AMERICAN NATIONAL STANDARDS

By approving this American National Standard, the ANSI Board of Standards Review confirms that the requirements for due process, consensus, balance and openness have been met by B11 Standards, Inc. (the ANSI-accredited standards developing organization).

American National Standards are developed through a consensus process. Consensus is established when substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward resolution. This process brings together volunteers and/or seeks out the views of persons who have an interest in the topic covered by this publication. While B11 Standards, Inc. administers the process and establishes procedures to promote fairness in the development of consensus, it does not write the document and it does not independently test, evaluate or verify the accuracy or completeness of any information or the soundness of any judgments contained in its standards or guidelines.

American National Standards are promulgated through ANSI for voluntary use; their existence does not in any respect preclude anyone, whether they have approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards. However, users, distributors, regulatory bodies, certification agencies and others concerned may apply American National Standards as mandatory requirements in commerce and industry.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of an American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the Secretariat (B11 Standards, Inc.).

B11 Standards, Inc. makes no warranty, either expressed or implied as to the fitness of merchantability or accuracy of the information contained within this standard, and disclaims and makes no warranty that the information in this document will fulfill any of your particular purposes or needs. B11 Standards, Inc. disclaims liability for any personal injury, property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, application, or reliance on this document. B11 Standards, Inc. does not undertake to guarantee the performance of any individual manufacturer or seller's products or services by virtue of this standard or guide, nor does it take any position with respect to the validity of any patent rights asserted in connection with the items which are mentioned in or are the subject of this document, and B11 Standards, Inc. disclaims liability for the infringement of any patent resulting from the use of or reliance on this document. Users of this document are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

In publishing or making this document available, B11 Standards, Inc. is not undertaking to render professional or other services for or on behalf of any person or entity, nor is B11 Standards, Inc. undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment, or as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

B11 Standards, Inc. has no power, nor does it undertake to police or enforce conformance to the requirements of this document. B11 Standards, Inc. does not certify, test or inspect products, designs, or installations for safety or health purposes. Any certification or other statement of conformance to any health or safety-related information in this document shall not be attributable to B11 Standards, Inc. and is solely the responsibility of the certifier or maker of the statement.

NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. You may contact the Secretariat for current status information on this, or other B11 standards.

FOREWORD (THIS FOREWORD IS NOT PART OF AMERICAN NATIONAL STANDARD ANSI B11.16-2014 MPIF #47).	VI
EFFECTIVE DATES:	VI
DEVELOPMENT	VII
INTRODUCTION	IX
1 SCOPE AND EXCLUSIONS	1
1.1 Scope	1
1.2 Types of machines excluded	2
2 REFERENCES	2
2.1 Normative references	2
2.2 Informative References	3
3 DEFINITIONS	4
4 RESPONSIBILITY	10
4.1 Supplier responsibilities	10
4.2 User responsibilities	10
4.3 Personnel responsibilities	11
5 RISK ASSESSMENT PROCESS	11
6 DESIGN AND CONSTRUCTION	13
6.1 General requirements	13
6.1.1 Hazards to personnel other than the point of operation	13
6.1.2 Hazards to personnel associated with machine installation	13
6.1.3 Springs	14
6.1.4 Brakes	14
6.1.5 Spring counterbalance	14
6.1.6 Air (pneumatic) counterbalance	14
6.1.7 Pneumatic controls	15
6.1.8 Hand operated levers	15
6.1.9 Pressure vessels	15
6.1.10 Hydraulic equipment	15
6.1.11 Electrical requirements	17
6.1.12 Performance of the safety-related function(s)	21
6.1.12.1 Programmable controllers	21
6.1.13 Stopping-performance monitoring system	22
6.1.14 Isolation of energy sources	23
6.1.15 Stored energy	23
6.1.16 Safety blocks or other die/ram support means	23
6.2 Mechanical PM press	24
6.2.1 Part-revolution clutch control system	24
6.3 Hydraulic PM press	27
6.3.1 Control system	27
6.3.2 Homing function	29
6.3.3 Start position function	29
6.4 Direct drive press:	29
6.4.1 Brakes – general requirements	30
6.4.2 Motor–start buttons	30
6.4.3 Operating modes	30

6.4.4	Homing function	32
6.4.5	Start position function	33
7	LAYOUT, INSTALLATION, TESTING AND START-UP	33
7.1	General.....	33
7.2	Layout.....	33
7.3	Installation	34
7.3.1	Floor loading	34
7.3.2	Anchoring.....	35
7.3.3	Electrical requirements for installation.....	35
7.3.4	Lockout/tagout.....	35
7.3.5	Lighting	35
7.4	Pit design and safeguarding	36
7.5	Testing and start-up	36
8	SAFEGUARDING	37
8.1	General.....	37
8.2	Responsibility.....	37
8.3	Hazards associated with broken or falling components	39
8.4	Perimeter safeguarding.....	39
8.5	Guards	42
8.5.1	Point of operation guards.....	42
8.5.2	Fixed guard	43
8.5.3	Adjustable guards.....	43
8.5.4	Interlocked guards.....	43
8.6	Safeguarding devices.....	45
8.6.1	Point of operation safeguarding devices	45
8.6.2	Type-A movable-barrier device (gate).....	46
8.6.3	Type-B movable-barrier device (gate).....	46
8.6.4	Movable barrier device	46
8.6.5	Presence-sensing point of operation device	47
8.6.6	Pull-back device.....	51
8.6.7	Holdout or restraint device.....	53
8.6.8	Two-hand control device	53
8.6.9	Two-Hand trip for revolution clutch	54
8.7	Awareness barriers, devices, or signals	55
8.7.1	Awareness barriers.....	56
8.7.2	Awareness devices or signals.....	56
8.8	Safe work practices.....	56
8.9	Performance of the Safety Related Function(s).....	56
9	SET-UP, OPERATION AND MAINTENANCE	57
9.1	General.....	57
9.2	Press set-up procedures.....	58
9.3	Operation	59
9.3.1	Operating Procedures.....	59
9.3.2	Normal Production Operation.	59
9.4	Feeding - compacting press	60
9.5	Green part removal - compacting press	60
9.6	Manual feeding	61
9.7	Part removal - coining and sizing press	61
9.7.1	Non-manual part removal	61
9.7.2	Manual part removal	62
9.8	Tool sets	62
9.8.1	Tool set breakage hazard	62
9.8.2	Identification - tool set and die set members.....	62
9.8.3	Tool set handling	62

9.8.4	Tool setting procedure	62
9.8.5	Protection during and after tool setting	63
9.8.6	Tool setters	63
9.9	Removable die set handling.....	63
9.10	Maintenance.....	64
9.11	Maintenance inspections	66
9.12	Supervision.....	67
9.13	Control of hazardous energy	67
9.14	Initiation of normal operation.....	68
9.15	Safety signs	68
9.16	Personal protective equipment (PPE).....	68
10	TRAINING	68
10.1	General.....	68
10.2	Training elements.....	69
	10.2.1 Training programs	70
10.3	Operator training	71
10.4	Maintenance personnel training	71
10.5	Supervisor training.....	71
10.6	Retraining	71
	ANNEX A – FIGURES	72
	ANNEX B – TASK-BASED HAZARDS	86
	ANNEX C – PERFORMANCE OF THE SAFETY-RELATED FUNCTION(S).....	87
	ANNEX D – SAFETY DISTANCE.....	88
	ANNEX E – MAXIMUM STOP TIME TEST	99
