

SECTION VIII

Rules for Construction of Pressure Vessels

2025

ASME Boiler and
Pressure Vessel Code
An International Code

Division 1

Markings such as “ASME,” “ASME Standard,” or any other marking including “ASME,” ASME logos, or the ASME Single Certification Mark shall not be used on any item that is not constructed in accordance with all of the applicable requirements of the Code or Standard. Use of the ASME Single Certification Mark requires formal ASME certification; if no certification program is available, such ASME markings may not be used. (For Certification and Accreditation Programs, see <https://www.asme.org/certification-accreditation>.)

Items produced by parties not formally possessing an ASME Certificate may not be described, either explicitly or implicitly, as ASME certified or approved in any code forms or other document.

AN INTERNATIONAL CODE

2025 ASME Boiler & Pressure Vessel Code

2025 Edition

July 1, 2025

VIII RULES FOR CONSTRUCTION OF PRESSURE VESSELS

Division 1

ASME Boiler and Pressure Vessel Committee
on Pressure Vessels

The American Society of
Mechanical Engineers

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: July 1, 2025

This international code or standard was developed under procedures accredited as meeting the criteria for American National Standards and it is an American National Standard. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code or standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “certify,” “rate,” or “endorse” any item, construction, proprietary device, or activity. ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

The endnotes and preamble in this document (if any) are part of this American National Standard.

ASME Collective Membership Mark

ASME Single Certification Mark

1-7	Large Openings in Cylindrical and Conical Shells	411
1-8	Rules for Reinforcement of Cones and Conical Reducers Under External Pressure	413
Mandatory Appendix 2	Rules for Bolted Flange Connections With Ring Type Gaskets	418
2-1	General	418
2-2	Materials	418
2-4	Circular Flange Types	419
2-15	Qualification of Assembly Procedures and Assemblers	419
Mandatory Appendix 3	Definitions	422
3-1	Introduction	422
3-2	Definitions of Terms	422
Mandatory Appendix 4	Rounded Indications Charts Acceptance Standard for Radio- graphically Determined Rounded Indications in Welds ...	425
4-1	Applicability of These Standards	425
4-2	Terminology	425
4-3	Acceptance Criteria	425
Mandatory Appendix 5	Flexible Shell Element Expansion Joints	433
Mandatory Appendix 6	Methods for Magnetic Particle Examination (MT)	434
6-1	Scope	434
6-2	Certification of Competency for Nondestructive Examination Personnel	434
6-3	Evaluation of Indications	434
6-4	Acceptance Standards	434
6-5	Repair Requirements	434
Mandatory Appendix 7	Examination of Steel Castings	436
7-1	Scope	436
7-2	Examination Techniques	436
7-3	Examination Requirements	436
7-4	Repairs	437
7-5	Identification and Marking	438
Mandatory Appendix 8	Methods for Liquid Penetrant Examination (PT)	439
8-1	Scope	439
8-2	Certification of Competency of Nondestructive Examination Personnel	439
8-3	Evaluation of Indications	439
8-4	Acceptance Standards	439
8-5	Repair Requirements	439
Mandatory Appendix 9	Jacketed Vessels	441
Mandatory Appendix 10	Quality Control System	442
10-1	General	442
10-2	Outline of Features to Be Included in the Written Description of the Quality Control System	442
10-3	Authority and Responsibility	442
10-4	Organization	442
10-5	Drawings, Design Calculations, and Specification Control	442
10-6	Material Control	443
10-7	Examination and Inspection Program	443
10-8	Correction of Nonconformities	443
10-9	Welding and Brazing	443
10-10	Nondestructive Examination	443
10-11	Heat Treatment	443

