Australian/New Zealand Standard™

Gas appliances

Part 1.3: Gas space heating appliances

currently in review, click buy full version

AS/NZS 5263.1.3:2021

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee AG-001, Gas Appliances. It was approved on behalf of the Council of Standards Australia on 19 January 2021 and by the New Zealand Standards Approval Board on 16 December 2020.

This Standard was published on 5 February 2021.

The following are represented on Committee AG-001:

- Association of Accredited Certification Bodies
- Australian Industry Group
- Better Regulation Division (NSW Fair Trading, SafeWork NSW, TestSafe NSW)
- Consumer Electronics Suppliers Association
- Consumers Federation of Australia
- Energy Networks Australia
- Gas Appliance Manufacturers Association of Australia
- Gas Association of New Zealand
- Gas Energy Australia
- Gas Technical Regulators Committee
- Gas Utilization Institute, New Zealand
- Joint Accreditation System of Australia and New Zealand
- The Australian Gas Association
- WorkSafe New Zealand — Energy Safety

This Standard was issued in draft form for comment as DR AS/NZS 5263.1.3:2020.

Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee AG-001, Gas Appliances, to supersede AS/NZS 5263.1.3:2016, *Gas appliances, Part 1.3: Gas space heating appliances*.

This Standard provides particular requirements for gas space heating appliances that apply in addition to or in place of the general requirements for gas appliances set out in AS/NZS 5263.0, *Gas appliances, Part 0: General requirements*. The combination of AS/NZS 5263.1.3 (this Standard) and AS/NZS 5263.0 supersedes the combination of AS/NZS 5263.1.3:2016 and AS 5263.0—2013.

This Part 1.3 of AS/NZS 5263, supplements or modifies the corresponding Clauses of Part 0. The numbering of clauses in this Part 1.3 is consistent with the numbering in Part 0 for related requirements.

Statements used in this Part 1.3 to explain the relationship of clauses in this Standard to the corresponding clauses in Part 0 are as follows:

- (a) “This Clause of AS/NZS 5263.0 applies”, in which case the corresponding clause of Part 0 and its subclauses are used without modification.
- (b) “This Clause of AS/NZS 5263.0 applies, except as modified below”, in which case the corresponding clause of Part 0 and its subclauses are used but with the modifications, as listed in this document.
- (c) “Not applicable”, in which case the corresponding clause of Part 0 is not used in this context.

Otherwise the text in this Standard replaces the corresponding clause of Part 0.

Any clauses in this Standard that are additional to the requirements of Part 0 are numbered beginning from 101 (except for additional definitions, which begin from 201). Additional appendices in this Part 1.3 are designated with a letter starting from AA, or numbered beginning from 101 (e.g. ZA.101).

Where an appendix or part of an appendix (i.e. clause, figure or table) is cited in this Standard, reference should first be made to Part 0 for the content of the appendix, which may be modified by this Part 1.3.

This Standard (AS/NZS 5263.1.3), together with the Standard AS/NZS 5263.0 (Part 0), constitute a means of conformance to AS 3645, *Essential requirements for gas equipment*, for gas space heaters.

The objective of this Standard is to provide manufacturers, designers, regulatory authorities, conformity assessment bodies and similar organizations with uniform minimum requirements for the safety, performance and use of gas appliances.

This Standard should not be regarded as a design specification or as an instruction manual.

Consideration has been given to —

- (i) continuity of satisfactory operation;
- (ii) the prevention of fire hazards, and explosions;
- (iii) the prevention of injury to persons or property;
- (iv) gas rules and regulations now in force; and
- (v) relevant International Standards.

AS/NZS 5601 series of Standards provides essential requirements and means of conformance for gas installations. Any reference to “AS/NZS 5601” in AS/NZS 5263 series of Standards should be considered as reference to the appropriate part of AS/NZS 5601 series of Standards (i.e. AS/NZS 5601.1 or AS/NZS 5601.2).

The terms “normative” and “informative” are used in Standards to define the application of the appendix to which they apply. A “normative” appendix is an integral part of a Standard, whereas an “informative” appendix is only for information and guidance.

Australian/New Zealand Standard

Gas appliances

Part 1.3: Gas space heating appliances

Section 1 Scope and general

1.1 Scope and application

1.1.1 Scope

This Standard provides specific requirements and test methods for gas space heating appliances (convectors, radiant convectors, wall furnaces), with an energy input not exceeding 150 MJ/h.

For Australia, the fuel gases are natural gas (as described by AS 4564), town gas, liquefied petroleum gas (LP Gas, as described by AS 4670), simulated natural gas (SNG) and tempered liquefied petroleum gas (TLP).

For New Zealand:

- (a) The fuel gases are natural gas (as specified in NZS 5442) and general product liquefied petroleum gas (NZLPG) (as specified in NZS 5435).
- (b) The thermal efficiency requirements are informative only, except where they relate to safety.

NOTE 1 Decorative effect gas appliances are not covered by this Standard but are covered by the requirements of AS/NZS 5263.1.8.

NOTE 2 Appliances falling within the scope of AS 2658 are not covered by this Standard.

NOTE 3 Other statutory and regulatory requirements may be applicable to a product that falls within the scope of this Standard. It is the responsibility of the manufacturer, importer or distributor (as appropriate) to ensure that products conform to such requirements.

[Appendix AA](#) provides figures referred to in this Standard that are in addition to those in AS/NZS 5263.0.

Test methods are set out in [Appendices ZA, ZB](#) and [ZC](#) (see [Clause 1.4](#)).

1.1.2 Application

This Standard is complementary to, and is intended to be used in conjunction with AS/NZS 5263.0. The requirements given herein shall take precedence over corresponding requirements in that Standard.

AS 3645 specifies essential requirements for gas equipment that requires regulatory approval before sale. This Standard, together with AS/NZS 5263.0, is intended to provide a means of demonstrating conformance to AS 3645.

1.2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document.

NOTE Documents for informative purposes are listed in the Bibliography.

AS 4566, *Flue cowls — Gas appliances*

AS 4567, *Twin wall metal flues — Gas appliances*

AS/NZS 5263.0, *Gas appliances, Part 0: General requirements*
