ASME STANDARDS  
TECHNOLOGY, LLC

Date of Issuance: June 30, 2015

This report was prepared as an account of work sponsored by ASME Nuclear Codes and Standards and ASME Standards Technology, LLC (ASME ST-LLC).

Neither ASME, ASME ST-LLC, the author, nor others involved in the preparation or review of this report, nor any of their respective employees, members or persons acting on their behalf, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness or usefulness of any information, apparatus, product or process disclosed, or represents that its use would not infringe upon privately owned rights.

Reference herein to any specific commercial product, process or service by trade name, trademark, manufacturer or otherwise does not necessarily constitute or imply its endorsement, recommendation or favoring by ASME ST-LLC or others involved in the preparation or review of this report, or any agency thereof. The views and opinions of the authors, contributors and reviewers of the report expressed herein do not necessarily reflect those of ASME ST-LLC or others involved in the preparation or review of this report, or any agency thereof.

ASME ST-LLC does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a publication against liability for infringement of any applicable Letters Patent, nor assumes any such liability. Users of a publication are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this publication.

June 2015

# STP-NU-061-1

## COMPREHENSIVE EVALUATION OF THE NSQ-100 NUCLEAR SAFETY AND QUALITY MANAGEMENT SYSTEM REQUIREMENTS OF ASME NQA-1

The following changes have been made to the first revision of STP-NU-061-1:

### Annex A

#### ASME NQA-1-2012

General change to all 18 NQA sections lead pages, from “100 Basic” to “100 General”

- Page 13 Requirement 1, 201 General (c) quality achievement is verified by those not directly responsible for performing the work
- Page 15-20 Requirement 2, 100 General deletion of “The program shall identify the activities and items to which it applies.”
- Page 24 Requirement 3 revise first paragraph “The design shall be defined, controlled, and verified.”
- Page 30 Requirement 3 300 Design Verification, revise and add to (a) paragraph “This verification may be performed by the originator’s supervisor, provided (1) the supervisor did not specify a singular design approach or rule out certain design considerations and did not establish the design inputs used in the design; or (2) the supervisor is the only individual in the organization competent to perform the verification. cursory supervisory reviews do not satisfy the intent of this Standard.”
- Page 62 Requirement 12 303 Control delete paragraph “Methods and frequency of checking accuracy shall be defined in procedures.”

### Annex B

#### ASME NQA-1 2012

General change to all 18 NQA sections lead pages, from “100 Basic” to “100 General”

- Page 82 Requirement 1, 201 General (c) quality achievement is verified by those not directly responsible for performing the work
- Page 84 Requirement 2, 100 General deletion of “The program shall identify the activities and items to which it applies.”
- Page 92 Requirement 3 100 General revise first paragraph “The design shall be defined, controlled, and verified.”
- Page 98 Requirement 3 500 Design Verification, revise and add to (a) paragraph “This verification may be performed by the originator’s supervisor, provided (1) the supervisor did not specify a singular design approach or rule out certain design considerations and did not establish the design inputs used in the design; or (2) the supervisor is the only individual in the organization competent to perform the verification. cursory supervisory reviews do not satisfy the intent of this Standard.”

## Annex C

### ASME Section III

- Page 149-150 NCA-4134.2 Subparagraph (c) revised
- Page 189-190 NCA-4134.6 revised
- Page 232 NCA-4134.17 New subpara. (e) added; former subpara. (e) redesignated as (f)

### ASME NQA-1 2012

#### General change to all 18 NQA sections lead pages, from “100 Basic” to “100 General”

- Page 147 Requirement 1, 201 General (c) quality achievement is verified by those not directly responsible for performing the work
- Page 149-152 Requirement 2, 100 General deletion of “The program shall identify the activities and items to which it applies.”
- Page 162 Requirement 3 100 General revise first paragraph “The design shall be defined, controlled, and verified.”
- Page 169 Requirement 3 500 Design Verification, revise and add to (a) paragraph “This verification may be performed by the originator’s supervisor, provided (1) the supervisor did not specify a singular design approach or rule out certain design considerations and did not establish the design inputs used in the design; or (2) the supervisor is the only individual in the organization competent to perform the verification. cursory supervisory reviews do not satisfy the intent of this Standard.”
- Page 219 Requirement 12 303 Control delete paragraph “Methods and frequency of checking accuracy shall be defined in procedures.”
- Page 229 Requirement 17, SubSection 100 General delete 4<sup>th</sup> paragraph “The term records, used throughout this section, is to be interpreted as quality assurance records”

## Annex D

### ASME Section III NCA 2013, Subsections 3850

Page 245 NCA-3853.1 Subparagraph (d)

Page 250 NCA-3853.3 First sentence revised

Page 251-252 NCA-3855.5 (1) Subparagraphs (a), (a)(1), and (a)(3) revised; New subpara. (a)(4) added and subsequent subparagraph redesignated

Page 256-257 NCA-3856.3 Subparagraphs (c) and (e) revised

**TABLE OF CONTENTS**

Foreword..... vii

Abstract..... viii

Abbreviations and Acronyms .....ix

1 PURPOSE AND SCOPE ..... 1

2 NQSA ORGANIZATIONAL SUPPORT STRUCTURE.....2

3 DIFFERENCES OF STANDARD DEVELOPMENT ORGANIZATIONS ..... 3

4 IMPORTANT DIFFERENCE IN FOCUS OF REVIEWED DOCUMENTS ..... 4

5 EVALUATION RESULTS.....5

6 SUMMARY OF EVALUATION AND ASSESSMENT RESULTS .....7

References.....8

Annex A—NQA-1-2012 and NSQ-100 Comparison .....9

Annex B—NQA-1-2012 and NSQ-100 Certification Comparison .....75

Annex C—Certification Requirements Between Section III NCA 4100 and NSQ-100.....143

Annex D—Certification Comparison Section III NCA 3850 and NSQ-100 .....242

## FOREWORD

This technical report was developed to comprehensively evaluate the NSQ-100 document and its related guidance documents against the corresponding ASME products. Comparisons were made of the various corresponding documents of ASME and the Nuclear Quality Standard Association (NQSA). The report discusses the competitive strengths and weaknesses of the NSQ-100 products compared to the corresponding ASME products.

Established in 1880, the American Society of Mechanical Engineers (ASME) is a professional not-for-profit organization with more than 135,000 members and volunteers promoting the art, science and practice of mechanical and multidisciplinary engineering and allied sciences. ASME develops codes and standards that enhance public safety, and provides lifelong learning and technical exchange opportunities benefiting the engineering and technology community. Visit [www.asme.org](http://www.asme.org) for more information.

The ASME Standards Technology, LLC (ASME ST-LLC) is a not-for-profit Limited Liability Company, with ASME as the sole member, formed in 2004 to carry out work related to newly commercialized technology. The ASME ST-LLC mission includes meeting the needs of industry and government by providing new standards-related products and services, which advance the application of emerging and newly commercialized science and technology and providing the research and technology development needed to establish and maintain the technical relevance of codes and standards. Visit [www.stllc.asme.org](http://www.stllc.asme.org) for more information.
