 32

4.7.1 Integral trap diameter 32

4.7.2 Dimensions 32

4.7.3 Spuds 32

4.7.4 Materials and construction 32

4.7.5	Non-water-consuming urinals	32
4.8	Additional requirements for lavatories, sinks, and bidets	32
4.8.1	Openings and mounting surfaces for supply fittings	32
4.8.2	Wall-mounted commercial lavatories and sinks	33
4.8.3	Spuds for clinic sinks	33
4.9	Additional requirements for bathtubs and shower bases	33
4.9.1	Minimum dimensions for bathtubs	33
4.9.2	Slope to the waste outlet	33
4.9.3	Flanges	33
4.9.4	Supply fittings	34
4.10	Additional requirements for drinking fountains	34
4.10.1	General	34
4.10.2	Supply fittings	34
4.11	Accessible design fixtures	34

5 Flushing devices used with fixtures 34

5.1	General	34
5.1.1	Hydraulic performance	34
5.1.2	Air gaps, vacuum breakers, or backflow preventers	35
5.2	Gravity flush tanks	35
5.2.1	General	35
5.2.2	Fill valve opening diameter and location	35
5.2.3	Critical level	35
5.2.4	Low-profile gravity tanks	35
5.2.5	Water closet fill valve	35
5.2.6	Water closet tank capacity	35
5.3	Pressurized flushing devices	35
5.3.1	General	35
5.3.2	Low-profile tanks with pressurized flushing devices	35
5.4	Plastic water closet tanks	36
5.5	Electrical components of electrohydraulic water closets	36
5.5.1	Pump motor and impeller	36
5.5.2	Jet hose	36
5.5.3	Electrical supply cord	36
5.5.4	Wiring harnesses and electrical controls	36
5.6	Dual-flush water closets	36
5.6.1	General	36
5.6.2	Operation	36

6 Tests — Materials, finishes, structural integrity, and seals 36

6.1	Water absorption test	37
6.1.1	Test specimen	37
6.1.2	Specimen preparation	37
6.1.3	Procedure	37
6.1.4	Report	37
6.1.5	Performance	37
6.2	Crazing test	37
6.2.1	Test specimen	37
6.2.2	Procedure	38

6.2.3	Performance	38
6.3	Surface examination	38
6.3.1	Procedure	38
6.3.2	Evaluation	38
6.3.3	Performance	39
6.3.4	Other fixtures	39
6.4	Warpage test	39
6.4.1	Procedure	39
6.4.2	Performance	39
6.5	Field-installed tiling-flange seal test	39
6.5.1	Procedure	39
6.5.2	Performance	39
6.6	Overflow test — Lavatories, sinks, and bidets	40
6.6.1	Procedure	40
6.6.2	Performance	40
6.7	Structural integrity tests for all wall-mounted plumbing fixtures and thin-wall lavatories	40
6.7.1	All wall-mounted fixtures and thin-wall lavatories	40
6.7.2	Wall-mounted water closets	40
6.7.3	Wall-mounted and thin-wall lavatories	41
6.7.4	Wall-mounted urinals	41
6.8	Structural integrity test for bathtubs, shower bases, and non-ceramic service sinks	41
6.8.1	Apparatus	41
6.8.2	Procedure	41
6.8.3	Performance	42
6.9	Joint seal test	42
6.10	Auger test	42
6.10.1	Procedure	42
6.10.2	Performance	42
6.11	Condensation-free (insulated) tank tests	42
6.11.1	Procedure	42
6.11.2	Performance	42
7	Water closet tests	42
7.1	General	43
7.1.1	All tests	43
7.1.2	Gravity flush tank water closets	43
7.1.3	Flushometer tank, electro-hydraulic, or other pressurized flushing device water closets	43
7.1.4	Flushometer valve water closets	43
7.1.5	Procedures for standardizing the water supply system	44
7.1.6	Test medium	44
7.1.7	Reports	45
7.2	Trap seal depth determination test	45
7.2.1	Apparatus	45
7.2.2	Procedure	45
7.2.3	Report	45
7.2.4	Performance	45
7.3	Water consumption test	45
7.3.1	General	45
7.3.2	Apparatus	45

7.3.3	Procedure	46
7.3.4	Report	46
7.3.5	Performance	46
7.4	Trap seal restoration test	46
7.4.1	Apparatus	46
7.4.2	Procedure	46
7.4.3	Report	46
7.4.4	Performance	46
7.5	Granule and ball test	47
7.5.1	Test media	47
7.5.2	Procedure	47
7.5.3	Report	47
7.5.4	Performance	47
7.6	Surface wash test	47
7.6.1	Test medium	47
7.6.2	Procedure	47
7.6.3	Report	48
7.6.4	Performance	48
7.7	Drain line transport characterization test	48
7.7.1	Test medium	48
7.7.2	Apparatus	48
7.7.3	Procedure	48
7.7.4	Report	49
7.7.5	Performance	49
7.8	Overflow test for gravity flush tanks	49
7.8.1	Apparatus	49
7.8.2	Procedure	49
7.8.3	Report	49
7.8.4	Performance	49
7.9	Waste extraction test	50
7.9.1	Apparatus	50
7.9.2	Test media	50
7.9.3	Waste extraction test procedure	52
7.9.4	Performance and report	52
7.9.5	Performance	52
7.10	Consistent water flow test	52
7.10.1	Procedure	52
7.10.2	Performance	52
7.11	Fill valve shutoff integrity test with increased water pressure	53
7.11.1	Procedure	53
7.11.2	Performance	53
7.12	Adjustability test for tank-type gravity water closets with original equipment	53
7.12.1	Procedure	53
7.12.2	Report	53
7.12.3	Performance	54
7.13	Adjustability test for tank-type gravity water closets with aftermarket closure seals	54
7.13.1	Procedure	54
7.13.2	Report	55
7.13.3	Performance	55

