Australian/New Zealand Standard™

Respiratory protective devices — Performance requirements

Part 2: Requirements for filtering RPD (ISO 17420-2:2021 (ED.1.0) MOD)

currently in review, click buy full version

AS/NZS 17420.2:2021

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee SF-010, Occupational Respiratory Protection. It was approved on behalf of the Council of Standards Australia on 02 July 2021 and by the New Zealand Standards Approval Board on 07 July 2021.

This Standard was published on 16 July 2021.

The following are represented on Committee SF-010:

Association of Accredited Certification Bodies
Australasian Fire and Emergency Service Authorities Council
Australian Industry Group
Australian Institute of Health & Safety
Australian Institute of Occupational Hygienists
Australian Institute of Petroleum
Better Regulation Division (Fair Trading, Safework NSW, TestSafe)
CSIRO
Composites Australia
Joint Accreditation System of Australia & New Zealand
National Measurement Institute
New Zealand Occupational Hygiene Society
Therapeutic Goods Administration
WorkSafe New Zealand

This Standard was issued in draft form for comment as DR AS/NZS 17420.2:2021.

Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee SF-010, Occupational Respiratory Protection.

The objective of this document is to specify requirements for the performance and testing of filtering respiratory protective devices (RPD) in accordance with their classification and for use in the workplace to protect the wearer from hazardous atmospheres and/or environments.

Requirements for RPD elements and components are also specified in this document.

This document is an adoption with national modifications, and has been reproduced from, ISO 17420-2:2021, *Respiratory protective devices — Performance requirements — Part 2: Requirements for filtering RPD*.

The modifications are additional requirements and are set out in [Appendix ZZ](#), which has been added at the end of the source text.

[Appendix ZZ](#) lists the variations to ISO 17420-2:2021 for the application of this document in Australia and New Zealand.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text “this part of 17420” should read “this Australian/New Zealand document”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms, definitions, abbreviations and symbols	2
3.1 Terms and definitions	2
3.2 Abbreviated terms	3
3.3 Symbols	3
4 Classification overview	4
5 General requirements for RPD	5
5.1 General	5
5.2 Field of vision	5
5.3 Resistance to flame – Single burner dynamic	5
5.4 Compatibility with additional equipment	5
5.5 Monitor performance	5
5.6 Warning device(s), checking device(s) and control means	6
5.6.1 Performance of warning device(s), if applicable	6
5.6.2 Performance of checking device	6
5.6.3 Control means (if applicable)	6
5.7 Protection class determination	6
5.7.1 General	6
5.7.2 Total inward leakage (TIL)	6
5.7.3 Total inward leakage requirement for RPD not using a standardized connector	7
5.8 Validation by practical performance	7
5.8.1 General	7
5.8.2 Donning/doffing	7
5.8.3 Communication performance - hearing and speech	7
5.8.4 Eye irritation caused by the RPD	7
5.8.5 Fogging of visor	7
5.8.6 Ergonomic requirements	7
5.9 Requirements for elements/components	7
6 Requirements for entering RPD	8
6.1 Determination of air flow rate of assisted RPD	8
6.2 Determination of the effect of temperature on flow rates for assisted RPD	8
6.3 Work of breathing, breathing resistance (peak pressure) and elastance	8
6.3.1 Work of breathing, breathing resistance (peak pressure) and elastance for unassisted RPD	8
6.3.2 Work of breathing, breathing resistance (peak pressure) and elastance for assisted RPD	9
6.4 CO ₂ concentration limits	11
6.4.1 CO ₂ concentration limits for assisted RPD	11
6.4.2 CO ₂ concentration limits of unassisted RPD	11
6.4.3 CO ₂ concentration limits for RI with standardized connector	12
6.5 Noise limit for assisted RPD	12
6.6 Temperature and humidity of inhaled air for RPD which protect against CO	12
6.7 Connections	13
6.7.1 General	13
6.7.2 Strength of connections – Connections to RI	13
6.7.3 Low pressure connections other than to the RI	15
6.8 Assessment of reliability	16