10-12	Calibration of Measurement and Test Equipment	443
10-13	Records Retention	443
10-14	Sample Forms	444
10-15	Inspection of Vessels and Vessel Parts	444
10-16	Certifications	444
Mandatory Appendix 12	Ultrasonic Examination of Welds (UT)	445
12-1	Scope	445
12-2	Certification of Competence of Nondestructive Examiner	445
12-3	Acceptance-Rejection Standards	445
12-4	Report of Examination	445
Mandatory Appendix 13	Vessels of Noncircular Cross Section	446
Mandatory Appendix 14	Integral Flat Heads With a Large, Single, Circular, Centrally Located Opening	447
14-1	Scope	447
14-2	Nomenclature	447
14-3	Design Procedure	447
14-4	Data Reports	447
Mandatory Appendix 17	Dimpled or Embossed Assemblies	448
Mandatory Appendix 18	Adhesive Attachment of Nameplates	449
18-1	Scope	449
18-2	Nameplate Application Procedure Qualification	449
Mandatory Appendix 19	Electrically Heated or Gas-Fired Jacketed Steam Kettles	450
Mandatory Appendix 20	Hubs Machined From Plate	451
20-1	Scope	451
20-2	Material	451
20-3	Examination Requirements	451
20-4	Data Reports	451
Mandatory Appendix 21	Jacketed Vessels Constructed of Work-Hardened Nickel	452
21-1	Scope	452
21-2	Design Requirements	452
21-3	Fabrication	452
21-4	Data Reports	452
Mandatory Appendix 22	Integrally Forged Vessels	453
Mandatory Appendix 23	External Pressure Design of Copper, Copper Alloy, and Tita- nium Alloy Condenser and Heat Exchanger Tubes With In- tegral Fins	454
23-1	Scope	454
23-2	Materials	454
23-3	Test Procedure	454
23-4	Criteria	454
23-5	Data Reports	455
Mandatory Appendix 24	Design Rules for Clamp Connections	456
Mandatory Appendix 26	Bellows Expansion Joints	457
Mandatory Appendix 27	Alternative Requirements for Glass-Lined Vessels	458
Mandatory Appendix 30	Rules for Drilled Holes Not Penetrating Through Vessel Wall	459
30-1	Scope	459
30-2	Supplementary Requirements	459
30-3	Nomenclature	460

Mandatory Appendix 31	Rules for Cr-Mo Steels With Additional Requirements for Welding and Heat Treatment	461
31-1	Scope	461
31-2	Postweld Heat Treatment	461
31-3	Test Specimen Heat Treatment	462
31-4	Welding Procedure Qualification and Welding Consumables Testing	463
31-5	Toughness Requirements	463
Mandatory Appendix 32	Local Thin Areas in Cylindrical Shells and in Spherical Segments of Shells	464
32-1	Scope	464
32-2	General Requirements	464
32-3	Nomenclature	464
32-4	Allowable Locations for Local Thin Areas	465
32-5	Blend Grinding Requirements for Local Thin Areas	466
32-6	Single Local Thin Areas in Cylindrical Shells	466
32-7	Multiple Local Thin Areas in Cylindrical Shells	467
32-8	Single Local Thin Areas in Spherical Segments of Shells	467
32-9	Multiple Local Thin Areas in Spherical Segments of Shells	467
32-10	Data Reports	467
Mandatory Appendix 34	Requirements for Use of High Silicon Stainless Steels for Pressure Vessels	468
34-1	Scope	468
34-2	Heat Treatment	468
34-3	Weld Procedure Qualification	468
34-4	Toughness Requirements	469
34-5	Additional Requirements	469
Mandatory Appendix 35	Rules for Mass Production of Pressure Vessels	470
35-1	Introduction	470
35-2	Scope	470
35-3	General	470
35-4	Quality Control Procedures	470
35-5	Data Reports	471
35-6	Pneumatic Testing	471
35-7	Hydrostatic Testing	472
Mandatory Appendix 36	Standard Test Method for Determining the Flexural Strength of Certified Materials Using Three-Point Loading	473
Mandatory Appendix 37	Standard Test Method for Determining the Tensile Strength of Certified Impregnated Graphite Materials	474
Mandatory Appendix 38	Standard Test Method for Compressive Strength of Impregnated Graphite	475
Mandatory Appendix 39	Testing the Coefficient of Permeability of Impregnated Graphite	476
Mandatory Appendix 40	Thermal Expansion Test Method for Graphite and Impregnated Graphite	477
Mandatory Appendix 41	Electric Immersion Heater Element Support Plates	478
41-1	Scope	478
41-2	Materials and Methods of Fabrication	478
41-3	Terminology	478
41-4	Conditions of Applicability for EIH Support Plates	478
41-5	Nomenclature	478
41-6	Design Considerations	480

