## Safety of toys — Interpretations

---

Part 2: Replies to requests for interpretation of the chemical standards in the EN 71-series

## National foreword

This Published Document is the UK implementation of CEN/TR 15371-2:2021. It supersedes PD CEN/TR 15371-2:2019, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee CW/15, Safety of toys.

A list of organizations represented on this committee can be obtained on request to its committee manager.

## European foreword

This document (CEN/TR 15371-2:2021) has been prepared by Technical Committee CEN/TC 52 “Safety of toys”, the secretariat of which is held by DS.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes CEN/TR 15371-2:2019.

In comparison with CEN/TR 15371-2:2019, one interpretation sheet has been added. Some of the previous interpretations have been modified, due to amendments to the corresponding EN 71 standards.

CEN/TR 15371 series, *Safety of toys — Interpretations*, is currently composed of the following parts:

- *Part 1: Replies to requests for interpretation of EN 71-1, EN 71-2, EN 71-8 and EN 71-11.*
- *Part 2: Replies to requests for interpretation of the chemical standards in the EN 71-series.*

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

## 0 Introduction

### 0.1 Interpretations and no-action decisions

This document contains replies to requests for interpretations concerning the understanding of clauses in the chemical standards in the EN 71-series:

- EN 71-3: *Migration of certain elements*;
- EN 71-4: *Experimental sets for chemistry and related activities*;
- EN 71-5: *Chemical toys (sets) other than experimental sets*;
- EN 71-7: *Finger paints — Requirements and test methods*;
- EN 71-9: *Organic chemical compounds — Requirements*;
- EN 71-10: *Organic chemical compounds — Sample preparation and extraction*;
- EN 71-11: *Organic chemical compounds — Methods of analysis*;
- EN 71-12: *N-Nitrosamines and N-Nitrosatable substances*;
- EN 71-13: *Olfactory board games, cosmetic kits and gustative games*.

The replies concern those requests that have resulted in an interpretation or a decision that no action is required as the standard is sufficiently clear.

An interpretation does not have the same status as the text of the standard, nor can it overrule the text of the standard. However, following an interpretation should give assurance that the relevant clause of the standard has been correctly applied. An interpretation should only be regarded as a clarification of the meaning of the standard such that stakeholders can apply it correctly in a conformity assessment. An interpretation is not an assessment of the requirement in the standard - it is only a strict interpretation of the meaning of the text.

#### **Disclaimer:**

The interpretations have been derived by expert groups of CEN/TC 52. The information contained herein is for guidance only and does not reflect the formal approval by CEN or CEN member bodies. It should be noted that the interpretations are neither part of any standard nor have been referenced in the Official Journal of the European Union.

### 0.2 Requests for interpretation

Requests for interpretations may be submitted by a CEN member body through its national committee or by a CEN/TC 52 liaison (but not directly by an individual or a company) - in accordance with the interpretation protocols agreed by CEN/TC 52. The requests are then channelled to the relevant CEN/TC 52 working party, which will then deal with the request.

A request for an interpretation may lead to:

a) An interpretation of the standard:

This should reflect a reasonable interpretation of how the standard should be used, taking into account:

1. the wording of the standard;
2. the rationale of the standard;

3. the history of the standard.

b) A no-action decision:

This is applicable when it is agreed that the standard appropriately specifies how a toy shall be assessed.

c) A proposal for an amendment of the standard:

This is applicable when it is agreed that the standard is deficient in some way.

NOTE Interpretation and no-action decisions are published in CEN/TR 15371-2, which will be updated on a regular basis.

Proposals for amendments will be progressed as new work item proposals in accordance with CEN rules.

### **0.3 Answers to requests for interpretations**

Since requests for interpretations are submitted through a CEN member body or a CEN/TC 52 liaison, it is assumed that they will keep themselves informed about decisions concerning the request and its progress and will themselves inform the originator of the request as appropriate.

## 1 Scope

The purpose of this document is to provide replies to requests for interpretations of actual chemical standards in the EN 71-series:

- EN 71-3: *Migration of certain elements*;
- EN 71-4: *Experimental sets for chemistry and related activities*;
- EN 71-5: *Chemical toys (sets) other than experimental sets*;
- EN 71-7: *Finger paints — Requirements and test methods*;
- EN 71-9: *Organic chemical compounds — Requirements*;
- EN 71-10: *Organic chemical compounds — Sample preparation and extraction*;
- EN 71-11: *Organic chemical compounds — Methods of analysis*;
- EN 71-12: *N-Nitrosamines and N-Nitrosatable substances*;
- EN 71-13: *Olfactory board games, cosmetic kits and gustative games*.

## 2 Normative references

There are no normative references in this document.

## 3 Terms and definitions

No terms and definitions are listed in this document.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

## 4 EN 71-3:2019, Safety of toys Part 3: Migration of certain elements

### 4.1 Toy material categories - “stickers” (interpretation)

#### Question

The question relates to the categorization of “stickers” under EN 71-3:2019, 4.1 Toy material categories.

Stickers are often composed of paper/plastic and glue. Sticky/liquid glue as such falls within category II of EN 71-3 (liquid or sticky material), while paper/plastic falls within category III (scraped-off material). We have considered two situations:

- stickers already on the toy (glue is not accessible to children since the sticker is already on the toy);
- stickers provided as such to children (glue is accessible once the sticker is removed from its backing).

We would like to know whether the sticker materials in the two above cases shall be considered independently for their categorization (i.e. category II for the glue and category III for the paper) or whether the whole sticker should be considered for the categorization.
