AMERICAN NATIONAL STANDARDS / TECHNICAL REPORTS

The B11 Series of American National Standards and Technical Reports are developed through a consensus process. Consensus is established when substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward resolution. This process brings together volunteers and/or seeks out the views of persons who have an interest in the topic covered by this publication. While B11 Standards, Inc. administers the process and establishes procedures to promote fairness in the development of consensus, it does not write the document and it does not independently test, evaluate or verify the accuracy or completeness of any information or the soundness of any judgments contained in its standards or guidelines.

American National Standards and Technical Reports are promulgated through ANSI for voluntary use. Their existence does not in any respect preclude anyone, whether they have approved the standards/technical reports or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to these documents. However, users, distributors, regulatory bodies, certification agencies and others concerned may apply American National Standards or Technical Reports as mandatory requirements in commerce and industry.

The American National Standards Institute does not develop standards or technical reports and will in no circumstances give an interpretation of an American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the Secretariat (B11 Standards, Inc.).

B11 STANDARDS, INC. MAKES NO WARRANTY, EITHER EXPRESSED OR IMPLIED AS TO THE FITNESS OF MERCHANTABILITY OR ACCURACY OF THE INFORMATION CONTAINED WITHIN THIS TECHNICAL REPORT, AND DISCLAIMS AND MAKES NO WARRANTY THAT THE INFORMATION IN THIS DOCUMENT WILL FULFILL ANY OF YOUR PARTICULAR PURPOSES OR NEEDS. B11 Standards, Inc. disclaims liability for any personal injury, property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, application or reliance on this document. B11 Standards, Inc. does not undertake to guarantee the performance of any individual manufacturer or seller's products or services by virtue of this technical report, nor does it take any position with respect to the validity of any patent rights asserted in connection with the items which are mentioned in or are the subject of this document, and B11 Standards, Inc. disclaims liability for the infringement of any patent resulting from the use of or reliance on this document. Users of this document are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

In publishing or making this document available, B11 Standards, Inc. is not undertaking to render professional or other services for or on behalf of any person or entity, nor is B11 Standards, Inc. undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment, or as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

B11 Standards, Inc. has no power, nor does it undertake to police or enforce conformance to the requirements of this document. B11 Standards, Inc. does not certify, test or inspect products, designs, or installations for safety or health purposes. Any certification or other statement of conformance to any health or safety related information in this document shall not be attributable to B11 Standards, Inc. and is solely the responsibility of the certifier or maker of the statement.

Contents	Page
FOREWORD	iv
Overview of the ANSI B11 Series of Machinery Safety Standards	v
Introduction	viii
1 Scope	1
2 Normative references	2
3 Terms and definitions	1
4 General characterization of safety of machinery versus IT-security	2
4.1 Principle objectives	2
4.2 Different elements of risk	3
4.3 Consequences for risk assessment process	3
5 Relationship to existing legal and standardization framework regarding safety of machinery	3
5.1 Legal framework	3
5.2 Standardization framework – Relationship to ISO 12100	3
6 Relationship between safety of machinery and IT-security	4
7 Essential steps to address IT-security over the whole life-cycle of the machine	5
8 Generic guidance for assessing IT-security threats regarding their possible influence on safety of machinery	6
9 Roles to address IT-security issues with possible relevance to safety of machinery	6
10 Guidance for machine manufacturers to address IT-security issues with possible relevance to safety of machinery	8
10.1 General	8
10.2 Selection of appropriate components (hardware/software)	8
10.3 Appropriate machine design	8
10.4 Instruction handbook (guidance to the machine user)	9
Annex A (informative) Example of a legal framework	10
Bibliography	11