43-1	General	485
43-2	Construction	485
43-3	Materials	485
Mandatory Appendix 44	Cold Stretching of Austenitic Stainless Steel Pressure Vessels	486
44-1	Scope	486
44-2	General Requirements	486
44-3	Nomenclature	486
44-4	Materials and Allowable Design Stress	486
44-5	Design	486
44-6	Fabrication Process	487
44-7	Stamping and Certification	488
Mandatory Appendix 45	Plate Heat Exchangers	489
Mandatory Appendix 46	Rules for Use of Section VIII, Division 2	490
46-1	Scope	490
46-2	Allowable Design Stress and Other Material Rules	490
46-3	Design by Rule	490
46-4	Design by Analysis	491
Mandatory Appendix 47	Requirements for Pressure Vessel Designers	492
47-1	Introduction	492
47-2	Manufacturer's Responsibilities	492
47-3	Designer's Responsibilities	492
Mandatory Appendix 48	Vessels With Acrylic Cylindrical Shells	493
Nonmandatory Appendix C	Suggested Methods for Obtaining the Operating Temperature of Vessel Walls in Service	494
C-1	Thermocouple Installation	494
C-2	Alternative Thermocouple Installation	494
Nonmandatory Appendix D	Suggested Good Practice Regarding Internal Structures	495
D-1	Introduction	495
D-2	Internal Structures Support	495
D-3	Internal Structures Support Guidelines	495
Nonmandatory Appendix E	Suggested Good Practice Regarding Corrosion Allowance	496
E-1	General	496
E-2	Predictable Corrosion Rate	496
E-3	Indeterminate Corrosion Rate	496
E-4	Negligible Corrosion Rate	496
E-5	Corrosive Service	496
E-6	External Attachment Corrosion Rate	496
Nonmandatory Appendix F	Suggested Good Practice Regarding Linings	497
F-1	General	497
F-2	Metal Linings	497
F-3	Paint	497
F-4	Hydrotest Considerations for Metal Linings	497
Nonmandatory Appendix G	Suggested Good Practice Regarding Piping Reactions and Design of Supports and Attachments	498
G-1	General	498

G-2	Supports Considerations	498
G-3	Vertical Vessels, Post Supported	498
G-4	Vertical Vessels Supported at Shell	498
G-5	Vertical Vessels, Skirt Supported	498
G-6	Horizontal Vessel Supports	499
G-7	Horizontal Gas Storage Tank Supports	499
G-8	Attachments Subject to Cyclic Loading	499
G-9	Additional References	499
Nonmandatory Appendix H	Guidance to Accommodate Loadings Produced by	
	Deflagration	500
H-1	Scope	500
H-2	General	500
H-3	Design Limitations	500
H-4	Design Criteria	500
H-5	References	501
Nonmandatory Appendix K	Sectioning of Welded Joints	502
K-1	Etch Tests	502
K-2	Closure of Openings Resulting From Sectioning	502
K-3	Preheating	503
Nonmandatory Appendix L	Application of Rules for Joint Efficiency in Shells and Heads of	
	Vessels With Welded Joints	504
L-1	Vessels Under Internal Pressure	504
Nonmandatory Appendix M	Installation and Operation	509
M-1	Introduction	509
M-2	Corrosion	509
M-3	Marking on the Vessel	509
M-4	Pressure-Relieving Devices	509
M-5	Stop Valves Located in the Relief Path	509
M-6	Inlet Pressure Drop for High Lift, Top-Guided Safety, Safety Relief, and Pilot-Operated Pressure Relief Valves in Compressible Fluid Service	509
M-7	Discharge Lines From Pressure Relief Devices	510
M-8	Pressure Drop, Nonreclosing Pressure Relief Devices	510
M-9	General Advisory Information on the Characteristics of Pressure Relief Devices Discharging Into a Common Header	510
M-10	Pressure Differentials for Pressure Relief Valves	510
M-11	Installation of Pressure Relief Valves	511
M-12	Reaction Forces and Externally Applied Loads	512
M-13	Sizing of Pressure Relief Devices for Fire Conditions	512
M-14	Pressure-Indicating Device	512
Nonmandatory Appendix P	Basis for Establishing Allowable Stress Values for Parts UCI,	
	UCD, and ULT Materials	513
P-1	513
Nonmandatory Appendix R	Preheating	514
	Introduction	514
R-1	P-No. 1 Group Nos. 1, 2, and 3	514
R-2	P-No. 3 Group Nos. 1, 2, and 3	514
R-3	P-No. 4 Group Nos. 1 and 2	514
R-4	P-Nos. 5A and 5B Group No. 1	514
R-5	P-No. 6 Group Nos. 1, 2, and 3	514
R-6	P-No. 7 Group Nos. 1 and 2	514
R-7	P-No. 8 Group Nos. 1 and 2	514
R-8	P-No. 9 Groups	514