6.9	Pre-conditioning (Sequential/Non-sequential)	16
6.9.1	General	16
6.9.2	Sequential pre-conditioning	17
6.9.3	Non-sequential pre-conditioning	18
6.10	Requirements for elements/components	18
6.10.1	Filters	18
6.10.2	Flexibility and resistance to deformation of hoses	28
6.11	Requirements for RPD with standardized connector	28
6.11.1	General	28
6.11.2	Filters with standardized connector	29
6.11.3	RI with standardized connector	31
6.11.4	Protection class determination for RPD using standardized connector	32
6.11.5	RPD using standardized connector and low pressure hoses	32
6.12	Multi-functional RPD	33
6.13	Requirements for optional features	33
6.13.1	General	33
6.13.2	Extreme low temperature requirements	33
6.13.3	Extreme high temperature requirements	34
6.13.4	Contact with hot surface	34
6.13.5	Hydration	34
6.13.6	Performance of RPD using prefilters	35
6.13.7	Use of RPD in potentially explosive atmospheres	35
6.13.8	Electromagnetic compatibility of RPD	35
7	Testing	35
7.1	General	35
7.2	Inspection	35
7.3	Testing of leak tightness using positive pressure	36
7.4	Contact with hot surface	36
8	Marking	36
8.1	General	36
8.2	Marking of RPD without separable components	36
8.3	Marking of RPD replacement parts	37
8.4	Marking of RPD components as part of a system	37
8.4.1	RI	37
8.4.2	Marking of particle, gas, vapour or combination filters	38
8.4.3	Other separable components	38
9	Information supplied by the RPD manufacturer	39
9.1	General	39
9.2	RPD	39
9.2.1	Minimum information	39
9.2.2	Additional information	40
9.3	RPD components and replacement parts	40
9.3.1	Particle, gas/vapour or combination filters	40
9.3.2	RI	41
9.3.3	Other components or replacement parts	42
Annex A	(informative) Reliability	43
Annex B	(informative) Example of failure modes and effect analysis (FMEA)	45
Annex C	(normative) Test schedules	49
Annex D	(normative) Normalisation of test results	71

Appendix ZZ	(normative) Variations to ISO 17420-2:2021 for Australia and New Zealand	74

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 94, *Personal safety - Personal protective equipment*, Subcommittee SC 15, *Respiratory protection devices*.

A list of all parts in the ISO 17420 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

This document describes basic requirements for filtering respiratory protective devices (RPD) and its elements and components.

Requirements for RPD used in environments for special applications are given in the relevant parts of the ISO 17420 series.

Some test methods are described. For other test methods references are given to the ISO 16900 series "Methods of test and test equipment" or other test methods not developed by ISO/TC 94/SC 15.

[Annex A](#) gives information about reliability.

[Annex B](#) features an example of a FMEA (Failure Mode and Effects Analysis).

[Annex C](#) gives the test schedules including any pre-conditioning and number of samples.

[Annex D](#) provides information for normalisation of test results.

The sequence of testing follows the principle to minimize the necessary number of samples by carrying out destructive tests at the end. It also includes for safety reason that tests with test subjects are only carried out after the test samples have shown their safe performance in other tests.

Australian/New Zealand Standard

Respiratory protective devices — Performance requirements

Part 2: Requirements for filtering RPD (ISO 17420-2:2021 (ED.1.0) MOD)

1 Scope

This document specifies requirements for the performance and testing of filtering respiratory protective devices (RPD) in accordance with their classification and for use in the workplace to protect the wearer from hazardous atmospheres and/or environments.

Requirements for RPD elements and components are also specified in this document.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 9227, *Corrosion tests in artificial atmospheres — Salt spray tests*

ISO 16900-1:2019, *Respiratory protective devices — Methods of test and test equipment — Part 1: Determination of inward leakage*

ISO 16900-2, *Respiratory protective devices — Methods of test and test equipment — Part 2: Determination of breathing resistance*

ISO 16900-3, *Respiratory protective devices — Methods of test and test equipment — Part 3: Determination of particle filter penetration*

ISO 16900-4:2011, *Respiratory protective devices — Methods of test and test equipment — Part 4: Determination of gas filter capacity and migration, desorption and carbon monoxide dynamic testing*

ISO 16900-5, *Respiratory protective devices — Methods of test and test equipment — Part 5: Breathing machine, metabolic simulator, RPD headforms and torso, tools and verification tools*

ISO 16900-6:—¹⁾, *Respiratory protective devices — Methods of test and test equipment — Part 6: Mechanical resistance/strength of components and connections*

ISO 16900-7:2020, *Respiratory protective devices — Methods of test and test equipment — Part 7: Practical performance test method*

ISO 16900-8, *Respiratory protective devices — Methods of test and test equipment — Part 8: Measurement of RPD air flow rates of assisted filtering RPD*

ISO 16900-9, *Respiratory protective devices — Methods of test and test equipment — Part 9: Determination of carbon dioxide content of the inhaled gas*

ISO 16900-12, *Respiratory protective devices — Methods of test and test equipment — Part 12: Determination of volume-averaged work of breathing and peak respiratory pressures*

ISO 16900-14:2020, *Respiratory protective devices — Methods of test and test equipment — Part 14: Measurement of sound level*

ISO 16972, *Respiratory protective devices — Vocabulary and graphical symbols*

ISO/TS 16973, *Respiratory protective devices -- Classification for respiratory protective device (RPD), excluding RPD for underwater application*
