Supplement to Calling Name Identification Presentation

AMERICAN NATIONAL STANDARD FOR TELECOMMUNICATIONS

ATIS is the leading technical planning and standards development organization committed to the rapid development of global, market-driven standards for the information, entertainment and communications industry. More than 200 companies actively formulate standards in ATIS' Committees and Forums, covering issues including: IPTV, Cloud Services, Energy Efficiency, IP-Based and Wireless Technologies, Quality of Service, Billing and Operational Support, Emergency Services, Architectural Platforms and Emerging Networks. In addition, numerous Incubators, Focus and Exploratory Groups address evolving industry priorities including Smart Grid, Machine-to-Machine, Connected Vehicle, IP Downloadable Security, Policy Management and Network Optimization.

ATIS is the North American Organizational Partner for the 3rd Generation Partnership Project (3GPP), a member and major U.S. contributor to the International Telecommunication Union (ITU) Radio and Telecommunications' Sectors, and a member of the Inter-American Telecommunication Commission (CITEL). ATIS is accredited by the American National Standards Institute (ANSI). For more information, please visit < [www.atis.org](http://www.atis.org) >.

### AMERICAN NATIONAL STANDARD

Approval of an American National Standard requires review by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made towards their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

**CAUTION NOTICE:** This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

### Notice of Disclaimer & Limitation of Liability

The information provided in this document is directed solely to professionals who have the appropriate degree of experience to understand and interpret its contents in accordance with generally accepted engineering or other professional standards and applicable regulations. No recommendation as to products or vendors is made or should be implied.

NO REPRESENTATION OR WARRANTY IS MADE THAT THE INFORMATION IS TECHNICALLY ACCURATE OR SUFFICIENT OR CONFORMS TO ANY STATUTE, GOVERNMENTAL RULE OR REGULATION, AND FURTHER, NO REPRESENTATION OR WARRANTY IS MADE OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR AGAINST INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. ATIS SHALL NOT BE LIABLE, BEYOND THE AMOUNT OF ANY SUM RECEIVED IN PAYMENT BY ATIS FOR THIS DOCUMENT, AND IN NO EVENT SHALL ATIS BE LIABLE FOR LOST PROFITS OR OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES. ATIS EXPRESSLY ADVISES THAT ANY AND ALL USE OF OR RELIANCE UPON THE INFORMATION PROVIDED IN THIS DOCUMENT IS AT THE RISK OF THE USER.

NOTE - The user's attention is called to the possibility that compliance with this standard may require use of an invention covered by patent rights. By publication of this standard, no position is taken with respect to whether use of an invention covered by patent rights will be required, and if any such use is required no position is taken regarding the validity of this claim or any patent rights in connection therewith.

### ATIS-1000641.a.2002(R2012) Supplement to Calling Name Identification Presentation

Is an American National Standard developed by the **Signaling, Architecture, and Control (SAC)** Subcommittee under the **ATIS Packet Technologies and Systems Committee (PTSC)**.

American National Standard for Telecommunications

## **Supplement to Calling Name Identification Presentation**

Secretariat

**Alliance for Telecommunications Industry Solutions**

Approved May 23, 2002

**American National Standards Institute, Inc.**

### **Abstract**

This supplement revises T1.641-1975 (R2000) to address certain regulations that may need to be considered by the service provider based on the FCC's orders that were issued as a result of FCC Docket No. 91-281, "Rules and Policies Regarding Calling Number Identification Service - Caller ID." Refer to the Code of Federal Regulations, Title 47, Part 64, section 64.1601. Such regulations may require the service provider to conceal the name of a caller when the calling party number is to be concealed. In particular, this supplement adds new requirements for a service provider option to link the presentation of Calling Name with the presentation of a private Calling Number.

## Foreword

The information contained in this Foreword is not part of this American National Standard (ANS) and has not been processed in accordance with ANSI's requirements for an ANS. As such, this Foreword may contain material that has not been subjected to public review or a consensus process. In addition, it does not contain requirements necessary for conformance to the standard.

This supplement was prepared by the T1S1.7 Working Group on Services, Architecture, and Control. It revises T1.641-1995 (R2000) to address certain regulations that may need to be considered by a service provider based on the FCC's orders that were issued as a result of FCC Docket No. 91-281, "Rules and Policies Regarding Calling Number Identification Service - Caller ID." Refer to 47 CFR Part 64, section 64.1601.

Suggestions for improvement of this standard are welcome. They should be sent to the Alliance for Telecommunications Industry Solutions, T1 Secretariat, 1200 G Street NW, Suite 500, Washington, DC 20005.

This standard was processed and approved for submittal to ANSI by Accredited Standards Committee on Telecommunications, T1. Committee approval of the standard does not necessarily imply that all members voted for its approval. At the time it approved this standard, the T1 Committee had the following members:

E.R. Hapeman, T1 Chair  
 W.R. Zeuch, T1 Vice-Chair  
 J.A. Crandall, T1 Director  
 S.M. Carioti, T1 Disciplines  
 S.D. Barclay, T1 Secretary  
 C.A. Underkoffler, T1 Chief Editor  
 D. Vander Meiden, T1S1 Technical Editor

American National Standard  
for Telecommunications –

## Supplement to Calling Name Identification Presentation

### 1 Introduction

This supplement to American National Standard for Telecommunications T1.641-1995 (R2000), *Calling Name Identification Presentation*, addresses certain regulatory requirements<sup>1</sup> that may exist regarding Caller Identification services. Such regulations may require the service provider to conceal the name of a caller when the calling party number is to be concealed. In particular, this supplement adds new requirements for a service provider option to link the presentation of Calling Name with the presentation of a private Calling Number. An update to some references is also included.

### 2 Changes to T1.641-1995 (R2000)

#### 2.1 Add the following references to clause 2 (Normative references):

T1.625-1993 (R 1999), *Integrated services digital network (ISDN) - Calling line presentation and restriction supplementary services.*<sup>2</sup>

T1.625a-1998 *Integrated services digital network (ISDN) - Calling line presentation and restriction supplementary services, application of standard to wireless PCS applications.*<sup>2</sup>

#### 2.2 Replace clause 4.1 with the following:

##### 4.1 Description

The Calling Name Identification Presentation service provides Name Information or Redirecting Name Information to the called party. The storage and delivery of the calling party name are network functions. The calling party takes no actions to activate, initiate, or in any manner provide Calling Name Identification Presentation. The called party, when subscribed to Calling Name Identification Presentation, automatically receives the Name Information. Delivery of a Calling Name may be affected by a subscriber of the Calling Name Identification Restriction service. For example, a subscriber of Calling Name Identification Restriction who forces the Calling Name "private" when initiating a call would cause an indication of "private" to be delivered to a Calling Name Identification Presentation subscriber.

Certain regulatory jurisdictions may require the service provider to inhibit the delivery of the caller's name when Calling Line Identification Restriction (CLIR) applies to a call. In such cases, the Calling Name Identification Presentation subscriber will receive an indication of "private" instead of the caller's name.

<sup>1</sup> Refer to 47 CFR Part 64, section 64.1601, which was modified as a result of FCC Docket No. 91-281, "Rules and Policies Regarding Calling Number Identification Service - Caller ID."

<sup>2</sup> This document is available from the Alliance for Telecommunications Industry Solutions, 1200 G Street N.W., Suite 500, Washington, DC 20005. <<http://www.atis.org>>