7.14	Dual-flush water closet tests	55
7.14.1	Full flush mode	55
7.14.2	Reduced flush mode	55
8	Urinal tests	57
8.1	General	57
8.1.1	Water-consuming vs. non-water-consuming urinals	57
8.1.2	Test pressures	57
8.1.3	Test results	57
8.2	Test apparatus and general instructions	57
8.2.1	Procedure	57
8.2.2	Urinal discharge	57
8.2.3	Applicable test pressure(s)	57
8.2.4	Flushing device	58
8.2.5	Test results	58
8.3	Trap seal depth determination test	58
8.3.1	Apparatus	58
8.3.2	Procedure	58
8.3.3	Report	58
8.3.4	Performance	58
8.4	Surface wash test	58
8.4.1	Test medium	58
8.4.2	Procedure	58
8.4.3	Report	59
8.4.4	Performance	59
8.5	Dye test	59
8.5.1	Test medium and apparatus	59
8.5.2	Procedure	59
8.5.3	Report	59
8.5.4	Performance	60
8.6	Water consumption test	60
8.6.1	Apparatus	60
8.6.2	Procedure	60
8.6.3	Report	60
8.6.4	Performance	60
8.7	Tests for non-water-consuming urinals	60
9	Markings, packaging, and installation instructions and other literature	60
9.1	General	60
9.1.1	General	60
9.1.2	Requirements	61
9.1.3	Permanent markings and adhesive labels	61
9.2	Non-standard fixtures	61
9.3	Additional markings for water closets and urinals	61
9.3.1	Close-coupled water closets	61
9.3.2	Water consumption	61
9.3.3	Water level mark in gravity flush tank water closets	61
9.3.4	Water closet tank repair parts	62
9.3.5	Dual-flush water closets	62

9.4	Field-installed flanges	62
9.5	Packaging	62
9.5.1	General	62
9.5.2	Water closets and urinals	62
9.6	Installation instructions and other literature	62
9.6.1	General	62
9.6.2	Water closets	63
9.6.3	Urinals	63
9.6.4	Field-installed flange kits	63

Preface

This is the fourth edition of ASME A112.19.2/CSA B45.1, *Ceramic plumbing fixtures*. It supersedes the previous editions published in 2018, 2013, and 2008.

This Standard is considered suitable for use for conformity assessment within the stated scope of the Standard.

This Standard was approved by the CSA Technical Committee on Plumbing Fixtures, under the jurisdiction of the CSA Strategic Steering Committee on Construction and Civil Infrastructure and the ASME Standards Committee on Plumbing Materials and Equipment.

This Standard has been developed in compliance with Standards Council of Canada requirements for National Standards of Canada. It has been published as a National Standard of Canada by CSA Group.

This Standard has been approved by the American National Standards Institute (ANSI) as an American National Standard.

ASME Notes:

- 1) *The next edition of this Standard is scheduled for publication in 2029.*
- 2) *This standard was developed under procedures accredited as meeting the criteria for American National Standards and it is an American National Standard. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.*
- 3) *ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.*
- 4) *ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.*
- 5) *Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this standard.*
- 6) *ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.*
- 7) *ASME issues written replies to inquiries concerning interpretation of technical aspects of this standard. An Interpretation can be rendered only in response to a request submitted through the online Interpretation Submittal Form at <http://go.asme.org/InterpretationRequest>. ASME procedures provide for reconsideration of any interpretation when or if additional information that might affect an interpretation is available. Further, persons aggrieved by an interpretation may appeal to the cognizant ASME committee. Interpretations are published in the ASME Interpretations Database at <http://go.asme.org/Interpretations> as they are issued.*

CSA Notes:

- 1) *Use of the singular does not exclude the plural (and vice versa) when the sense allows.*
- 2) *Although the intended primary application of this Standard is stated in its Scope, it is important to note that it remains the responsibility of the users of the Standard to judge its suitability for their particular purpose.*
- 3) *This Standard was developed by consensus, which is defined by CSA Policy governing standardization — Code of good practice for standardization as “substantial agreement. Consensus implies much more than a simple majority, but not necessarily unanimity”. It is consistent with this definition that a member may be included in the Technical Committee list and yet not be in full agreement with all clauses of this Standard.*