R-9	P-No. 10 Groups	514
R-10	P-No. 11 Groups	514
R-11	P-No. 15E Group No. 1	515
Nonmandatory Appendix S	Design Considerations for Bolted Flange Connections	516
S-1	Bolting	516
Nonmandatory Appendix T	Temperature Protection	518
Nonmandatory Appendix W	Guide for Preparing Manufacturer's Data Reports	519
W-1	Guide for Preparing Manufacturer's Data Reports	519
W-2	Guide for Preparing Supplemental Data Reports for Parts Constructed of Graphite	519
Nonmandatory Appendix Y	Flat Face Flanges With Metal-to-Metal Contact Outside the Bolt Circle	549
Y-1	General	549
Y-2	Materials	550
Y-3	Notation	550
Y-4	Bolt Loads	554
Y-5	Classification of Assemblies and Categorization of Individual Flanges	554
Y-6	Flange Analysis	556
Y-7	Allowable Flange Design Stresses	560
Y-8	Prestressing the Bolts	560
Y-9	Estimating Flange Thicknesses and Bolting	560
Y-10	562
Nonmandatory Appendix EE	Half-Pipe Jackets	563
EE-1	General	563
Nonmandatory Appendix FF	Guide for the Design and Operation of Quick-Actuating and Quick-Opening Closures	564
Nonmandatory Appendix GG	Guidance for the Use of U.S. Customary and SI Units in the ASME Boiler and Pressure Vessel Code	565
GG-1	Use of Units in Equations	565
GG-2	Guidelines Used to Develop SI Equivalents	565
GG-3	Soft Conversion Factors	567
Nonmandatory Appendix HH	Tube Expanding Procedures and Qualification	568
HH-1	General	568
HH-2	Scope	568
HH-3	Terms and Definitions	568
HH-4	Tube Expanding Procedure Specification (TEPS)	569
HH-5	Tube Expanding Procedure Qualification	569
HH-6	Tube Expanding Performance Qualification (TEPQ)	569
HH-7	Tube Expanding Variables	569
Nonmandatory Appendix JJ	Flowcharts Illustrating Toughness Testing Requirements and Exemptions From Toughness Testing by the Rules of UHA-51	576
JJ-1	UHA-51 Toughness Test Requirements for High Alloy Vessels	576
Nonmandatory Appendix KK	Guide for Preparing User's Design Requirements	582
KK-1	Introduction	582
Nonmandatory Appendix LL	Graphical Representations of $F_{t,min}$ and $F_{t,max}$	588
Nonmandatory Appendix MM	Alternative Marking and Stamping of Graphite Pressure Vessels	589

Nonmandatory Appendix NN	Guidance to the Responsibilities of the User and Designated Agent	590
NN-1	Introduction	590
NN-2	Information Regarding the “User” Designation	590
NN-3	Information Regarding the User’s “Designated Agent”	590
NN-4	Common Scenarios Involving the “User” or “Designated Agent” Responsibilities	591
NN-5	Examples Illustrating the NN-4 Common Scenarios Involving the “User or the User’s Designated Agent”	591
NN-6	Specific Code-Assigned Responsibilities	592

UG-40	Some Representative Configurations Describing the Reinforcement Dimension t_e and the Opening Dimension d	50
UG-41.1	Nozzle Attachment Weld Loads and Weld Strength Paths to Be Considered	53
UG-42	Examples of Multiple Openings	55
UG-47	Acceptable Proportions for Ends of Stays	60
UG-53.1	Example of Tube Spacing With Pitch of Holes Equal in Every Row	62
UG-53.2	Example of Tube Spacing With Pitch of Holes Unequal in Every Second Row	62
UG-53.3	Example of Tube Spacing With Pitch of Holes Varying in Every Second and Third Row	62
UG-53.4	Example of Tube Spacing With Tube Holes on Diagonal Lines	63
UG-53.5	Diagram for Determining the Efficiency of Longitudinal and Diagonal Ligaments Between Openings in Cylindrical Shells	64
UG-53.6	Diagram for Determining Equivalent Longitudinal Efficiency of Diagonal Ligaments Between Openings in Cylindrical Shells	65
UG-80.1	Maximum Permissible Deviation From a Circular Form e for Vessels Under External Pressure	68
UG-80.2	Example of Differences Between Maximum and Minimum Inside Diameters in Cylindrical, Conical, and Spherical Shells	68
UG-84.2-1	Simple Beam Impact Test Specimens (Charpy Type Test)	70
UG-84.5-1	Charpy V-Notch Impact Test Requirements for Full-Size Specimens for Carbon and Low Alloy Steels, Having a Specified Minimum Tensile Strength of Less Than 95 ksi, Listed in Table UCS-23	73
UG-84.5-1M	Charpy V-Notch Impact Test Requirements for Full-Size Specimens for Carbon and Low Alloy Steels, Having a Specified Minimum Tensile Strength of Less Than 655 MPa, Listed in Table UCS-23	74
UG-84.8-1	Location of HAZ Specimen Removal	76
UG-84.8-2	HAZ Impact Specimen Removal	76

UG-116	Official Certification Mark to Denote the American Society of Mechanical Engineers' Standard	93
UG-118	Form of Stamping	96
UW-3	Illustration of Welded Joint Locations Typical of Categories A, B, C, D, and F	106
UW-9-1	Butt Welding of Plates of Unequal Thickness	108
UW-9-2	Butt Welding of Components to Thickened Neck Nozzles	108
UW-9-3	Butt Welding With One Plate Edge Offset	110
UW-13.1	Heads Attached to Shells	113
UW-13.2	Attachment of Pressure Parts to Flat Plates to Form a Corner Joint	116
UW-13.3	Typical Pressure Parts With Butt-Welded Hubs	121
UW-13.4	Nozzle Necks Attached to Piping of Lesser Wall Thickness	121
UW-13.5	Fabricated Lap Joint Stub Ends for Lethal Service	122
UW-16.1	Some Acceptable Types of Welded Nozzles and Other Connections to Shells, Heads, etc.	123
UW-16.2	Some Acceptable Types of Small Standard Fittings	130
UW-16.3	Some Acceptable Types of Small Bolting Pads	131
UW-19.1	Typical Forms of Welded Staybolts	133
UW-19.2	Use of Plug and Slot Welds for Staying Plates	133
UW-20.1	Tube-to-Tubesheet Joints Acceptable to Determine Joint Strength by Calculation	138
UW-20.2	Some Acceptable Types of Tube-to-Tubesheet Welds	139
UW-20.3	Typical Test Fixtures for Expanded or Welded Tube-to-Tubesheet Joints	141
UW-21	Typical Details for Slip-On and Socket Welded Flange Attachment Welds	144
UB-14	Examples of Filler Metal Application	162
UB-16	Some Acceptable Types of Brazed Joints	163
UCS-66	Impact Test Exemption Curves	183
UCS-66M	Impact Test Exemption Curves	186
UCS-66.1	Reduction in Minimum Design Metal Temperature Without Impact Testing	192
UCS-66.1M	Reduction in Minimum Design Metal Temperature Without Impact Testing	193
UCS-66.2	Diagram of UCS-66 Rules for Determining Lowest Minimum Design Metal Temperature (MDMT) Without Impact Testing	194
UCS-66.3	Some Typical Vessel Details Showing the Governing Thicknesses as Defined in UCS-66	196
UHA-51-1	Weld Metal Delta Ferrite Content	227
UHT-6.1	Charpy V-Notch Impact Test Requirements	244
UHT-6.1M	Charpy V-Notch Impact Test Requirements	244
UHT-18.1	Acceptable Welded Nozzle Attachment Readily Radiographed to Code Standards	246
UHT-18.2	Acceptable Full Penetration Welded Nozzle Attachments Radiographable With Difficulty and Generally Requiring Special Techniques Including Multiple Exposures to Take Care of Thickness Variations	247
ULW-2.1	Some Acceptable Layered Shell Types	255
ULW-2.2	Some Acceptable Layered Head Types	256
ULW-17.1	Transitions of Layered Shell Sections	258
ULW-17.2	Some Acceptable Solid Head Attachments to Layered Shell Sections	259
ULW-17.3	Some Acceptable Flat Heads and Tubesheets With Hubs Joining Layered Shell Sections	261
ULW-17.4	Some Acceptable Flanges for Layered Shells	262
ULW-17.5	Some Acceptable Layered Head Attachments to Layered Shells	263
ULW-17.6	Some Acceptable Welded Joints of Layered-to-Layered and Layered-to-Solid Sections	264
ULW-18.1	Some Acceptable Nozzle Attachments in Layered Shell Sections	266
ULW-22	Some Acceptable Supports for Layered Vessels	268
ULW-32.1	Solid-to-Layered and Layered-to-Layered Test Plates	270
ULW-32.2		271
ULW-32.3		271
ULW-32.4		272
ULW-54.1		273
ULW-54.2		274
ULW-77		276
UCC-1	Typical Hub and Clamp	289
UCC-2	Typical Clamp Lug Configurations	290
UDA-1-1	Two Embossed Plates	299

UDA-1-2	Two Dimpled Plates	299
UDA-1-3	Embossed Plate to Plain Plate	299
UDA-1-4	Arc-Spot-Welded Two-Layer Assembly	299
UDA-1-5	Dimpled Plate Welded to Plain Plate	300
UDA-1-6	Three-Ply Assemblies	300
UDA-1-7	Complete Penetration Welding Per UDA-1(c)	300
UDA-6-1	Spot Weld Test Panel	300
UDA-6-2	Pillow Height	300
UDA-7-1	Single-Spot-Weld Tension Specimen, Two-Ply Joint	300
UDA-7-2	Seam-Weld Specimen for Tension and Macrosection, Two-Ply Joint	301
UDA-7-3	Single Spot-Weld Tension Specimen for Three-Ply Joint	301
UDA-7-4	Seam-Weld Specimen for Tension and Macrosection for Three-Ply Joint	301
UDA-7-5	Gas Tungsten-Arc Seam Weld, Plasma-Arc Seam Weld, Submerged-Arc Seam Weld, and Laser Beam Seam Weld Test Specimen for Bend Tests	302
UDA-7-6	Gas Metal Arc-Spot-Weld Block for Macrosections and Strength Tests	303
UDA-7-7	Gas Metal Arc-Spot-Weld Block for Bend Tests	304
UDA-8-1	Peel Test	305
UEB-13	Some Typical Expansion Bellows to Weld End Details	308
UEB-14	Toroidal Bellows Manufacturing Tolerances	309
UEJ-3-1	Typical Flexible Shell Element Expansion Joints	317
UIF-1	Typical Sections of Special Seamless Vessels	323
UIG-34-1	Typical Graphite Shell and Tube Heat Exchanger	333
UIG-34-2	Fixed Tubesheet Configurations	334
UIG-34-3	Floating Tubesheet Configurations	335
UIG-34-4	Tubesheet Geometry	337
UIG-35-1	Cross-Drilled Blocks	341
UIG-35-2	Cross-Drilled Block Ligaments	341
UIG-36-1	Unacceptable Nozzle Attachment Details	342
UIG-36-2	Some Acceptable Nozzle Attachment Details in Impervious Graphite Pressure Vessels	343
UIG-76-1	Block Tension Test Specimen	348
UIG-76-1M	Block Tension Test Specimen	349
UIG-76-2	Cement Material Tension Test Specimen	350
UIG-76-2M	Cement Material Tension Test Specimen	351
UIG-76-3	Tube-to-Tubesheet Tension Test Specimen	352
UIG-76-3M	Tube-to-Tubesheet Tension Test Specimen	353
UIG-76-4	Tube Cement Joint Tension Test Specimen	354
UIG-76-4M	Tube Cement Joint Tension Test Specimen	355
UIG-76-5	Tube Tension Test Specimen	356
UIG-76-5M	Tube Tension Test Specimen	357
UIG-76-6	Compound Tension Test Specimen	358
UIG-76-6M	Compound Tension Test Specimen	359
UIG-101.4-1	Test Specimen Arrangement	364
UIG-104.4-1	Schematic Diagram of Vacuum Apparatus	368
UIG-105.3-1	Typical Equipment (Dilometer) for Thermal Expansion Test	369
UIG-105.6-1	Typical Recording Curve in Thermal Expansion Test, $\Delta L_t = f(\theta)$	370
UPX-3.1-1	Typical Plate Heat Exchanger	400
UPX-6-1	PHE Dimensions	401
1-4	Principal Dimensions of Typical Heads	405
1-6	Dished Covers With Bolting Flanges	410
1-7-1	412
1-7-2	414
4-1	Aligned Rounded Indications	426
4-2	Groups of Aligned Rounded Indications	427
4-3	Charts for t Equal to $\frac{1}{8}$ in. to $\frac{1}{4}$ in. (3 mm to 6 mm), Inclusive	428
4-4	Charts for t Over $\frac{1}{4}$ in. to $\frac{3}{8}$ in. (6 mm to 10 mm), Inclusive	429
4-5	Charts for t Over $\frac{3}{8}$ in. to $\frac{3}{4}$ in. (10 mm to 19 mm), Inclusive	429

4-6	Charts for t Over $\frac{3}{4}$ in. to 2 in. (19 mm to 50 mm), Inclusive	430
4-7	Charts for t Over 2 in. to 4 in. (50 mm to 100 mm), Inclusive	431
4-8	Charts for t Over 4 in. (100 mm)	432
30-1	Thickness Ratio Versus Diameter Ratio	459
31-1		462
32-3	Nomenclature	464
32-4-1	Limits for Torispherical Head	465
32-4-2	Limits for Ellipsoidal Head	466
32-4-3	Limits for Hemispherical Head	466
32-5-1	LTA Blend Grinding	467
41-1-1	EIH Support Plate Gasketed With Mating Flange	478
41-4-1	Typical EIH Support Plate and Element Geometry	479
41-5-1	Some Representative Configurations Describing the Minimum Required Thickness of the EIH Support Plate Flanged Extension, h_r	480
41-7-1	Curves for the Determination of E^*/E and v^* (Equilateral Triangular Pattern)	482
41-7-2	Curves for the Determination of E^*/E and v^* (Square Pattern)	483
K-2	Some Acceptable Types of Filler Plugs	503
L-1.4-1	Joint Efficiency and Weld Joint Type — Cylinders and Cones	505
L-1.4-2	Joint Efficiency and Weld Joint Type — Heads	506
L-1.4-3	Joint Efficiencies for Category A and D Welded Joints in Shells, Heads, or Cones	507
L-1.4-4	Joint Efficiencies for Category B and C Welded Joints in Shells or Cones	508
